COVID-19 Biweekly Report

Oregon's Biweekly Data Report

August 7-20 COVID-19 Summary

- There were 11,612 reported cases in the last two weeks, down 26% from 15,686 cases in the previous two-week period.¹
- Test positivity was 10.9% in the last two weeks, down from 13.0% in the previous two-week period.
- In the last two weeks, the statewide reported case rate was 272.2 per 100,000, and reported case rates were highest among the following age groups:
 - 512 cases per 100,000 (922 total cases) age 80+
 - 374 cases per 100,000 (1,387 total cases) age 70-79
 - 290 cases per 100,000 (1,763 total cases) age 30-39
- 1,191 cases (10.3% of all cases in the last two weeks; 138 cases per 100,000) were children 17 years or younger.
- 3,038 cases (26.2% of all cases in the last two weeks; 375 cases per 100,000) were people 65 years or older.
- To date, Oregon has seen:
 - 872,287 cases
 - 34,653 hospitalizations (4.0% of all reported cases)
 - 8,354 deaths (1.0% of all reported cases)

¹ OHA continuously updates information on COVID-19 cases as new information becomes available. This may lead to slight variations in case counts compared to previous reports.

COVID-19 Biweekly Report

Oregon's Biweekly Data Report

Table 1. Recent COVID-19 cases, hospitalizations, and deaths

	Counts (July 10-23)	Counts (July 24-August 6)	Counts (August 7-20)
Cases	18,562	15,686	11,612
Hospitalizations	622	580	284
Deaths	113	74	36

1. Cases are counted using the date that the case was reported to public health. Hospitalizations are counted using date of hospital admission. Deaths are counted using date of death. Due to delays in case ascertainment, these data are subject to change.
2. Hospitalizations and deaths from the most recent time period may not yet be reported.

Where are we now?

Oregon is experiencing a decline in community transmission of COVID-19. Test positivity has declined from two weeks ago but remains elevated at 10.9%. The numbers of COVID+ patients in hospital and in intensive care rose steadily from mid-April to mid-July, straining Oregon's hospitals and health care workers. Reported COVID-19-associated hospitalizations continue to decline from a recent high of 464 on July 17 to 328 on August 17. Hospitals and health care workers continue to feel the stress of these elevated hospitalization levels. Reported deaths continued to decline over the last six weeks. Some of the decline in the last two weeks is due to the lag between when the person died and when their death is reported to public health. As school begins and fall weather means people spending more time indoors, individuals are encouraged to get up to date with their COVID-19 vaccine to protect themselves and loved ones.

Data on reported COVID-19 cases, hospitalizations, and deaths in Oregon are updated daily at:

<https://public.tableau.com/app/profile/oregon.health.authority.covid.19/viz/OregonCOVID-19Update/DailyDataUpdate>.

In the August 18 Centers for Disease Control and Prevention (CDC) COVID-19 Community Levels update, 2 Oregon counties were in the "high" level: Malheur and

COVID-19 Biweekly Report

Morrow (www.cdc.gov/coronavirus/2019-ncov/your-health/covid-by-county.html). Fourteen Oregon counties –Tillamook, Gilliam, Umatilla, Union, Wallowa, Baker, Lincoln, Jefferson, Deschutes, Coos, Curry, Klamath, Lake, Harney were in the “medium” COVID-19 Community Level. The remaining Oregon counties were in the “low” COVID-19 Community Level.

Recommendations for Oregon residents based on their county COVID-19 Community Level can be found at: www.cdc.gov/coronavirus/2019-ncov/your-health/covid-by-county.html.

You can learn more about how to use COVID-19 data in making personal decisions and risk assessments here: <https://covidblog.oregon.gov/how-to-use-regional-covid-19-data-to-make-decisions-about-day-to-day-life>.

