

ALERT IIS: SUPER USER ROLE

This guide addresses:

- [Super User role](#)
- [Setting up new users](#)
- [Deactivating/reactivating user accounts](#)
- [Updating organization profile](#)
- [Adding clinicians](#)
- [Additional Super User tips](#)

The Super User is an important role that exists to provide local staff with administrative access to create, edit, and terminate ALERT IIS User Accounts for staff who join or leave a clinic. Super Users also support ALERT IIS users in their organization by directing them to training materials, resetting passwords and providing guidance on navigating the system. Super Users in Vaccines for Children (VFC) participating clinics can access two VFC-specific reports: Billing and Accountability.

New user account set-up steps

1. Super User directs new user to read the [Confidentiality Policy](#).
2. Super User prints the [Individual User Agreement](#) (pdf) and has the new user sign it.
3. Super User directs new user to attend training for the ALERT IIS access they will be given.
 - a. Standard User role: Watch the 4 short [standard user training videos](#) on ALERT IIS functionality and print certificates provided at the end of each video.
 - b. Query only role: Read through the [Query Only Training](#) (pdf) and complete the quiz at the end of the document.
4. Super User will collect and file the signed Individual User Agreement and proof of training.
(When no Super User is available, submit the signed agreement for your organization to the [ALERT IIS Help Desk](#) by email alertiis@state.or.us or by fax to 971-673-0276.)

Steps to create a new user account in ALERT IIS

Manage Access
 Add User
 Add Multiple Users
Edit User
 List Organizations
 Edit Organization

1. Login to ALERT IIS and click the “Manage Access/Account” tab on the menu at the top of the page.
2. Click “Edit User” link found under the “Manage Access” section in the blue menu bar to the left.

Double check for an existing user account by selecting all three status check boxes, entering the name of individual, and clicking the “Find” button.
(If no account is found, create a new user account.) > *continue on next page*

Edit User - Search

Application: All Apps

Last Name:
 First Name:

To get a complete list of users, leave both fields blank and click the find button.

Manage Access

- Add User**
- Add Multiple Users
- Edit User
- List Organizations
- Edit Organization

The 'Add User' form contains the following fields: * User First Name, * User Last Name, User Middle Initial, * Username, * Password, Street Address, Other Address, P.O. Box, City, State (dropdown), Zip, Email (circled in red), and Phone Number. At the bottom are 'Save' and 'Cancel' buttons. An orange arrow points from the 'Email' field to the 'Save' button.

3. Click "Add User" in the blue menu bar to the left.
4. Fill in blue require fields on the **Add User** Tab.
 - Include an email address to allow the user to independently reset their password if locked out/forgot password.
5. Click the "Save" button.
(A new tab, **Modify Access**, will appear at the top of the page.)

The 'Modify Access' form shows a table for user access. The top table has columns: Application, Organization, Role, and Add Access. Below it is a section for 'Current list of organizations and applications' with a table that includes Application, Organization, Role, Status, and Select. At the bottom are 'Save' and 'Cancel' buttons.

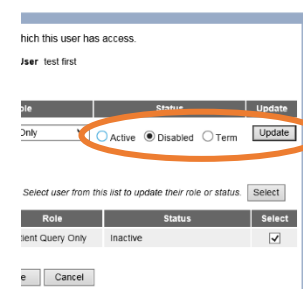

6. Click on the **Modify Access** tab and select the desired role "Standard User" or "Query Only".
7. Click the "Add" button.
8. Click the "Save" button.
(To give a user the Super User role, direct staff to Super User training [webinar](#).)

Deactivating/Reactivating an ALERT IIS user account

Super Users reactivate accounts when adding someone new to their organization who already has an account in ALERT IIS. Accounts are disabled after three failed password attempts and/or the account is inactive if not used within a 90-day period. Deactivate an account when a user is on an extended leave or has left the organization permanently.

This screenshot shows the 'Modify Access' form with the 'Status' column in the bottom table. The 'Status' dropdown is set to 'Inactive'. The 'Select' checkbox for the user is checked (circled in red). The 'Add Access' button is also visible.

This is a close-up of the status selection options. It shows three radio buttons: 'Active', 'Disabled', and 'Term'. The 'Active' option is selected. An 'Update' button is to the right. Below this is another table with 'Role' and 'Status' columns, and a 'Select' checkbox.

1. Login to ALERT IIS and find the "Manage Access/Account" tab on the menu at the top of the page.
2. Click the "Edit User" link under the "Manage Access" section in the blue menu bar to the left.
 - Search for an existing user account by selecting all three status check boxes, entering the name of individual, and clicking the "Find" button.
3. Click the **Modify Access** tab.
4. Select the checkbox for an organization that the Super User is associated with from the table at the bottom of the page.
5. Click the "Select" button above. (This moves the information to the top line where the status can be modified.)

