Background

COVID-19 Weekly Report data will be finalized every Sunday at 11 p.m. PST, and the report will be published on Wednesday. Please note that the data reported here are continually being updated. For daily up-to-date information, visit the OHA COVID-19 web page: <https://govstatus.egov.com/OR-OHA-COVID-19>.

As of 11 p.m. Sunday, January 30, there have been 633,876 cases of COVID-19 reported to the Oregon Health Authority. Of these, 19,302 (3%) are “presumptive” cases. This includes people with COVID-19-like symptoms and close contact with a confirmed case, but who did not have a confirmatory laboratory test, and people that self-report at-home tests to public health. Though not confirmed, presumptive cases are highly likely to have COVID-19, given their specific symptoms and known exposure or at-home positive test. If a case later tests positive at a lab, that case will be recategorized as confirmed. If a case tests positive at home, the case will remain presumptive.

COVID-19 Weekly Report

Oregon's Weekly Surveillance Summary

These data represent a snapshot of COVID-19 risk factors and clinical and demographic characteristics of cases, and they include data on cases with pending investigations. Not all cases have been interviewed at the time of this report. It is important to note that as of 1/11/2022, case investigation and contact tracing operations have been modified to prioritize outbreaks in high-consequence settings, such as healthcare, congregate care (e.g., nursing homes), corrections and settings related to our food chain. Public health is no longer calling all cases to attempt interview to assess symptoms and risks. The data shown in this report come from Oregon's electronic disease surveillance system for reportable diseases.

During the week of January 23–January 29¹ 249,556 tests for COVID-19 were performed on Oregonians; of these, 22.6% had a positive result.² This figure represents a “test-based” method, whereby all electronic lab reports received by OHA are used to calculate percent positivity.³ Detailed tables of the number of tests and percent positivity can be found online at

<https://public.tableau.com/profile/oregon.health.authority.covid.19#!/vizhome/OregonHealthAuthorityCOVID-19DataDashboard/OregonsCOVID-19ELRsbyCounty>.

Weekly Report Summary

During Monday, January 24, through Sunday, January 30, 2022, OHA logged 43,606 new cases of COVID-19 infection—down 22% from last week's total and the lowest in 4 weeks. Reported tests dropped 14%, with test positivity declining from 24.5% to 22.6%. Since December 19—when Omicron has dominated—somewhat higher percentages of cases have been reported among persons <40 years of age than were reported up to that date (63% and 56%, respectively), while the proportion among older age groups has declined. About 13% of Oregonians are Hispanic. Among reported cases with known ethnicity during July 5–December 19 (when Delta was preponderant), Hispanic

¹ This date range aligns with CDC's “MMWR week.”

² Does not include antibody (serology) tests.

³ www.cdc.gov/coronavirus/2019-ncov/lab/resources/calculating-percent-positivity.html

COVID-19 Weekly Report

Oregon's Weekly Surveillance Summary

persons accounted for 15% of reported cases. Since that date, 19% of cases with known ethnicity were reported in Hispanic persons.

Seven hundred thirty-nine Oregonians were hospitalized in association with COVID-19 this week—13.9% more than during the previous week. COVID-19-associated deaths rose from 60 last week to 147 this week. Of the 633,876 cases reported in Oregon to date, 24,727 (3.9%) have been hospitalized, and 6,100 (1.0%) have died. COVID-19-associated deaths remain rare among the young: 5 (0.08%) of the COVID-19-associated deaths have been in Oregonians <20 years old. Data on mortality in Oregon, including deaths associated with COVID-19, are available at <https://public.tableau.com/profile/oha.center.for.health.statistics>.

Additional data are available at

<https://public.tableau.com/profile/oregon.health.authority.covid.19#!/vizhome/OregonCOVID-19CaseDemographicsandDiseaseSeverityStatewide/DemographicData>.

Clinical Characteristics and risk factors

This section of the report describes the epidemiology of Oregon's COVID-19 cases, including common symptoms experienced by COVID-19 cases, and demographic breakdowns for sex, age, race, and ethnicity. Indicators of disease severity, specifically hospitalizations and deaths, are included in the tables.

Clinical symptoms and reported risk factors

Figure 1 provides information on signs and symptoms from all COVID-19 cases. Of 633,876 cases, 229,604 (36.2%) reported having signs and symptoms of COVID-19. The most commonly reported symptoms are cough (n=123,998, 19.6%) and headache (n=97,778, 15.4%). Figure 2 provides information on the percentage of COVID-19 cases that report symptoms over time. Figure 3 provides information on risk factors from all COVID-19 cases. The most common risk factors are having contact with a known COVID-19 case prior to symptom onset (n=173,413, 27.4%) and having underlying medical conditions (n=469,107, 74%). Note that a person may report more than one sign/symptom or risk factor. Where displayed by week in this report, case data are categorized by week of reported symptom onset, not by date of case report. This results in reduced numbers in the most recent week or more due to reporting lags.

