

## CDC Pharmacy Partnership for Long-Term Care Program for COVID-19 Vaccination (adapted for Oregon 10/21/2020)

CDC is partnering with CVS and Walgreens to offer on-site COVID-19 vaccination services for residents of skilled nursing, assisted living, residential care, adult foster care and other community-based care facilities, such as group homes for people with intellectual and developmental disabilities, once vaccination is recommended for them.

The **Pharmacy Partnership for Long-term Care (LTC) Program** provides end-to-end management of the COVID-19 vaccination process, including cold chain management, on-site vaccinations, and fulfillment of reporting requirements, to facilitate safe vaccination of this patient population, while reducing burden on LTC facilities and jurisdictional health departments. The services will be available in rural areas that may not have easily accessible pharmacies. LTCF staff who have not received COVID-19 vaccine can also be vaccinated as part of the program.

As part of this program, which is free of charge to facilities, the pharmacy will:

- Schedule and coordinate on-site clinic date(s) directly with each facility. Three visits over approximately two months will likely be needed to administer both doses of vaccine and vaccinate any new residents and staff.
- Order vaccines and associated supplies (e.g., syringes, needles, personal protective equipment).
- Ensure cold chain management for vaccine.
- Provide on-site administration of vaccine.
- Report required vaccination data (approximately 20 data fields) to the local, state/territorial, and federal jurisdictions within 72 hours of administering each dose.
- Adhere to all applicable Centers for Medicare & Medicaid (CMS) COVID-19 testing requirements for LTCF staff.

If interested in participating, LTCFs should sign up (or opt out) starting October 19. Sign up will remain open for two weeks.

- Skilled nursing facilities (SNFs) will make their selection through the [National Healthcare Safety Network](#) (NHSN). An “alert” will be incorporated into the NHSN LTCF COVID-19 module to guide users to the form.
- Assisted living facilities (ALFs), residential care facilities, adult foster care homes, other community-based care facilities, such as group homes for people with intellectual and developmental disabilities, and those not already enrolled in the National Healthcare Safety Network will make their selection via an online [REDcap](#) (<https://redcap.link/lpcf>) sign-up form.
- Facilities will indicate which pharmacy partner (one of two large retail pharmacies or existing LTC pharmacy) they prefer to have on site.
- Online sign-up information will be distributed through SNF, ALF, residential care, adult foster care, and other community-based care partner communication channels (email, social media, web).
- Indicating interest in participating is non-binding and facilities may change their selection or opt in or out via email after the online survey closes.
- Facilities that do not opt in will need to have an alternate plan.

Once the sign-up period has closed, no changes can be made via the online form, and the facility must coordinate directly with the selected pharmacy provider to change any requested vaccination supplies and services.

CDC will communicate preferences to CVS and Walgreens and will try to honor facility preferences but may reassign facilities depending on vaccine availability and distribution considerations and to minimize vaccine wastage.

CDC expects the program services to continue on site at participating facilities for approximately two months. After the initial phase of vaccinations, each facility can choose to continue working with CVS or Walgreens or can work with a pharmacy provider of its choice.
