

Oregon Health Plan Prioritized List Changes

Treatment of Attention Deficit Hyperactivity Disorder

The Health Evidence Review Commission approved the following changes to the Prioritized List of Health Services on December 5, 2013, based on the approved coverage guidance, “Treatment of Attention Deficit Hyperactivity Disorder.” The changes will take effect for the Oregon Health Plan on April 1, 2014.

New guideline note:

GUIDELINE NOTE: ATTENTION DEFICIT AND HYPERACTIVITY DISORDERS IN CHILDREN AGE FIVE AND UNDER

Line 133

When using 314.9, Unspecified Hyperkinetic Syndrome, in children age 5 and under, it is appropriate only when the following apply:

- Child does not meet the full criteria for the full diagnosis because of their age.
- For children age 3 and under, when the child exhibits functional impairment due to hyperactivity that is clearly in excess of the normal activity range for age (confirmed by the evaluating clinician’s observation, not only the parent/caregiver report), and when the child is very limited in his/her ability to have the sustained periods of calm, focused activity which would be expected for the child’s age.

First line therapy is “parent-behavior training” (i.e. Triple P (Positive Parenting of Preschoolers) Program, Incredible Years Parenting Program, Parent-Child Interaction Therapy and New Forest Parenting Program). The term “parent” refers to the child’s primary care givers, regardless of biologic or adoptive relationship.

Second line therapy is pharmacotherapy.

Use of 314.9 for children age five and younger is limited to pairings with the following procedure codes with first and second line therapy as denoted above:

- Assessment and Screening: 90791, 90792, H0002, H0031, H0032, T1023
- Family interventions and supports: 90832-90838, 90846, 90847, 90849, 90887, H0038, H0045, H2021, H2022, H2027, S5151, S9125, T1005
- Group therapy: 90785, 90832-90838, 90853, 99201-99215, H2032
- Medication management: 90832-90838, 99201-99215
- Case Management: 90882, T1016
- Provider/teacher care coordination: 99366, 99367, 99368
- Interpreter Service: T1013