6. Select the appropriate status: "Active" for a user who needs access. "Term" for a user who is no longer working at that location.
7. Click the "Update" button to the right of the status choices.
8. Click the "Save" button at the bottom of the page.
(If user has forgotten password, see RESET PASSWORD steps in additional tips section.)

Updating Organization Profile

All the information associated with your organization, including organization name, delivery days and times, addresses, and contacts is on your organization profile. If you need to change or update any of that information you will want to do that here. The Vaccine Delivery contact is the person responsible for the safety and proper use of the vaccines, a contact is required and must always be up-to-date.

Manage Access

Add User
Add Multiple Users
Edit User
List Organizations
Edit Organization

1. Login to ALERT IIS and find the “Manage Access/Account” tab on the menu at the top of the page.
2. Click the “Edit Organization” link under the “Manage Access” section in the blue menu bar to the left.

3. Click “Enter” or “search” both will do the same thing to pull up all organizations you manage.
4. You can also search by AL Code, VFC Pin, Zip Code, etc.
5. Choose your organization by clicking the blue hyperlink.

Organization Search Criteria

Edit Organizations

Show ☒ Open ☐ Closed ☐ Both

Search

Organization Type **All Orgs**

Search Field **Name**

Search String **Labyrinth**

Search Result

Name	Org Code	VFC Pin	City	County	Open
LABYRINTH MEDICAL CENTER	AL1114	P11111	PORTLAND	Multnomah	Y

To update delivery times:

Delivery Days and Times

	Delivery Window 1		Delivery Window 2	
<input checked="" type="checkbox"/> Monday	8:00 AM	To 5:00 PM		To
<input checked="" type="checkbox"/> Tuesday	9:00 AM	To 5:00 PM		To
<input type="checkbox"/> Wednesday		To		To
<input checked="" type="checkbox"/> Thursday	8:00 AM	To 5:00 PM		To
<input checked="" type="checkbox"/> Friday	6:00 AM	To 8:00 PM		To

Note: you do not have to add times on the 2nd delivery window **unless** you are taking a break and do not want deliveries between that window.

1. Click the “**check box**” next to the corresponding day of the week to indicate day of delivery
2. Choose a beginning and end time from both drop downs
3. Repeat the process for each day of the week you are receiving deliveries.
4. Leave the checkbox unchecked if you are not available for deliveries on that day.

Additional Super User Tips:

ALERT IIS reports for Super Users

The AdHoc report is accessible from both the Standard User role and the Super User role. Some Super Users use the AdHoc report to monitor electronic data submission from their electronic health records system to ALERT IIS and whether your electronic submission method is sending all immunizations to ALERT IIS in a complete and accurate format. Please follow the [AdHoc Tipsheet](#) to learn more.

The Super User also role grants access to two reports ([Billing](#) and [Accountability](#) report) that are used by clinics participating in the Vaccines for Children (VFC) program. The Billing report is used only by public clinics and local health departments who are billed for immunizations given to patients who are ineligible to receive state-supplied vaccine inventory.

Managing ALERT IIS login and password reset

1. Login to ALERT IIS and find the “Manage Access/Account” tab on the menu at the top of the page.
2. Click the “Edit User” link under the “Manage Access” section in the blue menu bar to the left.
 - Search for an existing user account by selecting all three status check boxes, entering the name of individual and clicking the “Find” button.
3. Enter a temporary password in the “new password” and “confirm password” boxes.
4. Click the “Save” button.
5. Give user temporary password. They will create a new permanent password when they log-in.

Login tips to share with new users

If a user requires a password reset. ALERT IIS log in requires an Org Code (the organization number assigned to the clinic location associated with the employee’s user account), username and password. If you need assistance you can email the Oregon Immunization Program Helpdesk at **1-800-980-9431** or email the [ALERT IIS Help Desk](#). The following guidelines will ensure greater success logging in:

1. **Always enter the Org Code with capital letters** - The Org Code is case sensitive and will contain two capital letters and four numbers, e.g. AL1234. Enter the Org Code with lower case letters will cause the login to fail.
2. **Verify the correct username is being used** – Verify the username is correct by checking the user account information.
3. **Clear browser cache** - If a user login attempts continue to fail, suggest clearing the browser cache of any saved information and reopen the webpage.
4. **“Forgot Password” button** - Active users can reset their own password *if they have an email address associated with their user account*.
