

Quarterly DATA SNAPSHOT

OREGON IMMUNIZATION PROGRAM

Q3, 2025

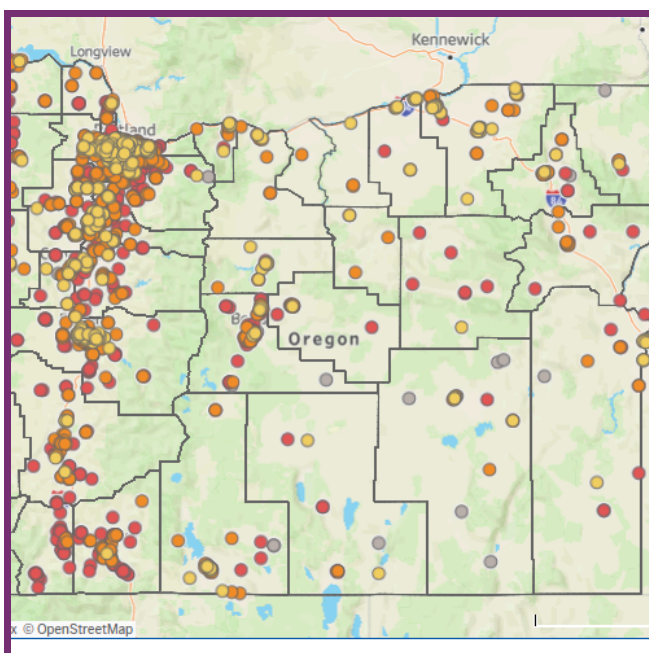

QUARTER 3 UPDATES

Quarter 3 of 2025 saw a number of changes to OIP's data dashboards, including updated data and more granular details as well as new data displays.

Upcoming changes to dashboards in the next quarter include: (1) the re-release of Flu Immunization Dashboard (just in time for flu season); (2) the release of the Respiratory Immunizations Dashboard, with data for adult and pediatric RSV as well as COVID-19 vaccinations; and (3) Pregnancy Immunization Dashboard, with immunization rates for Tdap, RSV, COVID-19 and flu during pregnancy. This is your friendly reminder that immunizations are one of the greatest public health achievements, preventing tens of thousands of deaths and millions of cases of vaccine preventable disease.

If you need help accessing vaccines for yourself or your family, please contact your local health department or call 211.

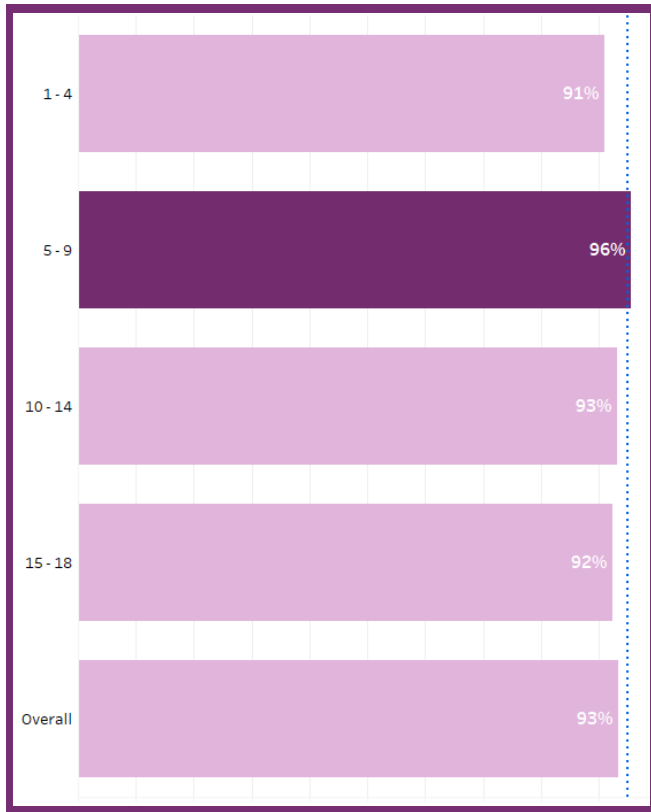

NEW DATA HIGHLIGHTS

School-level data now available on School Immunization Dashboard

The School Immunization Dashboard is now your one-stop-shop for school-level, county-level and statewide school immunization and exemption data. The school-level pages are also translated in Spanish for improved access and sharing.

Measles immunization dashboard has updated data and a new look

Measles immunization data is now current as of September 19, 2025. As part of an ongoing effort to improve accessibility of data visualizations, the Measles Immunization Dashboard was updated to better align with Web Content Accessibility Guidelines (WCAG) version 2.0. Changes include: color selections, descriptive titles and alt-text added to figures to provide a brief text description of images and graphics.

Adult immunization data updated.

With newly updated data, the Adult Immunization Dashboard displays the past 3 years of up-to-date rates for pneumo, zoster and tetanus immunizations.