COVID-19 Biweekly Report

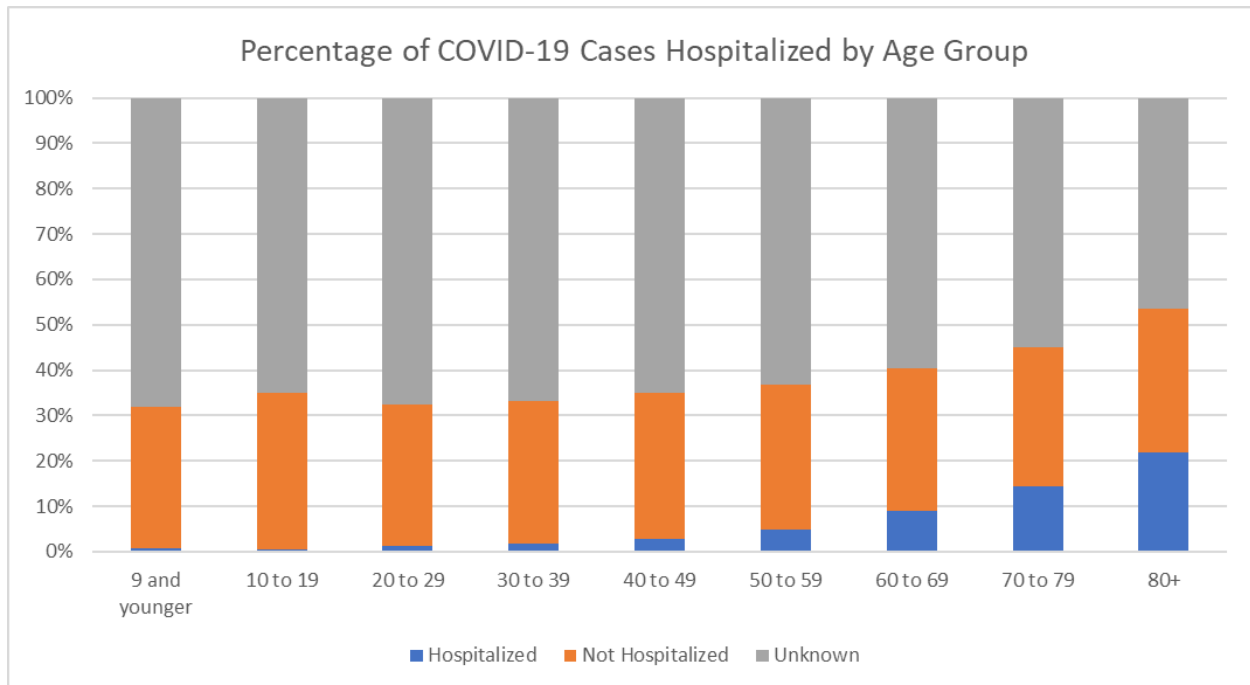

Oregon's Biweekly Data Report

Data Spotlight: COVID-19 Severity and Age

As of August 22, 2022, there have been a total of 34,653 COVID-19-related hospitalizations and 8,354 COVID-19 related deaths among Oregon residents.

