[#] Caution is advised when interpreting these values. The number of two year olds from this group in the ALERT IIS database is small (between 10 and 49 people), and rate estimates may be unstable from year to year.

* Less than 10 two year olds from this group are in the ALERT IIS dataset. Rate not displayed in accordance with guidelines set forth by the Oregon Immunization Program Data Governance Council.

~ Indicates there were no two year olds meeting this group definition in the ALERT IIS dataset.

^a Two year olds are children whose second birthday occurred during the reporting year and who reside in the county. Vaccination status was evaluated as of December 31st of the reporting year.

^b Fully immunized with 4 doses of DTaP, 3 doses IPV, 1 dose MMR, 3 doses Hib, 3 doses HepB, 1 dose Varicella, and 4 doses PCV; this is the official childhood vaccination series.

^c VFC status reflects children receiving at least one vaccine under the Vaccines for Children program. The program covers the cost of vaccine and to be eligible, one of the following criteria must be met: (1) enrolled in Medicaid/Oregon Health Plan, (2) uninsured, (3) underinsured, (4) American Indian/Alaska Native. This measure may serve as an estimate of vaccination rates for those receiving supplemental assistance.

^d Race and ethnicity categories are not mutually exclusive. One individual may contribute to one or more categories.
