CONTEST – WIN A PRIZE

Do you know the answer to this question? Which field in MOTS helps determine which outcome measures should apply to each client. The first three to respond will win a prize! Email mots.support@state.or.us.

Goodbye CPMS

The Client Process Monitoring System is going away. By now, all providers should have switched over to the new MOTS data system. If you haven't made the switch and need to register in MOTS, please call or email us..

We will no longer be accepting CPMS Enrollment forms after August 31st, unless specifically requested by CPMS support staff. CPMS Termination Forms will be permitted for a while longer, but remember that we can do administrative closures on CPMS clients that have been submitted to MOTS. Just let us know that you have all your active clients in MOTS, and we will close out your CPMS clients and your CPMS provider numbers.

Incentive Money

Community Mental Health Programs (CMHPs) and Tribes that submit the MOTS data and have all their subcontractors submitting the MOTS data by August 1st, 29th, will receive the MOTS Incentive Payment. The amount of the incentive payment is outlined in the April 25, 2014 letter from Dr. Pamela Martin, Director of Addictions and Mental Health (AMH). To find the letter and other helpful information about MOTS incentives, see: <http://www.oregon.gov/oha/amh/mots/Pages/FAQs.aspx>. Choose **Incentives** in the drop down list.

The date when MOTS data must be submitted has been extended. The new due date is August 29, 2014. Remember that to receive MOTS incentives, the CMHP and its subcontractors must have their active client caseload in MOTS AND the MOTS Incentive Payment Reporting Form must be received by amhcontract.administrator@state.or.us by August 29, 2014. So far, we have received MOTS Incentive Payment Reporting Forms from the following Counties/Tribes: Baker, Benton, Clatsop, Columbia, Crook, Deschutes, Gilliam/Wheeler/Morrow, Grant, Harney, Hood River / Sherman / Wasco, Jackson, Josephine, Lake, Lane, Polk, Umatilla (A&D only), Union, Wallowa, Yamhill, Siletz Tribe, Cow Creek Tribe, Klamath Tribes & Warm Springs. Questions can be directed to Janelle Jegglie (see contact information on the left).

**16
Days
to Go**

NEED THIS IN AN ALTERNATE FORMAT? PLEASE CALL 503-945-5763.

Assessment Only

When a person comes in to your clinic and you do an assessment and determine the person will not become one of your clients, use a Client Treatment Status of 'Assessment Only.'

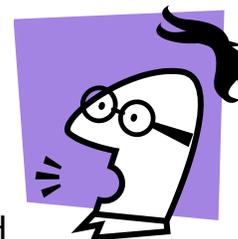

When a person comes in and you do the assessment and determine the person will become your client and receive treatment at your clinic, use Client Treatment Status 'Active.'

If the person is already your client and you are doing an assessment, leave the Client Treatment Status as 'Active.' Questions? Send them to mots.support@state.or.us

Thank you for reading this newsletter. If you have ideas or questions you want addressed in future newsletters, let me know – Piet Vermeer, 503-945-5960, piet.j.vermeer@state.or.us

Referral Codes:

We don't want you to be surprised, so we are letting you know again that effective July 1, 2014, the Referred To data field is required in MOTS. This is to ensure that AMH gets actual valid Referred To information.

We realize that not all clients receiving ongoing services will be referred to another facility, so in the Referred To field, "None" is acceptable.

Facilities using electronic data interchange (EDI), can use 35 (None), in the Referred To in the BHD, if necessary.

Client Entry (CE) Users: On and after July 1, 2014, if no Referred To value is identified, an error message will pop up indicating Referred To is a required field.

If you have already submitted client Behavioral Health Detail data without the Referred To information, the system will require you to submit a status update with the Referred To data the next time you open that client record.

EDI Submitters: All EDI files submitted on or after July 1, 2014 will require the Referred To data be included in field 16 in the BHD segment and field 4 of the MCD segment. This is specified in the MOTS Data Dictionary.

If you have previously submitted Behavioral Health Detail records without the data, you will need to include the Referred To information when you submit a status update for those records.

CE and EDI: Previously submitted Mental Health Crisis events cannot be updated. AMH will systematically add the value 'None' to any records that do not already have a value in the Referred To field.

If you have any questions, please direct them to MOTS.support@state.or.us. Thank you for your assistance in creating more useful data for reporting and measuring outcomes.
