

Thank you for taking the time to complete this data form!

On the following 2 worksheets, you will be asked to provide information about your school dental sealant program and the specific schools that your program served during the 2019-20 school year. Please complete both sheets to the best of your ability. This is a requirement to renew your certification status.

If you have any questions or comments, please contact Karen Phillips at (971) 673-0235 or karen.phillips@dhsoha.state.or.us.

Name of School Dental Sealant Program:		
What is your <u>program's</u> average retention rate for resin sealants?	<p><i>Programs must meet the national benchmark of 80%-90% retention at one year.</i></p> <p><i>If your program is below this benchmark, please submit a plan to OHA on how your program intends to increase one-year retention rates.</i></p>	
What is your <u>program's</u> average retention rate for glass ionomer (GI) sealants?	<p><i>Programs must still meet the national benchmark of 80%-90% retention at one year.</i></p> <p><i>Note : It is expected that the retention for glass ionomer will be less than for resin sealants. Tracking this data will help us determine an appropriate quality check for GI.</i></p> <p><i>If your program is below this benchmark, please submit a plan to OHA on how your program intends to increase one-year retention rates.</i></p>	
What is your <u>program's</u> average retention rate if using a combination of resin and glass ionomer (GI) sealants?	<p><i>Programs must still meet the national benchmark of 80%-90% retention at one year.</i></p> <p><i>Note : It is expected that the retention for glass ionomer will be less than for resin sealants. Tracking this data will help us determine an appropriate quality check for GI.</i></p> <p><i>If your program is below this benchmark, please submit a plan to OHA on how your program intends to increase one-year retention rates.</i></p>	
Do you measure the amount of time students are out of the classroom? Please explain the methodology your program uses to measure the amount of time children are out of the classroom.		
Do you request feedback from schools on your dental sealant program? Please explain how you seek feedback.		

To calculate your program's retention rate compute the number of sealants intact in year 2 (numerator) for the same set of students who were sealed in year 1 (denominator). OHA compares 22 students per school, unless fewer students match (such as in very small schools). Please note that we are not asking for individual hygienists' retention rates, but rather an aggregate number for your entire program.

This worksheet will give you a chance to provide us with some data for each school that your organization served during the 2019-20 school year. Please provide each school's information on a separate row. Please note that this template includes formulas for the Percentage columns. We request that you do NOT edit or delete the formulas. Please enter the information/data in the grey cells only.

County	School District	School Name	Grades Served (place a numerical 1 if you served that grade level)												Number of children who returned a YES parental permission form for dental sealants	Number of children who returned a NO parental permission form for dental sealants	Total number of children enrolled in grades served	Percentage of children who returned a YES parental permission form for dental sealants	Percentage of children who returned a NO parental permission form for dental sealants	Percentage of children who returned a parental permission form for dental sealants	Number of children screened for dental sealants	Number of children who received at least one dental sealant	Number of dental sealants placed	Sealant material used (select the option that applies from the drop-down list)	Number of children referred for early care	Percentage of children referred for early care	Number of children referred for urgent care	Percentage of children referred for urgent care	Percentage of children referred for early care or urgent care	School Notes