Oregon's Weekly Surveillance Summary

Figure 3. Reported risk factors among all COVID-19 cases

Risk factor definitions:

- Congregate living situations include, but are not limited to, long-term care facilities, group homes, prisons, and shelters. Data include people with confirmed cases who live or work in congregate living situations.
- Direct patient care is only asked if a case is a healthcare worker or volunteer. The denominator is the number of healthcare workers or volunteers.
- Underlying medical conditions include cardiovascular disease, chronic liver disease, chronic lung disease, chronic renal disease, current or former smoker, diabetes mellitus, immunocompromised condition, neurologic and neurodevelopmental conditions, obesity, or other chronic diseases.

Demographics

The following tables and figures show the demographic characteristics for all COVID-19 cases. The tables show case counts, case rates, and indicators of severity by sex, age,

COVID-19 Weekly Report

Oregon's Weekly Surveillance Summary

race and ethnicity. The figures show cases over time, by week of onset, for sex, age, race, and ethnicity. Figure 4 displays case rates by county, in comparison to the case rate for all of Oregon.

Geography

The following figure shows case rates by county for the most recently completed MMWR week, which is currently January 23 to January 29, 2022. Cases are displayed using the date that the case became known to public health.

Figure 4. Case rates per 100,000 population, by county

COVID-19 Weekly Report

Oregon's Weekly Surveillance Summary

1. Counties that had case rates above the case rate for the state are displayed in orange. Counties that had case rates below the case rate for the state are displayed in blue.
2. Counties that had zero cases in the time period displayed appear on the list, but do not have a bar to display.

Sex

Table 1. Severity and rates of COVID-19 by sex

| Sex | Cases | % of total cases | Cases per 100,000 | Hospitalized | % Hospitalized | Deaths | Case fatality |
|---------------|---------|------------------|-------------------|--------------|----------------|--------|---------------|
| Female | 322,997 | 51.0 | 14,933.3 | 11,621 | 3.6 | 2,728 | 0.8 |
| Male | 294,353 | 46.4 | 13,982.7 | 12,929 | 4.4 | 3,331 | 1.1 |
| Non-Binary | 66 | 0.0 | | 0 | 0.0 | 0 | 0.0 |
| Not Available | 16,460 | 2.6 | | 177 | 1.1 | 41 | 0.2 |
| Total | 633,876 | 100.0 | 14,851.6 | 24,727 | 3.9 | 6,100 | 1.0 |

1. Rates are calculated using population estimates from the 2020 Annual Population Report from Portland State University's College of Urban & Public Affairs Population Research Center and 2019 housing and demographic data from the U.S. Census Bureau's American Community Survey (ACS).

Race

Table 3. Severity and rates of COVID-19 by race

| Race | Cases | % of total cases | Cases per 100,000 | Hospitalized | % Hospitalized | Deaths | Case fatality |
|-------------------------------|---------|------------------|-------------------|--------------|----------------|--------|---------------|
| > 1 race | 7,231 | 1.1 | 3,527.5 | 332 | 4.6 | 75 | 1.0 |
| American Indian/Alaska Native | 9,569 | 1.5 | 19,265.6 | 499 | 5.2 | 103 | 1.1 |
| Asian | 16,047 | 2.5 | 8,598.5 | 579 | 3.6 | 106 | 0.7 |
| Black | 14,488 | 2.3 | 17,817.6 | 802 | 5.5 | 106 | 0.7 |
| Not Available | 175,473 | 27.7 | | 3,097 | 1.8 | 1,171 | 0.7 |
| Other | 80,581 | 12.7 | | 2,947 | 3.7 | 428 | 0.5 |
| Pacific Islander | 2,548 | 0.4 | 14,829.9 | 211 | 8.3 | 29 | 1.1 |
| White | 327,939 | 51.7 | 9,115.9 | 16,260 | 5.0 | 4,082 | 1.2 |
| Total | 633,876 | 100.0 | 14,851.6 | 24,727 | 3.9 | 6,100 | 1.0 |

1. During the case investigation, people are asked to self-report their race, ethnicity, tribal affiliation, country of origin, or ancestry.
2. Rates are calculated using population estimates from the 2020 Annual Population Report from Portland State University's College of Urban & Public Affairs Population Research Center and 2019 housing and demographic data from the U.S. Census Bureau's American Community Survey (ACS).
3. Persons for which race information was not available were not included in these estimates. The number of persons with race data unavailable can be found in Table 3.
4. 57,149 (70.9%) of the 80,581 persons who identify as "Other" race also self-identify as Hispanic or Latino.

