

COVID-19 Biweekly Report

Oregon's Biweekly Surveillance Summary

Biweekly Data Report - June 29, 2022

Updates to population data

Starting today, the Oregon Health Authority (OHA) updated rates published in COVID-19 reports using 2021 population data from Portland State University's (PSU) Population Research Center and 2020 data from the U.S. Census Bureau's American Community Survey (ACS). These changes affect case rates by sex, age, race, ethnicity, and county in the Biweekly Data Report. OHA had previously been using 2020 population data from PSU and 2019 data from the ACS to calculate case rates.

COVID-19 Biweekly Report

Oregon's Biweekly Surveillance Summary

June 12-25 COVID-19 Summary

- There were 20,451 reported cases in the last two weeks, down 2.8% from 21,038 cases in the previous two-week period.¹
- Test positivity was 13.6% in the last two weeks, up from 12.3% in the previous two-week period.
- In the last two weeks, the statewide reported case rate was 479 per 100,000, and reported case rates were highest among the following age groups:
 - 585 cases per 100,000 (1,053 total cases) age 80+
 - 574 cases per 100,000 (3,224 total cases) age 20-29
 - 559 cases per 100,000 (3,406 total cases) age 30-39
- 2,903 cases (14.2% of all cases in the last two weeks; 337.2 cases per 100,000) were children 17 years or younger.
- 3,988 cases (19.5% of all cases in the last two weeks; 492.7 cases per 100,000) were people 65 years or older.
- To date, Oregon has seen:
 - 805,979 cases
 - 32,173 hospitalizations (4.0% of all reported cases)
 - 7,791 deaths (1.0% of all reported cases)

Table 1. Recent COVID-19 cases, hospitalizations, and deaths

	Counts (May 15-28)	Counts (May 29-June 11)	Counts (June 12-25)
Cases	22,165	21,038	20,451
Hospitalizations	497	516	365

¹ OHA continuously updates information on COVID-19 cases as new information becomes available. This may lead to slight variations in case counts compared to previous reports.

COVID-19 Biweekly Report

Oregon's Biweekly Surveillance Summary

	Counts (May 15-28)	Counts (May 29-June 11)	Counts (June 12-25)
Deaths	55	68	24

1. Cases are counted using the date that the case was reported to public health. Hospitalizations are counted using date of hospital admission. Deaths are counted using date of death. Due to delays in case ascertainment, these data are subject to change.
2. Hospitalizations and deaths from the most recent time period may not yet be reported.

Where are we now?

From Sunday, June 12 through Saturday, June 25, 2022, total reported cases declined slightly, down 2.8% from the previous two-week period (Sunday, May 29 – Saturday, June 11, 2022). Over the last six weeks, reported hospitalizations and deaths have increased slightly. While the most recent two-week period of data shows a decline, this is likely due to the lag in reporting between when an individual is admitted to the hospital or dies and when that data appears in the report. Case numbers are assumed to be an undercount of the actual number of cases given that many people are not getting tested or are using at-home tests and not reporting the results.

OHA continues to track COVID-19 hospitalizations daily and support our state's hospital systems. The good news is that fewer people are getting seriously ill with COVID-19 now than during our previous surges. Data on COVID-19 cases, hospitalizations, and deaths in Oregon are updated daily at:

<https://public.tableau.com/app/profile/oregon.health.authority.covid.19/viz/OregonCOVID-19Update/DailyDataUpdate>.

Trends tell us people are still getting sick. In the June 23 Centers for Disease Control and Prevention (CDC) COVID-19 Community Levels update, nine Oregon counties were in the “high” level: Coos, Douglas, Hood River, Jackson, Klamath, Lake, Lane, Sherman and Wasco (www.cdc.gov/coronavirus/2019-ncov/your-health/covid-by-county.html). Eighteen Oregon counties – Baker, Benton, Clackamas, Crook, Curry, Deschutes, Gilliam, Jefferson, Josephine, Linn, Marion, Morrow, Multnomah, Polk, Tillamook, Union, Wallowa, and Washington – were in the “medium” COVID-19 Community Level. All other Oregon counties were in the “low” COVID-19 Community Level at the time.

COVID-19 Biweekly Report

Oregon's Biweekly Surveillance Summary

Recommendations for Oregon residents based on their county COVID-19 Community Level can be found at: www.cdc.gov/coronavirus/2019-ncov/your-health/covid-by-county.html.

You can learn more about how to use COVID-19 data in making personal decisions and risk assessments here: <https://covidblog.oregon.gov/how-to-use-regional-covid-19-data-to-make-decisions-about-day-to-day-life>.

COVID-19 Vaccine News

The U.S. Food and Drug Administration (FDA) recently expanded authorization for use of the Pfizer-BioNTech and Moderna COVID-19 vaccines:

- The Pfizer-BioNTech vaccine was authorized for use as a 3-dose series in children 6 months through 4 years of age
- The Moderna vaccine was authorized for use as a 2-dose series in children 6 months through 17 years of age.