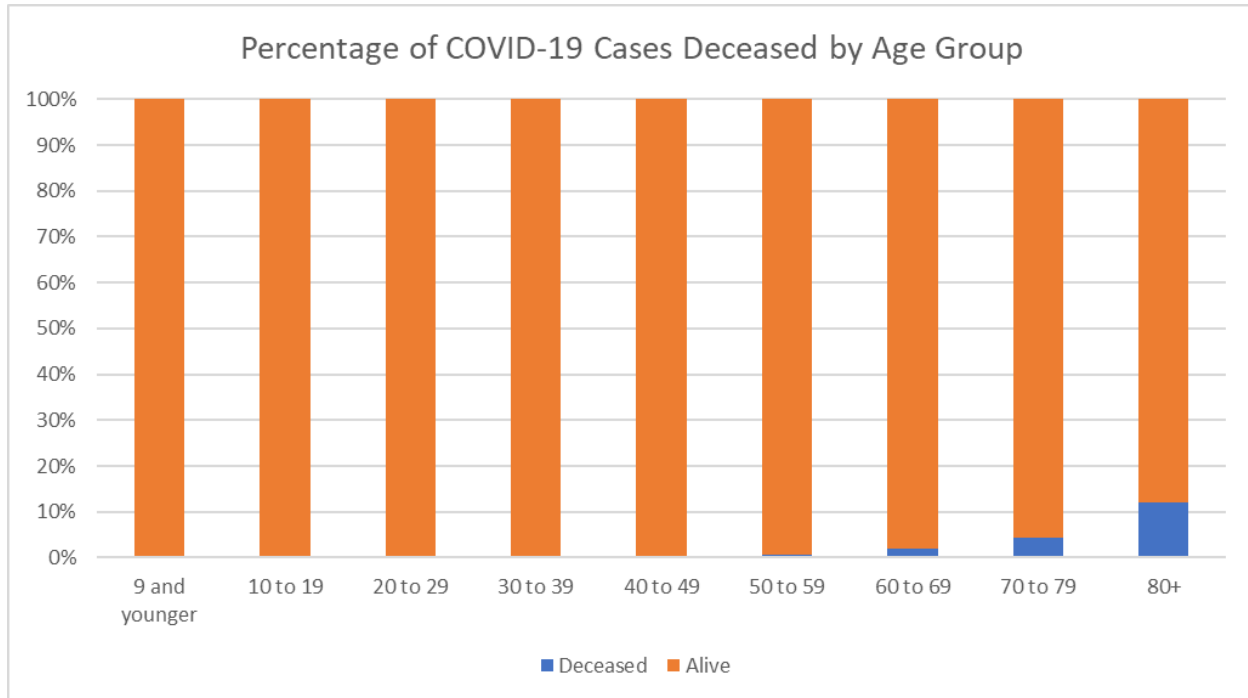

The percentage of COVID-19 cases who have been hospitalized for their illness increases with age: 21.7% of COVID-19 cases 80+ years of age, 14.2% of cases 70-79 years of age, and 8.9% of cases 60-69 years of age have been hospitalized. Less than 5% of COVID-19 cases in all other age groups have been hospitalized.

The percentage of cases who died with COVID-19 also increases with age: 12.0% of COVID-19 cases 80+ years of age, 4.2% of cases 70-79 years of age, and 1.9% of cases 60-69 years of age have died. Less than 1.0% of COVID-19 cases in all other age groups have died.

COVID-19 Biweekly Report

Oregon's Biweekly Data Report

COVID-19 hospitalization and death rates – number of COVID-19 cases hospitalized for their illness and number of cases who died with COVID-19 per 100,000 population – have consistently been highest in the 65+ age group, followed by the 50-64 age group.

The COVID-19 hospitalization rate peaked in the 65+ age group in January 2022 during the first Omicron wave at 192.9 hospitalizations per 100,000 population, while the COVID-19 death rate peaked in this age group in September 2021 during the Delta wave at 77.7 deaths per 100,000 population.

In the 50-64 age group, both the COVID-19 hospitalization rate and the COVID-19 death rate peaked during the Delta wave at 97.3 hospitalizations per 100,000 population in August 2021 and 27.8 deaths per 100,000 population in September 2021.

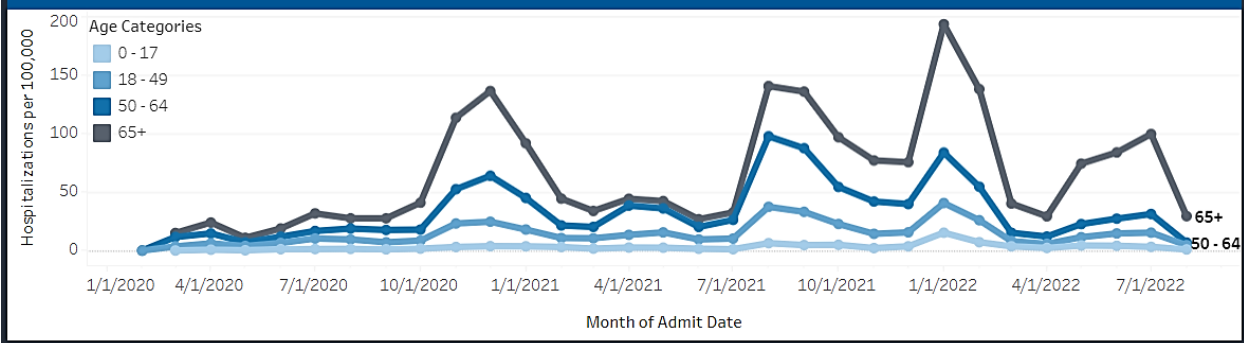

Below are graphs from the COVID-19 Severity Trends dashboard showing COVID-19 hospitalization and death rates by age over time.

