

# COVID-19 Biweekly Report

Oregon’s Biweekly Surveillance Summary

## Biweekly Data Report - June 15, 2022

### This report has a new look!

Based on reader feedback, Oregon Health Authority (OHA) has made several changes to this report, including a revised Summary section, as well as several new tables and figures. The new summary includes two new sections, “Data Spotlight” and “Where are we now?”, which help put data in context and highlight timely information. Slight variations in numbers between this and previous reports reflect the continuous work to add and update COVID-19 records as new information becomes available to public health.

# COVID-19 Biweekly Report

Oregon's Biweekly Surveillance Summary

## May 29 – June 11 COVID-19 Summary

- There were 21,078 reported cases in the last two weeks, down from 22,172 cases in the previous two-week period.<sup>1</sup>
- Test positivity was 12.3% in the last two weeks, up from 12.1% in the previous two-week period.
- In the last two weeks, the statewide reported case rate was 494 per 100,000, and reported case rates were highest among the following age groups:
  - 596 cases per 100,000 (1,061 total cases) age 80+
  - 565 cases per 100,000 (3,349 total cases) age 30-39
  - 564 cases per 100,000 (3,107 total cases) age 20-29
- 3,466 cases (16.4% of all cases in the last two weeks) were children 17 years or younger.
- 3,871 cases (18.4% of all cases in the last two weeks) were 65 years or older.
- As of 11 p.m. Sunday, June 12, Oregon has seen:
  - 785,032 cases
  - 31,599 hospitalizations (4.0% of all reported cases)
  - 7,707 deaths (1.0% of all reported cases)

**Table 1. Recent COVID-19 cases, hospitalizations, and deaths**

	Counts (May 29-June 11)	Counts (May 15-28)	Percent Change (%)
Cases	21,078	22,172	-5
Hospitalizations	343	489	-30
Deaths	37	41	-10

<sup>1</sup> OHA continuously updates information on COVID-19 cases as new information becomes available. This may lead to slight variations in case counts compared to previous reports.

# COVID-19 Biweekly Report

Oregon's Biweekly Surveillance Summary

1. Cases are counted using the date that the case was reported to public health. Hospitalizations are counted using date of hospital admission. Deaths are counted using date of death. Due to delays in case ascertainment, these data are subject to change.
2. Percent change during May 29-June 11 compared to May 15-28.

## Where are we now?

COVID-19 levels in the state appear to be leveling. From Sunday, May 29 through Saturday, June 11, 2022, total reported cases declined slightly, down 5% from the previous two-week period (Sunday, May 15 – Saturday, May 28, 2022). Hospitalizations and deaths also decreased, 30% and 10% respectively, compared with the previous two-week period. While this is positive news, we assume these numbers are an undercount of the actual number of cases because we know many people are using at-home tests and not reporting the results or not getting tested.

OHA continues to track COVID-19 hospitalizations daily and support our state's hospital systems. The good news is fewer people are getting seriously ill with COVID-19 now than during our previous surges. Data on COVID-19 cases, hospitalizations, and deaths in Oregon are updated daily at:

<https://public.tableau.com/app/profile/oregon.health.authority.covid.19/viz/OregonCOVID-19Update/DailyDataUpdate>.

Trends tell us people are still getting sick. In the June 9 Centers for Disease Control and Prevention (CDC) COVID-19 Community Levels update, three Oregon counties were in the high level - Douglas, Lane, and Jackson ([www.cdc.gov/coronavirus/2019-ncov/your-health/covid-by-county.html](http://www.cdc.gov/coronavirus/2019-ncov/your-health/covid-by-county.html)). Nineteen Oregon counties – Baker, Benton, Clackamas, Columbia, Coos, Crook, Curry, Deschutes, Grant, Hood River, Josephine, Malheur, Multnomah, Polk, Union, Wallowa, Wasco, Washington, and Wheeler – were in the medium COVID-19 Community Level. All other Oregon counties were in the low COVID-19 Community Level at the time.

CDC recommends that people in counties in all levels stay up to date with COVID-19 vaccines and get tested if symptomatic.