Pfizer and Moderna vaccines are now available in Oregon for these age groups. For more information on vaccine eligibility visit: <https://www.cdc.gov/coronavirus/2019-ncov/vaccines/recommendations/specific-groups.html>.

For additional information to help you or your family, see “Additional Information and Available Resources” at the end of this report.

Data Spotlight: Pediatric COVID-19 Cases & Vaccination

As of June 29, 2022, there have been a total of 141,606 reported cases of COVID-19 with disease onset through June 25, 2022 in Oregon's pediatric population (people under age 18). Pediatric cases make up 17.5% of the 809,338 total reported cases in Oregon and the pediatric population makes up 20.2% of the total population. Of all pediatric COVID-19 cases, 0.6% (874) are known to have been hospitalized compared with 4.0% of all reported cases. There have been 9 reported pediatric deaths with COVID-19.

From June 12-25, 2022, there were 2,553 cases in pediatric persons; making up 12.8% of all cases in that time period. Of the reported pediatric cases in that time, 18 (0.7%) have been hospitalized and none died.

COVID-19 Biweekly Report

Oregon's Biweekly Surveillance Summary

The [Oregon COVID-19 Pediatric Report Dashboard](#), updated weekly on Wednesdays, provides additional information on pediatric cases by race, ethnicity, age group, severity and county:

<https://public.tableau.com/app/profile/oregon.health.authority.covid.19/viz/OregonCOVID-19PediatricReport/Demographics>.

Recent pediatric COVID-19 case rates have been highest among people age 0 to 4 years

The chart below shows the rate of pediatric cases per 100,000 by week of onset and age group, in years. Illnesses that began in the last two weeks may not yet be reported.

While COVID-19 is often milder in children than in adults, some children do get seriously ill and are hospitalized. Vaccination offers the best and safest protection for children against severe disease. As of June 17, 2022, both vaccines were authorized for use in children as young as 6 months of age. For more information on vaccine eligibility visit: <https://www.cdc.gov/coronavirus/2019-ncov/vaccines/recommendations/specific-groups.html>.

Parents, guardians, and people under 18 can learn more about vaccination here: <https://govstatus.egov.com/or-oha-covid-19-vaccine-parents-guardians>.

Additional information on COVID-19 vaccines for children under 5 can be found in this recent blog post: <https://covidblog.oregon.gov/fda-panel-recommends-covid-19-vaccines-for-children-under-age-5/>.

COVID-19 Biweekly Report

Oregon's Biweekly Surveillance Summary

Biweekly Data Report

Background

The COVID-19 Biweekly Report includes data from the most recent two weeks, and it will be published every two weeks. Please note that the data reported here are continually updated. For information updated daily, visit the OHA COVID-19 web page: <https://govstatus.egov.com/OR-OHA-COVID-19>.

Demographics

The following tables and figures show the demographic characteristics for all reported COVID-19 cases in the last 6 months.² The tables show case counts, case rates, and indicators of severity by sex, age, race, and ethnicity. The figures show cases over time, by week of onset, for sex, age, race, and ethnicity.

Geography

The following figures show case rates by county during June 12-25, 2022. Cases are counted according to the date on which the case became known to public health. Figure 1 displays case rates by county, in comparison to the case rate for all of Oregon and the United States. Figure 2 uses a map to represent county-level case rate data.

² All tables and figures in this report referencing the last 6 months include data from December 26, 2021, to June 25, 2022.

COVID-19 Biweekly Report

Oregon's Biweekly Surveillance Summary

Figure 1. Case rates per 100,000 residents by county compared to state and U.S., June 12 - 25, 2022

1. Counties that had case rates above the case rate for the state are displayed in orange. Counties that had case rates below the case rate for the state are displayed in blue.
2. Counties that had zero cases in the time period displayed appear on the list, but do not have a bar to display.