Where can I find more information about COVID-19 hospitalizations and deaths in Oregon?

For more data on COVID-19 hospitalizations and deaths, including additional risk factors and trends in COVID-19 hospitalization and death rates, visit:

<https://public.tableau.com/app/profile/oregon.health.authority.covid.19/viz/OregonCOVID-19CaseDemographicsandDiseaseSeverityStatewide/DemographicDataHosp?publish=yes>

What are the best ways to reduce the risk of hospitalization and death due to COVID-19?

- **Stay up to date on COVID-19 vaccines**
 - Staying up to date on COVID-19 vaccination is the best way to protect yourself from severe illness, hospitalization, and death from COVID-19. According to Oregon Health Authority's (OHA) most recent COVID-19 Breakthrough Report, a majority of COVID-19

COVID-19 Biweekly Report

Oregon's Biweekly Data Report

hospitalizations and deaths among adults in Oregon occur in unvaccinated individuals.

- The July 2022 COVID-19 Breakthrough Report can be accessed here:

- <https://www.oregon.gov/oha/covid19/Documents/DataReports/Breakthrough-Case-Report.pdf>.

- For more information about COVID-19 vaccines, including eligibility and where to find a vaccine, visit: <https://www.safestrongoregon.org>.

- **Ask about available COVID-19 treatment options**

- If you become ill with COVID-19, you may be eligible for effective treatments that can reduce the risk of severe illness due to COVID-19. Contact your healthcare provider to discuss the treatment options available to you. Most treatments work best if started within the first few days of illness. For more information about COVID-19 treatment options and Test to Treat (T2T) program locations, visit: <https://govstatus.egov.com/or-oha-covid-19-treatments>.

COVID-19 Biweekly Report

Oregon's Biweekly Data Report

Biweekly Data Report

Background

The COVID-19 Biweekly Report includes data from the most recent two weeks, and it will be published every two weeks. Please note that the data reported here are continually updated. For information updated daily, visit the OHA COVID-19 web page: <https://govstatus.egov.com/OR-OHA-COVID-19>.

Demographics

The following tables and figures show the demographic characteristics for all reported COVID-19 cases in the last 6 months.² The tables show case counts, case rates, and indicators of severity by sex, age, race, and ethnicity. The figures show cases over time, by week of onset, for sex, age, race, and ethnicity.

Geography

The following figures show case rates by county during August 7 - August 20, 2022. Cases are counted according to the date on which the case became known to public health. Figure 1 displays case rates by county, in comparison to the case rate for all of Oregon and the United States. Figure 2 uses a map to represent county-level case rate data.

² All tables and figures in this report referencing the last 6 months include data from February 20, 2022, to August 20, 2022.

COVID-19 Biweekly Report

Oregon's Biweekly Data Report

Figure 1. Case rates per 100,000 residents by county compared to state and U.S., August 7 - August 20, 2022

1. Counties that had case rates above the case rate for the state are displayed in orange. Counties that had case rates below the case rate for the state are displayed in blue.
2. Counties that had zero cases in the time period displayed appear on the list, but do not have a bar to display.
3. United States rates are calculated using data from the CDC COVID-19 Data Tracker. These data are available at https://covid.cdc.gov/covid-data-tracker/#trends_dailycases.

People with Intellectual and Developmental Disabilities

As of June 6, 2022, OHA is aware of 4,655 people with intellectual or developmental disabilities who have had COVID-19 to date. This includes individuals who live in congregate settings and in family or individual homes. To date, there are 62 deaths among people with intellectual or developmental disabilities. This number is from conducting a match between the Oregon Department of Human Services Office of Developmental Disabilities Services (ODDS) client list and the Oregon COVID-19 case database. OHA will update this number on a quarterly basis.