CDC also recommends that people who live in counties in the medium Community Level and who are at high risk for severe illness:

# COVID-19 Biweekly Report

Oregon's Biweekly Surveillance Summary

- discuss with their health care provider whether they should consider wearing a mask and taking additional precautions to prevent infection.

Additionally, CDC recommends that people who live in counties in the high Community Level:

- wear a mask indoors in public
- those at high risk for severe illness may need to take additional precautions.

More information about COVID-19 Community Levels can be found at: [www.cdc.gov/coronavirus/2019-ncov/your-health/covid-by-county.html](https://www.cdc.gov/coronavirus/2019-ncov/your-health/covid-by-county.html).

You can learn more about how to use COVID-19 data in making personal decisions and risk assessments here: <https://covidblog.oregon.gov/how-to-use-regional-covid-19-data-to-make-decisions-about-day-to-day-life>.

In addition, the Pfizer-BioNTech vaccine for children 6 months to 5 years and the Moderna vaccine for children 6 months to under 6 years will complete their review by June 18, 2022. If authorized, the Pfizer and Moderna vaccines for youngest children could be available as early as June 20 through providers who are open on the Juneteenth federal and state holiday, celebrated on June 20, 2022. For more information on vaccine eligibility visit: <https://www.cdc.gov/coronavirus/2019-ncov/vaccines/recommendations/specific-groups.html>.

For additional information to help you or your family, see “Additional Information and Available Resources” at the end of this report.

## Data Spotlight – COVID-19 Variants

As of June 11, 2022, a total of 12,153 cases of COVID-19 caused by the Omicron (B.1.1.529, BA.1, BA.3) variant; 2,473 cases caused by the Omicron (BA.2) variant; 534 cases caused by the Omicron (BA.2.12.1) variant; 27 cases caused by the Omicron (BA.4) variant; and 14 cases of the Omicron (BA.5) variant have been reported to OHA in Oregon.

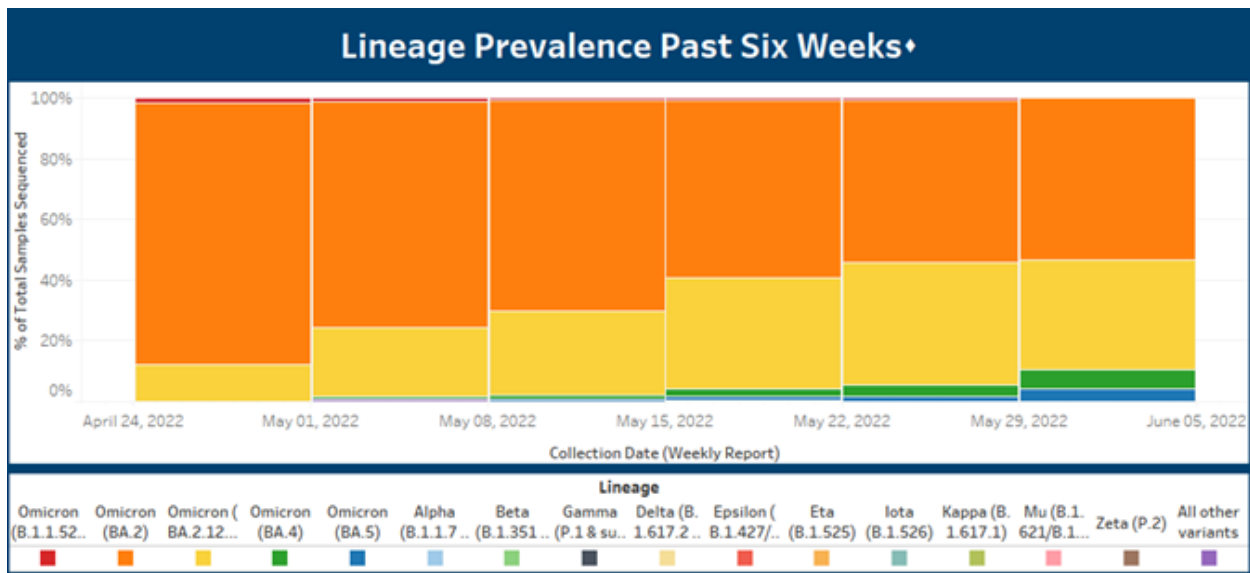

Only a small percentage of positive COVID-19 specimens collected in Oregon undergo genetic sequencing to identify variants. As of the current report, approximately 6.9% of all positive specimens have been sequenced. Since the week of March 20, 2022, the BA.2 variant has been the dominant variant in Oregon.

