

## Vaccine for Adults

CDC's "Section 317" Funded Vaccine for Uninsured Adults and for Special Outreach Projects

OREGON IMMUNIZATION PROGRAM  
Public Health Division

---

---

---

---

---

---

---

---

## Overview

CDC's Section 317 funded vaccines are made available to Oregon's public health clinics for a variety of purposes. Each state makes their own choices about how they will use 317-funded vaccines.

In Oregon, we use our vaccine for:

- Routine Daily Access for Uninsured/Underinsured Adults
- Special Projects

### 317 Eligibility Chart – Extra Details – Routine Use

#### ADDITIONAL ELIGIBILITY GUIDANCE

- **Vaccines Required for School Attendance:** Any vaccines are available for uninsured high school students ages 19+ if the vaccine is required by Oregon law for school attendance. This includes vaccines not listed in the table above. Use the "O" vaccine eligibility code.
- **Vaccines for Hematopoietic Stem Cell Transplant Recipients:** Any vaccines required for transplant recipients are ok to use as 317-funded, as indicated in chapter 2 of the [Pink Book](#). This includes vaccines not listed in the table above. Use the "O" vaccine eligibility code.
- **Public Clinic/Agency Employees and Volunteers:** To qualify for 317-funded vaccine, public health clinic employees/volunteers must be without health insurance that covers vaccine costs and must be receiving a vaccine not required by OSHA (Employers must pay for OSHA required vaccines).
  - Workers/volunteers who meet those criteria and provide healthcare to clients routinely/daily are eligible for Hepatitis B, Varicella, MMR, and Tdap/Td.
  - Workers/volunteers who meet those criteria and work at a public clinic without patient contact are eligible only for Tdap/Td.
- **Vaccines for Leisure Travel:** Leisure travelers – including religious missionaries or civic volunteers – are not eligible for any 317-funded vaccines.
