ARIAS Release Notes: 08.07.2020 Amended

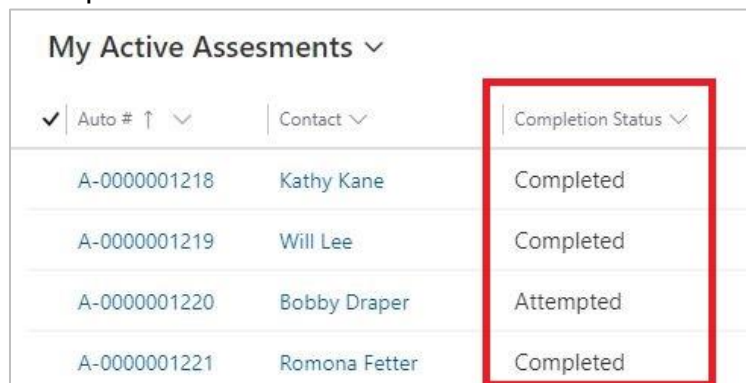

What's new:

New Languages Available for Automated Assessments

- Five new languages are now supported for both text and email automated assessments:
 - Korean
 - Russian
 - Vietnamese
 - Chinese (Cantonese)
 - Chinese (Mandarin)

Assessment Completion Status added to the Assessment List View

- A Completion Status has now been added to “My Active Assessments”.
- After an assessment is automatically generated, it will default as “Attempted”.
- When a contact opens and submits the assessment, it will change to “Completed”.

My Active Assesments ▾		
Auto # ↑ ▾	Contact ▾	Completion Status ▾
A-0000001218	Kathy Kane	Completed
A-0000001219	Will Lee	Completed
A-0000001220	Bobby Draper	Attempted
A-0000001221	Romona Fetter	Completed

"Agreement" field removed from the Assessments List View

- The field “Agreement” was removed from the Assessments List View to simplify the view.

Calculated Age Field

- An “Age” field was added below the “Date of Birth” field. The contact’s age is automatically calculated based on the “Date of Birth”.

Date of Birth (MM/DD/YYYY)	6/24/1990
Age (save required to calculate)	30

System List View added: "My Team's active contacts"

- This is a brand new system list view
- Fields are duplicate of the newly updated “My Active Contacts”, but with an addition of field: “Outbreak Related”
- Criteria is duplicate of the newly updated “My Active Contacts”

System List View change: “My Active Contacts”

Criteria changed **from**: “Owner = Me or My Team” **to** “Owner = Me”

System List View change: "My recently (48 hours) symptomatic contacts"

- Field Added: “Last Assessment Date”
- Fields Removed: "Place of Employment", "Occupation"

System List View change: "My active contacts without assessments"

- Renamed to: "My active contacts without recent assessments"
- Field Added: “Last Assessment Date”
- Fields Removed: "Place of Employment", "Occupation"
- Criteria changed **from**: “Owner = Me or My Team” **to** “Owner = Me”
- Criteria fixed: "Last Assessment Date = older than yesterday"

System List View change: "My active contacts with symptoms"

- Renamed to: "My contacts with symptoms"
- Field Added: “Last Assessment Date”
- Fields Removed: "Place of Employment", "Occupation"
- Criteria changed **from**: “Owner = Me or My Team” **to** “Owner = Me”

System List View change: "Active Contacts"

- Fields Added: "Date of Birth", "Jurisdiction", "Address"
- Field Removed: "Occupation"

System List View change: "Contacts Not Contacted"

- Fields Added: "Jurisdiction", "Owner", "County", "Status", "Monitoring Status"

System List View change: "All Contacts"

- Fields Added: "Jurisdiction", "Address: Street 1", "Date of Birth", "Language"
- Fields Removed: "Place of Employment", "Occupation"

System List View change: "My Contacts Not Contacted"

- Fields Added: "Mobile Phone", "Monitoring Status", "County", "Jurisdiction", "Owner"
- Criteria Added: "Status = Active"

System List View change: "All contacts symptomatic today"

- Fields Added: "Jurisdiction", "Last Assessment Date", "Address: Street 1"
- Fields Removed: "Place of Employment", "Occupation"

Bug Fixes:

End of Quarantine Date Changing

- Users were experiencing the End of Quarantine Date field changing based on different users accessing the same contact. This has now been fixed, the End of Quarantine Date will remain (Date of Last Exposure + 14 days), regardless of the user.

Merge Functionality is now Disabled

- Users were able to use the Merge function; this was a bug. Users should not have been able to merge contacts together. Merge has now been disabled for all users.
- For questions on what to do with duplicates, please consult the ARIAS User Guide and/or the ARIAS FAQ.