# COVID-19 Biweekly Report

Oregon's Biweekly Surveillance Summary

During the week of May 29, 25 out of 47 (53.19%) total samples sequenced in Oregon were classified as the Omicron (BA.2) variant, 17 (36.17%) were classified as the Omicron (BA.2.12.1) variant, 3 (6.38%) were classified as the Omicron (BA.4) variant, and 2 (4.26%) were classified as the Omicron (BA.5) variant. However, this estimate is likely not representative of the true prevalence of the Omicron (BA.2), Omicron (BA.2.12.1), Omicron (BA.4), and Omicron (BA.5) variants in Oregon due to small sample size. The true prevalence of these variants in Oregon is likely closer to the CDC's COVID-19 Data Tracker Nowcast model national estimates: 64.2% Omicron BA.2.12.1, 14.2% Omicron BA.2, 13.3% BA.5, and 8.3% BA.4 (<https://covid.cdc.gov/covid-data-tracker/#variant-proportions>).

Additional information about COVID-19 variants in Oregon can be found on the OHA Variant Dashboard: <https://public.tableau.com/app/profile/oregon.health.authority.covid.19/viz/GISAIDVariantDashboardUpdated/OregonVariantDashboard>.

More information about COVID-19 variants in the United States can be found at: <https://covid.cdc.gov/covid-data-tracker/#variant-proportions>.

Oregon's Biweekly Surveillance Summary

## Full Biweekly Data Report

### Background

The COVID-19 Biweekly Report includes data from the most recent two weeks, and it will be published every two weeks. Please note that the data reported here are continually being updated. For information updated daily, visit the OHA COVID-19 web page: <https://govstatus.egov.com/OR-OHA-COVID-19>.

### Demographics

The following tables and figures show the demographic characteristics for all reported COVID-19 cases in the last 6 months.<sup>2</sup> The tables show case counts, case rates, and indicators of severity by sex, age, race and ethnicity. The figures show cases over time, by week of onset, for sex, age, race, and ethnicity.

### Geography

The following figures show case rates by county during May 29 - June 11, 2022. Cases are counted according to the date on which the case became known to public health. Figure 1 displays case rates by county, in comparison to the case rate for all of Oregon and the United States. Figure 2 uses a map to represent county-level case rate data.

---

<sup>2</sup> All tables and figures in this report referencing the last 6 months include data from December 12, 2021, to June 11, 2022.

# COVID-19 Biweekly Report

Oregon's Biweekly Surveillance Summary

**Figure 1. Case rates per 100,000 residents by county compared to state and U.S., May 29 - June 11, 2022**

1. Counties that had case rates above the case rate for the state are displayed in orange. Counties that had case rates below the case rate for the state are displayed in blue.
2. Counties that had zero cases in the time period displayed appear on the list, but do not have a bar to display.

