Welcome Readers

**Welcome to the Oregon Health Authority (OHA)
COVID-19 Therapeutics Newsletter!**

The purpose of this newsletter is for our team to stay connected with Oregon. We aim to keep you up to date on all things COVID-19 therapeutics, events, equity, inclusion, and provide additional resources. OHA is committed to equity and increasing access to COVID-19 treatments for Oregonians who need it.

COVID-19 Therapeutics Updates

The ***Test to Treat (T2T)*** program connects eligible people who are at high risk of severe COVID-19 to treatments. These locations provide access for people to get tested, receive a prescription from a healthcare provider, and fill that prescription, all at one place. The [Test to Treat \(T2T\) Locator](#) helps you find places that provide these services.

Please check the site often as sites continue to be added.

For additional support locating a *Test to Treat* site, call 1 (800) 232-0233 (TTY [1-888-720-7489](#)) to get help in English, Spanish, and more than 150 other languages.

The [COVID-19 Therapeutics Locator](#) was released by the federal government. It shows public locations near you that are receiving the available COVID-19 therapeutics. This locator is **only** intended as a guide to help when having conversations with your healthcare provider.

Please allow your healthcare provider to do all communications with these sites including checking on availability of therapeutics.

Please note, you must be evaluated by a healthcare provider to make sure you are eligible for these medicines.

Allocation Data

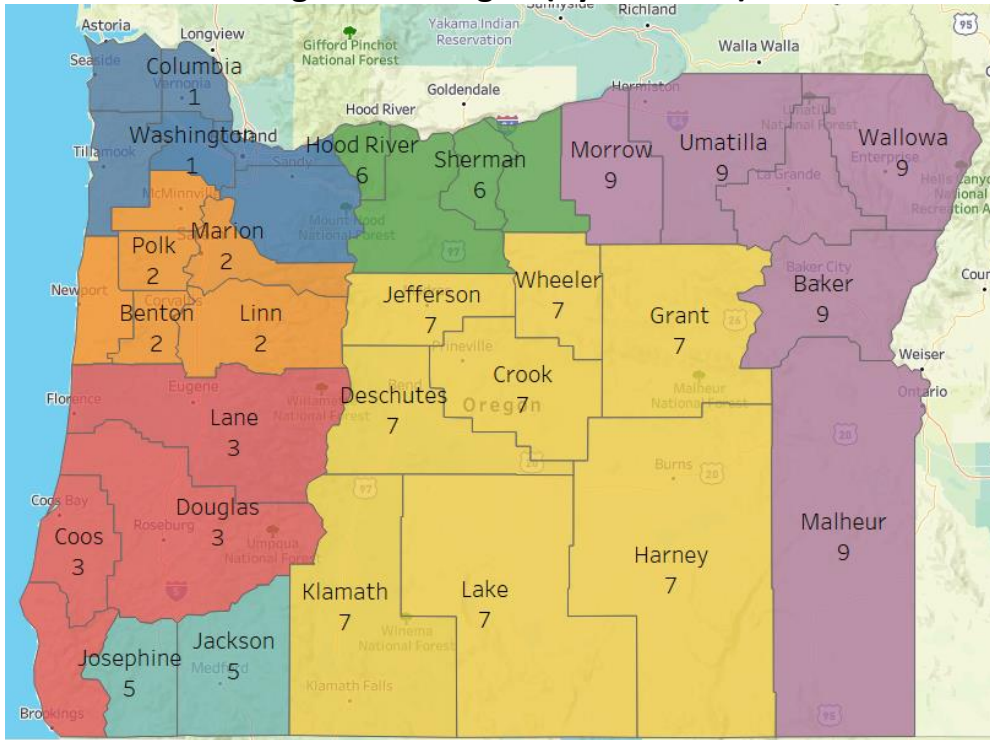

What is Allocation?

The federal government chooses how much COVID-19 therapeutics each state receives. OHA then decides which sites in Oregon receive product and how much.

Oregon is split into smaller regions that have counties within it. **The map** shows how Oregon is broken up and can give a better picture on how much therapeutics each region is receiving.

The table shows how many of each therapeutic OHA allocated to sites within the smaller regions in the last month. Please note that this **only** shows what OHA has allocated and **does not** include amounts provided to pharmacies by the federal government.

Regions in Oregon (By Counties)

Allocations by Region (05/01/2022 – 05/31/2022)

Monoclonal Antibodies (mAbs)	Region 1	Region 2	Region 3	Region 5	Region 6	Region 7	Region 9	Total
Bebtelovimab	360	205	240	180	20	415	65	1485
Evusheld*	696	144	168	168	24	72	24	1296
Total	1056	349	408	348	44	487	89	2781

* Evusheld is used to prevent COVID-19 infection in people who have moderate to severe immune compromise due to a medical condition or can't get the vaccine due to medical reasons

Antivirals	Region 1	Region 2	Region 3	Region 5	Region 6	Region 7	Region 9	Total
Lagevrio (molnupiravir)	264	24	120	0	0	0	0	408
Paxlovid	2940	1100	480	100	20	1080	0	5720
Renal Paxlovid	305	90	80	0	5	65	5	550
Total	3509	1214	680	100	25	1145	5	6678

The federal government requires all states to share certain information about treatment administration. Currently, they require information about allocations, distribution, and daily utilization. The federal government **does not**

require states to collect information about treatment administration based on race and ethnicity, therefore, OHA cannot provide this information.

Remdesivir is also a treatment of COVID-19 infection for adult and pediatric patients. Please note that this medication has commercial distribution and OHA do not allocate this medicine.
