

Risk Level Metrics: Schools and Counties

Oregon public health officials have developed evidence-based metrics to determine and track county risk levels. These data guide school reopening and county risk level assignment in Oregon.

What is the data source?

Data presented in this document come from Oregon's case investigation database, the Oregon Pandemic Emergency Response Application (Opera). Opera is the tool by which Local Public Health Authorities (LPHAs) receive and process COVID-19 test results, including Electronic Laboratory Reports (ELRs) and Electronic Case Reports (ECRs), as well as manage information collected from case interviews and medical record reviews.

What is the time period?

On Mondays, OHA pulls the number of COVID-19 cases, cases per 100,000 residents, and test positivity by county for the previous two full weeks from Opera. Weeks run from Sunday to Saturday following the Center for Disease Control's standard Morbidity and Mortality Weekly Report (MMWR) week. The case counts, case rates, and test positivity numbers are used to determine the county risk levels. For case counts and case rates, cases are assigned to a MMWR week based on the date when public health first identified them as a confirmed or presumptive COVID-19 case. For percent test positivity, lab results are assigned to a MMWR week based on the date the test result was reported to public health.

For more information on how the risk levels are determined, please visit:

<https://coronavirus.oregon.gov/Pages/living-with-covid-19.aspx#currentrisklevelbycountyma>

What is the Difference Between a Movement Week and a Warning Week?

County risk levels run on a two-week cycle. The first week is a movement week and the second week is a warning week. On movement weeks, data are updated on Monday and counties are notified of any change in risk level; changes go into effect on the Friday of a movement week. OHA continues to monitor these metrics during warning weeks, however, and provides an update on case counts, rates, and percent positivity.

Where Can I Find My County's Current Risk Level?

For information on what risk level your county is in right now go to:

<https://coronavirus.oregon.gov/Pages/living-with-covid-19.aspx#countystatus>

The map on this site colors counties by their current risk level. New data are pulled every Monday, but the county colors on the map only change on the day counties move risk levels.

How Does OHA Calculate Test Positivity?

OHA receives test results from a variety of laboratories and health care providers. To calculate test positivity, OHA pulls all test results received from Electronic Lab Reports (ELRs) and via Oregon's COVID Reporting Portal (OCR) that were reported to public health in the previous two full MMWR weeks by county. Next, the positive number of test results in each county are divided by the total number of test results in each county to calculate the county's test positivity rate.

Are Adults in Custody (AICs) Included in County Case Counts?

Adults in Custody are not included in case counts or rates for the determination of county risk levels and school operating recommendations. The data presented in this document may include AICs, but OHA examines cases in AICs in state and federal facilities weekly because these individuals do not interact with members of the broader community and do not directly contribute to community spread of COVID-19. If cases of COVID-19 in AICs would lead to a county being placed in a higher risk level, they are manually subtracted from the counts and rates and that is noted below the COVID-19 risk level map [here](#).

Document accessibility: For individuals with disabilities or individuals who speak a language other than English, OHA can provide information in alternate formats such as translations, large print, or braille. Contact the Health Information Center at 1-971-673-2411, 711 TTY or COVID19.LanguageAccess@dhsosha.state.or.us

Weekly Monitoring Periods From Feb. 14 – Mar. 13

This table is based on data pulled at 12:01 AM on March 15, 2021. For case counts and case rates, cases are assigned to a week based on their true case date, which is the date when public health first identified them as a confirmed or presumptive COVID-19 case. For percent positivity in testing, lab results are assigned to a week based on the date their test result was reported to Public Health. All data are provisional and subject to change.

County	County Size	Time Period	Case Count	Cases per 100,000	Test Positivity
Oregon, statewide		02/14/2021 - 02/27/2021	5,430	128.2	3.9%
		02/21/2021 - 03/06/2021	4,584	108.2	3.2%
		02/28/2021 - 03/13/2021	4,125	97.4	3.2%
Baker	Medium‡	02/14/2021 - 02/27/2021	45	267.6	8.0%
		02/21/2021 - 03/06/2021	45	267.6	6.3%
		02/28/2021 - 03/13/2021	34	202.2	5.0%
Benton	Large†	02/14/2021 - 02/27/2021	171	181.2	2.9%
		02/21/2021 - 03/06/2021	132	139.9	2.3%
		02/28/2021 - 03/13/2021	101	107.0	1.5%