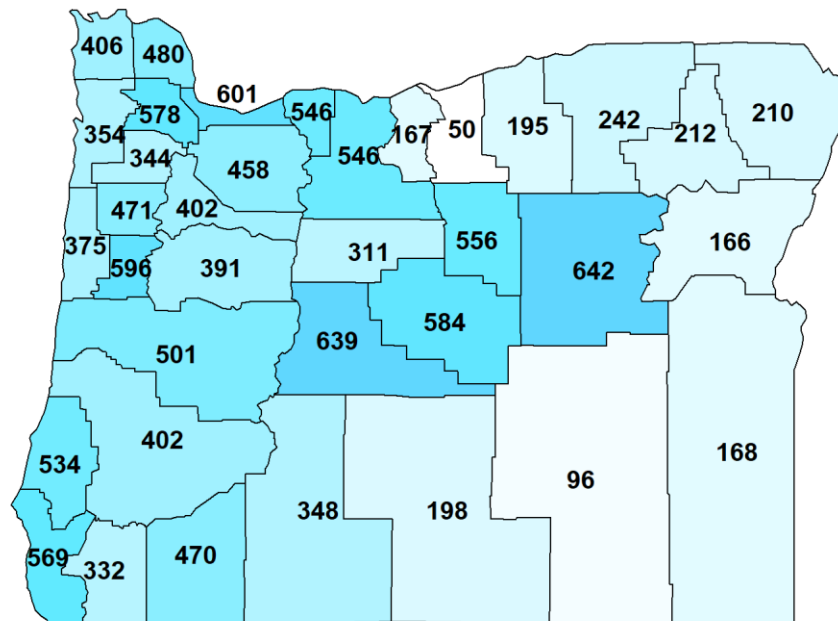

# COVID-19 Biweekly Report

Oregon's Biweekly Surveillance Summary

3. United States rates are calculated using data from the CDC COVID-19 Data Tracker. These data are available at [https://covid.cdc.gov/covid-data-tracker/#trends\\_dailycases](https://covid.cdc.gov/covid-data-tracker/#trends_dailycases).
4. Additional data are available at <https://public.tableau.com/app/profile/oregon.health.authority.covid.19/viz/Oregon-COVID-19TestingandOutcomesbyCounty/OregonsCOVID-19TestingandOutcomesbyCounty>.

## Age-adjustment

Tables 6 and 7 show the ratio of age-adjusted rates of COVID-19 for cases, hospitalizations, and deaths by race and ethnicity. Each table compares the rates of cases, hospitalizations, and deaths between each group and a reference group and accounts for differences in population distributions in each group.

# COVID-19 Biweekly Report

Oregon's Biweekly Surveillance Summary

**Table 6. Ratio of age-adjusted rates for cases, hospitalizations, and deaths by race**

Age-adjusted rate ratios of cases, hospitalizations, and deaths, compared to white persons.

Race	Cases	Hospitalizations	Deaths
> 1 race	0.6	0.7	0.8
American Indian/Alaska Native	2.0	2.6	2.8
Asian	1.0	0.9	0.8
Black	1.8	2.9	2.1
Pacific Islander	1.4	4.0	4.0
White	1.0	1.0	1.0

1. People are asked to self-report their race, ethnicity, tribal affiliation, country of origin, or ancestry.
2. U.S. Census Bureau; American Community Survey, 2019 American Community Survey 5-Year Estimates.
3. Persons for whom race information was not available were not included in these estimates. The number of persons with race data unavailable can be found in Tables 4a and 4b.
4. Additional data are available at <https://www.oregon.gov/oha/covid19/Documents/DataReports/Age-Adjusted-Report-02-17-2022.pdf>.

**Table 7. Ratio of age-adjusted rates for cases, hospitalizations, and deaths by ethnicity**

Age-adjusted rate ratios of cases, hospitalizations, and deaths, compared to non-Hispanic.

Ethnicity	Cases	Hospitalizations	Deaths
Hispanic	1.5	2.1	1.8
Non-Hispanic	1.0	1.0	1.0

## People with Intellectual and Developmental Disabilities

As of June 6, 2022, OHA is aware of 4,655 people with intellectual or developmental disabilities who have had COVID-19 to date. This includes individuals who live in congregate settings and in family or individual homes. To date, there are 62 deaths among people with intellectual or developmental disabilities. This number is from conducting a match between the Oregon Department of Human Services Office of Developmental Disabilities Services (ODDS) client list and the Oregon COVID-19 case database. OHA will update this number on a quarterly basis.

Additional information about the ODDS program and COVID-19 can be found here: <https://www.oregon.gov/dhs/SENIORS-DISABILITIES/DD/ODDS%20Resource%20Library/ODDS-Residential-COVID-19-Report.pdf>.

ODDS data are based on self-reports from providers and case management entities and therefore may differ from testing data received from OHA.