Age-adjustment

Tables 5 and 6 show the ratio of age-adjusted rates of COVID-19 for cases, hospitalizations, and deaths by race and ethnicity. Each table compares the rates of cases, hospitalizations, and deaths between each group and a reference group and accounts for differences in population distributions in each group.

Table 5. Ratio of age-adjusted rates for cases, hospitalizations, and deaths by race

Age-adjusted rate ratios of cases, hospitalizations, and deaths, compared to white persons.

| Race | Cases | Hospitalizations | Deaths |
|-------------------------------|-------|------------------|--------|
| > 1 race | 0.4 | 0.7 | 1.0 |
| American Indian/Alaska Native | 2.1 | 2.7 | 2.8 |
| Asian | 0.9 | 0.9 | 0.8 |
| Black | 1.8 | 3.0 | 2.2 |
| Pacific Islander | 1.6 | 4.7 | 4.6 |
| White | 1.0 | 1.0 | 1.0 |

1. During the case investigation, people are asked to self-report their race, ethnicity, tribal affiliation, country of origin, or ancestry.
2. U.S. Census Bureau; American Community Survey, 2019 American Community Survey 5-Year Estimates.
3. Persons for which race information was not available were not included in these estimates. The number of persons with race data unavailable can be found in Table 3.

COVID-19 Weekly Report

Oregon's Weekly Surveillance Summary

Table 6. Ratio of age-adjusted rates for cases, hospitalizations, and deaths by ethnicity

Age-adjusted rate ratios of cases, hospitalizations, and deaths, compared to non-Hispanic.

| Ethnicity | Cases | Hospitalizations | Deaths |
|------------------|--------------|-------------------------|---------------|
| Hispanic | 1.7 | 2.3 | 2 |
| Non-Hispanic | 1.0 | 1.0 | 1 |

1. During the case investigation, people are asked to self-report their race, ethnicity, tribal affiliation, country of origin, or ancestry.
2. U.S. Census Bureau; American Community Survey, 2019 American Community Survey 5-Year Estimates.
3. Persons for which ethnicity information was not available were not included in these estimates. The number of persons with ethnicity data unavailable can be found in Table 4.

People with Intellectual and Developmental Disabilities

As of January 9, 2022 OHA is aware of 2,397 people with intellectual or developmental disabilities who have had COVID-19 to date. This includes individuals who live in congregate settings and in family or individual homes. To date, there are 49 deaths among people with intellectual or developmental disabilities. This number is from conducting a match between the ODHS Office of Developmental Disabilities Services client list and the Oregon COVID-19 case database. OHA will update this number on a quarterly basis.

Additional information about the ODDS program and COVID-19 can be found here: <https://www.oregon.gov/dhs/SENIORS-DISABILITIES/DD/ODDS%20Resource%20Library/ODDS-Residential-COVID-19-Report.pdf>.

COVID-19 Weekly Report

Oregon's Weekly Surveillance Summary

ODDS data is based on self-reports from providers and case management entities and therefore may differ from testing data received from the Oregon Health Authority.

Weekly COVID-19 Hospitalizations (HOSCAP)

OHA is publishing data on the number of COVID-19 hospitalizations by hospital in the prior week; data are from HOSCAP. Maps and tables containing the 7-day average of hospitalizations by region and hospital are available online at:

<https://public.tableau.com/app/profile/oregon.health.authority.covid.19/viz/OregonCOVID-19HospitalCapacity/HospitalizationbyFacility>.

Information on Oregon's current hospital bed capacity by region is available online at:

<https://public.tableau.com/app/profile/oregon.health.authority.covid.19/viz/OregonCOVID-19HospitalCapacity/BedAvailabilitybyRegion>.

ZIP code

OHA is publishing data on cases at the ZIP code level, available online at:

<https://public.tableau.com/profile/oregon.health.authority.covid.19#!/vizhome/OregonCOVID-19CasesbyZIPCode/OregonsCOVID-19CasesbyZipCode?publish=yes>.

Summary table of all zip codes available here:

<https://public.tableau.com/profile/oregon.health.authority.covid.19#!/vizhome/OregonCOVID-19CasesbyZIPCode-SummaryTable/CasesbyZIPCodeSummaryTable?publish=yes>.

Document accessibility: For individuals with disabilities or individuals who speak a language other than English, OHA can provide information in alternate formats such as translations, large print, or braille. Contact the Health Information Center at 1-971-673-2411, 711 TTY or COVID19.LanguageAccess@dhsoha.state.or.us.
