

### Testing guidelines:

- Patient must 15 years of older
- The highest yield be for patients with cough and fever for not less than 2 days and not more than 14 days
- Asymptomatic or pre-op testing can be done in the drive through, as space allows.
- Order must be made by the patient's provider
- If prioritization is necessary, priority will be given to:
  - Symptomatic individuals (fever, cough) 65 years old and older
  - Symptomatic individuals (fever, cough) with chronic medical conditions and/or an immunocompromised state that may put them at higher risk for poor outcomes.
  - Individuals who, within 14 days of symptom onset, had close contact with a suspected or confirmed COVID-19 patient
  - Individuals who have a history of travel from affected geographic areas within 14 days of their symptom onset.

### Provider Testing Instructions:

See attached Provider Communication

### Testing Event:

See attached Testing – DC for map

We stood this up similarly to the flu vaccination POD, using the fairgrounds and routing vehicles under the grandstands for protection from weather and privacy.

### We used the following stations/flow:

- Volunteer Check In/Out – sign in, pick up safety vest & radio (as assigned)
- Validation – at entry point, check identification against pre-approved list and distribute instructions
  - Use signage and cell phone to communicate with people through closed vehicle windows and slip instructions through small opening in window for protection
  - Those without valid physician orders are sent out, and the pre-approved and directed to proceed through area marked with traffic cones and guided by traffic control personnel
- Traffic Control Personnel – using radios, directed vehicles to staging point
  - Vehicles were staged away from testing area for safety and privacy

- Using radio traffic, one vehicle was brought “on deck” while another was moved to testing station.
- Testing Station
  - 2 physicians/medical personnel in PAPRs & Tyvek suit, doubled gloved
  - Medical Assistant - Assist at testing station (open swabs, etc.) – gown, gloves, goggles, mask
  - Infection Control - Nurse to observe physicians at testing station to monitor infection control practices
  - Exit Screener - Make sure people are well enough to drive
  - EMS Standby as needed

Personnel depends upon size of event but may include EM, sheriff's office, SAR, public health, hospital & clinical staff, EMS/Fire