## Weekly COVID-19 Hospitalizations (HOSCAP)

OHA is publishing data on the number of COVID-19 hospitalizations by hospital in the prior week; data are from HOSCAP. Maps and tables containing the 7-day average of hospitalizations by region and hospital are available online at: <https://public.tableau.com/app/profile/oregon.health.authority.covid.19/viz/OregonCOVID-19HospitalCapacity/HospitalizationbyFacility>.

# COVID-19 Biweekly Report

Oregon's Biweekly Surveillance Summary

Information on Oregon's current hospital bed capacity by region is available online at: <https://public.tableau.com/app/profile/oregon.health.authority.covid.19/viz/OregonCOVID-19HospitalCapacity/BedAvailabilitybyRegion>.

## ZIP code

OHA publishes data on cases by ZIP code, available online at:

<https://public.tableau.com/profile/oregon.health.authority.covid.19#!/vizhome/OregonCOVID-19CasesbyZIPCode/OregonsCOVID-19CasesbyZipCode>.

Summary table of all zip codes available here:

<https://public.tableau.com/profile/oregon.health.authority.covid.19#!/vizhome/OregonCOVID-19CasesbyZIPCode-SummaryTable/CasesbyZIPCodeSummaryTable>.

## Report Limitations

These data represent a snapshot of reported COVID-19 cases, and they include data on cases with pending investigations. The data shown in this report come from Oregon's electronic reportable disease surveillance system. Not all reported cases have been interviewed. In January 2022, public health case investigation and contact tracing operations were changed to prioritize responding to outbreaks in high-consequence settings, such as healthcare, congregate care (e.g., nursing homes), carceral settings, and settings related to our food chain. Public health is no longer calling all cases to attempt interview to assess hospitalization status, symptoms and risks.

## Additional Information & Available Resources

Vaccination is the best way to prevent infection and transmission of COVID-19. For more information about COVID-19 vaccines, including frequently asked questions and where to find a vaccination site, visit: [www.safestrongoregon.org](http://www.safestrongoregon.org). Persons 5 years of age or older who completed their COVID-19 vaccine primary series at least 5 months ago are recommended to get a booster. Persons who received a first booster dose at least 4 months ago are eligible for a 2nd booster if they meet the following criteria:

- 50 years of age or older
- 12 years of age or older and moderately or severely immunocompromised
- 18 years of age or older and received 2 doses of J&J (Janssen) vaccine.

For more information about COVID-19 vaccine booster eligibility, visit: [www.cdc.gov/coronavirus/2019-ncov/vaccines/booster-shot.html](http://www.cdc.gov/coronavirus/2019-ncov/vaccines/booster-shot.html) and <https://govstatus.egov.com/or-oha-booster-covid-19-vaccine>.

## **How do I find a COVID-19 vaccine or booster?**

Visit <https://www.safestrongoregon.org>.

## **Where can I find a COVID-19 testing site?**

Visit <https://govstatus.egov.com/or-oha-covid-19-testing>.

## **What should I do if I or a member of my household was exposed or test positive for COVID-19?**

Visit <https://govstatus.egov.com/or-oha-covid-19-positive-test>.

Call 866-917-8881 toll free or text OHACOVID to 61222 if you test positive.

Let public health know about your symptoms or positive test with this quick online survey: <https://redcap.oha.oregon.gov/surveys/?s=JKHYT7EA99WEJPW9>.

## **How can I get treatment to prevent severe symptoms of COVID-19?**

Treatment for COVID-19 is now widely available. Many effective treatments exist, and most work best if taken within 5 days of onset. Find treatment options for yourself and others at: <https://govstatus.egov.com/or-oha-covid-19-treatments>.

## **Who can I talk to if I need help?**

Dial 2-1-1 for help with testing, vaccines, or general questions. You may also be able to find assistance covering COVID-19-related expenses through your local county public health department.

## **What other COVID-19 data are available?**

Data on mortality in Oregon, including deaths associated with COVID-19 are available at <https://public.tableau.com/app/profile/oha.center.for.health.statistics>.

Additional data on age and disease severity of people diagnosed with COVID-19 are available at <https://public.tableau.com/app/profile/oregon.health.authority.covid.19/viz/OregonCOVID-19CaseDemographicsandDiseaseSeverityStatewide/DiseaseSeverity>.
