FREE Ancillary Supplies!

The OHA Health Security, Preparedness and Response (OHA-HSPR) recently consolidated 50+ pallets of COVID ancillary supplies and separated them into brands and types. Supplies are available at **no cost**. Some lot numbers expire late 2025 and would be great to use now and save your current stock. There are also lot numbers that are good for 12 to 18 months. With the uncertainty of budgets, OHA-HSPR wants to help partners stretch their funds.

Supplies include (17 brands available):

- 1ml, 3ml & 5ml Luer Lock syringes
- 23g & 25g safety needles in 5/8", 1" & 1.5"
- Combo sets of syringes w/ needles in the sizes above

Interested? [Click Link to Order](#)

OHA-HSPR will work out specifics of how to get the supplies to you, including covering shipping for partners that are outside of the I-5 corridor.

Special Session: Measles, Chickenpox, Pertussis

April 24 | 1200-1300

Measles, Chickenpox, Pertussis! Oh My! Quickly Identifying Contagious Patients and Minimizing Exposures

Judith Guzman-Cottrill, DO

- the indications for cervical spine imaging after pediatric blunt trauma, and
- the indications for chest, abdomen, and pelvis imaging after pediatric blunt trauma.

Education sessions are recorded and posted on the [PRP Education page](#).

Research Study

Community EDs and critical access hospitals can join a research study that will leverage the Pediatric Disaster Checklist to examine strategies to improve pediatric surge planning. Upon completion of an interview and educational collaborative, participants will receive \$550 towards the purchase of pediatric-specific supplies. [Learn more](#)

Pediatric Education and Advocacy Kits

Pediatric Education and Advocacy Kits (PEAKs) are collections of best practice educational resources that are organized by audience type. There is a new PEAK for [Procedural Sedation](#). There are also PEAKs for the following:

[Status Epilepticus](#) | [Suicide](#) | [Pain](#) | [Agitation](#)
[Child Abuse](#) | [Multisystem Trauma](#)
