

## **Advanced Emergency Medical Technician (AEMT)**

A person must have an Emergency Medical Technician (EMT) license before being eligible to enroll in the AEMT course.

### **This course consists of:**

(1) A field internship is required as part of an AEMT course and shall include:

(a) Clinical experience performed under the supervision of a preceptor of at least eight hours and 20 patient contacts in a hospital emergency department or medical clinic where the skills within an AEMT scope of practice are performed under the supervision of a preceptor.

(b) Prehospital experience of at least eight hours under the supervision of an AEMT or above where the skills within the scope of practice of an AEMT are performed.

(2) A field internship must provide a student the opportunity to demonstrate the integration of didactic, psychomotor skills, and clinical education necessary to perform the duties of an entry-level AEMT.

(3) The student must successfully demonstrate a skill in the classroom lab or hospital clinical setting before that skill is performed and evaluated in a field internship.

(4) During a field internship a student must participate in providing care. All EMS calls shall be under the direct visual supervision of a preceptor. In order for a call to be accepted, the preceptor must document and verify satisfactory student performance, including application of specific assessment and treatment skills required of a licensed advanced EMT.

(5) For purposes of this section, "EMS call" means a prehospital emergency medical services response requiring patient care at the advanced life support level and "ambulance call" means an advanced life support prehospital emergency medical services response, which includes dispatch, scene response, patient care while riding in the patient compartment of an ambulance, and participating in specific assessment and treatment skills required of a licensed advanced EMT.