COVID-19 Biweekly Report

Oregon's Biweekly Data Report

Additional information about the ODDS program and COVID-19 can be found here: <https://www.oregon.gov/dhs/SENIORS-DISABILITIES/DD/ODDS%20Resource%20Library/ODDS-Residential-COVID-19-Report.pdf>.

ODDS data are based on self-reports from providers and case management entities and therefore may differ from testing data received from OHA.

Weekly COVID-19 Hospitalizations (HOSCAP)

OHA is publishing data on the number of COVID-19 hospitalizations by hospital in the prior week; data are from HOSCAP. Maps and tables containing the 7-day average of hospitalizations by region and hospital are available online at:

<https://public.tableau.com/app/profile/oregon.health.authority.covid.19/viz/OregonCOVID-19HospitalCapacity/HospitalizationbyFacility>.

Information on Oregon's current hospital bed capacity by region is available online at: <https://public.tableau.com/app/profile/oregon.health.authority.covid.19/viz/OregonCOVID-19HospitalCapacity/BedAvailabilitybyRegion>.

ZIP code

OHA publishes data on cases by ZIP code, available online at:

<https://public.tableau.com/profile/oregon.health.authority.covid.19#!/vizhome/OregonCOVID-19CasesbyZIPCode/OregonsCOVID-19CasesbyZipCode>.

Summary table of all zip codes available here:

<https://public.tableau.com/profile/oregon.health.authority.covid.19#!/vizhome/OregonCOVID-19CasesbyZIPCode-SummaryTable/CasesbyZIPCodeSummaryTable>.

Report Limitations

These data represent a snapshot of reported COVID-19 cases, and they include data on cases with pending investigations. The data shown in this report come from Oregon's electronic reportable disease surveillance system. Not all reported cases have been interviewed. In January 2022, public health case investigation and contact tracing operations were changed to prioritize responding to outbreaks in high-consequence settings, such as healthcare, congregate care (e.g., nursing homes), carceral settings,

COVID-19 Biweekly Report

Oregon's Biweekly Data Report

and settings related to our food chain. Public health is no longer calling all cases to attempt interview to assess hospitalization status, symptoms and risks.

Additional Information & Available Resources

Vaccination is the best way to prevent infection and transmission of COVID-19. For more information about COVID-19 vaccines, including frequently asked questions and where to find a vaccination site, visit: www.safestrongoregon.org. Persons 5 years of age or older who completed their COVID-19 vaccine primary series at least 5 months ago are recommended to get a booster. Persons who received a first booster dose at least 4 months ago are eligible for a 2nd booster if they meet the following criteria:

- 50 years of age or older
- 12 years of age or older and moderately or severely immunocompromised
- 18 years of age or older and received 2 doses of J&J (Janssen) vaccine.

For more information about COVID-19 vaccine booster eligibility, visit: www.cdc.gov/coronavirus/2019-ncov/vaccines/booster-shot.html and <https://govstatus.egov.com/or-oha-booster-covid-19-vaccine>.

How do I find a COVID-19 vaccine or booster?

Visit <https://getvaccinated.oregon.gov/#/>.

Where can I find a COVID-19 testing site?

Visit <https://govstatus.egov.com/or-oha-covid-19-testing>.

What should I do if I or a member of my household was exposed or test positive for COVID-19?

Visit <https://govstatus.egov.com/or-oha-covid-19-positive-test>.

Call 866-917-8881 toll free or text OHACOVID to 61222 if you test positive.

Let public health know about your symptoms or positive test with this quick online survey: <https://redcap.oha.oregon.gov/surveys/?s=JKHYT7EA99WEJPW9>.

How can I get treatment to prevent severe symptoms of COVID-19?

COVID-19 Biweekly Report

Oregon's Biweekly Data Report

Treatment for COVID-19 is now widely available. Many effective treatments exist, and most work best if taken within 5 days of onset. Find treatment options for yourself and others at: <https://govstatus.egov.com/or-oha-covid-19-treatments>.

Who can I talk to if I need help?

Dial 2-1-1 for help with testing, vaccines, or general questions. You may also be able to find assistance covering COVID-19-related expenses through your local county public health department.