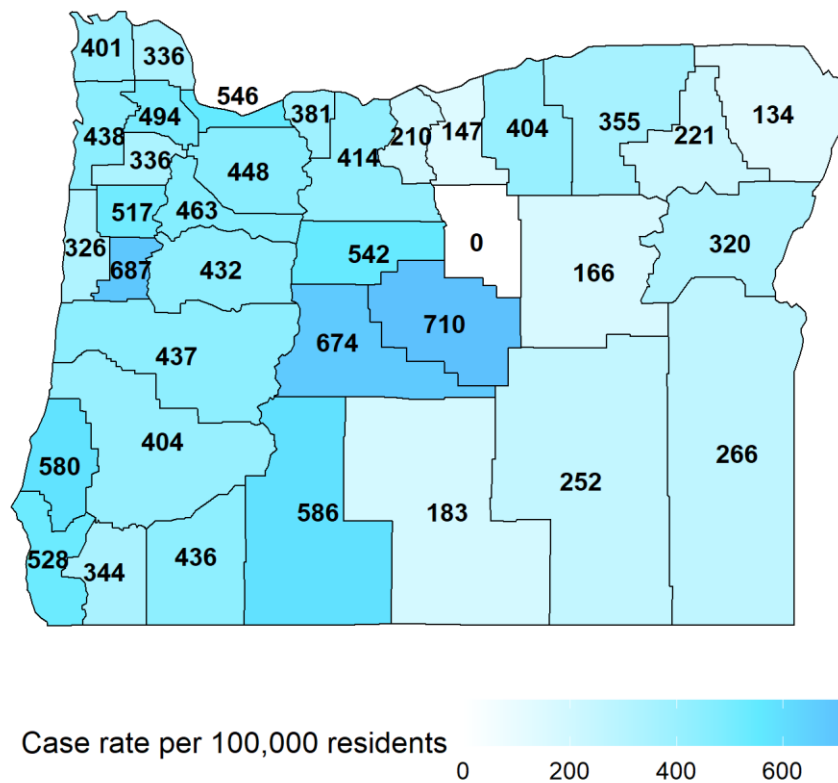

COVID-19 Biweekly Report

Oregon's Biweekly Surveillance Summary

3. United States rates are calculated using data from the CDC COVID-19 Data Tracker. These data are available at https://covid.cdc.gov/covid-data-tracker/#trends_dailycases.
4. Additional data are available at <https://public.tableau.com/app/profile/oregon.health.authority.covid.19/viz/Oregon-COVID-19TestingandOutcomesbyCounty/OregonsCOVID-19TestingandOutcomesbyCounty>.

People with Intellectual and Developmental Disabilities

As of June 6, 2022, OHA is aware of 4,655 people with intellectual or developmental disabilities who have had COVID-19 to date. This includes individuals who live in congregate settings and in family or individual homes. To date, there are 62 deaths among people with intellectual or developmental disabilities. This number is from conducting a match between the Oregon Department of Human Services Office of Developmental Disabilities Services (ODDS) client list and the Oregon COVID-19 case database. OHA will update this number on a quarterly basis.

Additional information about the ODDS program and COVID-19 can be found here: <https://www.oregon.gov/dhs/SENIORS-DISABILITIES/DD/ODDS%20Resource%20Library/ODDS-Residential-COVID-19-Report.pdf>.

ODDS data are based on self-reports from providers and case management entities and therefore may differ from testing data received from OHA.

Weekly COVID-19 Hospitalizations (HOSCAP)

OHA is publishing data on the number of COVID-19 hospitalizations by hospital in the prior week; data are from HOSCAP. Maps and tables containing the 7-day average of hospitalizations by region and hospital are available online at:

Report Limitations

These data represent a snapshot of reported COVID-19 cases, and they include data on cases with pending investigations. The data shown in this report come from Oregon's electronic reportable disease surveillance system. Not all reported cases have been interviewed. In January 2022, public health case investigation and contact tracing operations were changed to prioritize responding to outbreaks in high-consequence settings, such as healthcare, congregate care (e.g., nursing homes), carceral settings, and settings related to our food chain. Public health is no longer calling all cases to attempt interview to assess hospitalization status, symptoms and risks.

Additional Information & Available Resources

Vaccination is the best way to prevent infection and transmission of COVID-19. For more information about COVID-19 vaccines, including frequently asked questions and where to find a vaccination site, visit: www.safestrongoregon.org. Persons 5 years of age or older who completed their COVID-19 vaccine primary series at least 5 months ago are recommended to get a booster. Persons who received a first booster dose at least 4 months ago are eligible for a 2nd booster if they meet the following criteria:

- 50 years of age or older

COVID-19 Biweekly Report

Oregon's Biweekly Surveillance Summary

- 12 years of age or older and moderately or severely immunocompromised
- 18 years of age or older and received 2 doses of J&J (Janssen) vaccine.

For more information about COVID-19 vaccine booster eligibility, visit: www.cdc.gov/coronavirus/2019-ncov/vaccines/booster-shot.html and <https://govstatus.egov.com/or-oha-booster-covid-19-vaccine>.

How do I find a COVID-19 vaccine or booster?

Visit <https://www.safestrongoregon.org>.

Where can I find a COVID-19 testing site?

Visit <https://govstatus.egov.com/or-oha-covid-19-testing>.

What should I do if I or a member of my household was exposed or test positive for COVID-19?

Visit <https://govstatus.egov.com/or-oha-covid-19-positive-test>.

Call 866-917-8881 toll free or text OHACOVID to 61222 if you test positive.

Let public health know about your symptoms or positive test with this quick online survey: <https://redcap.oha.oregon.gov/surveys/?s=JKHYT7EA99WEJPW9>.

How can I get treatment to prevent severe symptoms of COVID-19?

Treatment for COVID-19 is now widely available. Many effective treatments exist, and most work best if taken within 5 days of onset. Find treatment options for yourself and others at: <https://govstatus.egov.com/or-oha-covid-19-treatments>.

Who can I talk to if I need help?

Dial 2-1-1 for help with testing, vaccines, or general questions. You may also be able to find assistance covering COVID-19-related expenses through your local county public health department.

What other COVID-19 data are available?

Data on mortality in Oregon, including deaths associated with COVID-19 are available at <https://public.tableau.com/app/profile/oha.center.for.health.statistics>.
