Foodborne Illness Prevention Program
Food, Pool & Lodging Health and Safety Program

Rule provisions address four areas: personnel (Chapter 2), food (Chapter 3), equipment/facilities/supplies (Chapters 4, 5, 6, 7), and compliance and enforcement (Chapter 8).

The structural nomenclature of the document is as follows:

Chapter	9
Part	9-1
Subpart	9-101
Section (§)	9-101.11
Paragraph (¶)	9-101.11(A)
Subparagraph	9-101.11(A)(1)

Rule provisions are either appropriate for citing and debiting on an inspection report or they are not. Those not intended for citing/debiting are identified by the digits following the decimal point in the numbering system. These "nondebitable" provisions fall into two categories, those that end with two digits after the decimal point and the last digit is a zero, e.g., § 1-201.10; and those that end with three digits after the decimal point and the last 2 digits are zeros, e.g., § 8-805.100.

The Food Code presents requirements by principle rather than by subject. For example, equipment requirements are presented under headings such as Materials, Design and Construction, Numbers and Capacities, Location and Installation, and Maintenance and Operation rather than by refrigerators, sinks, and thermometers. In this way, provisions need be stated only once rather than repeated for each piece or category of equipment. Where there are special requirements for certain equipment, the requirement is delineated under the appropriate principle (e.g., Design and Construction) and listed separately in the index.

Portions of some sections are written in *italics*. These provisions are not requirements but are provided to convey relevant information about specific exceptions and alternative means for compliance. Italics are pursuant to a preceding provision that states a requirement, to which the italics offer an exception or another possibility.

Italicized sections usually involve the words "except for," "may", "need not" or "does not apply." See ¶ 3-202.18(D).

Requirements contained in the Food Code are presented as being in one of three categories of importance: PRIORITY ITEM (i.e. a provision in this Code whose application contributes directly to the elimination, prevention or reduction to an acceptable level, hazards associated with foodborne illness or injury and there is no other provision that more directly controls the hazard); PRIORITY FOUNDATION ITEM (i.e., a provision in this Code whose application supports, facilitates or enables one or more PRIORITY ITEMS); and, CORE ITEM (i.e., a provision in this Code that is not designated as a PRIORITY ITEM or a PRIORITY

FOUNDATION ITEM and that usually relates to general sanitation, operational controls, sanitation standard operating procedures (SSOPs), facilities or structures, equipment design, or general maintenance.
A "^{P}" or "^{Pf}" designation after a paragraph or subparagraph indicates that the provision within that section is a PRIORITY ITEM or PRIORITY FOUNDATION ITEM. Any unmarked provisions within a section are CORE ITEMS.

The following conventions are used in the Food Code. "shall" means the act is imperative, i.e., "shall" constitutes a command. "may not" means absolute prohibition. "May" is permissive and means the act is allowed. The term "means" is followed by a declared fact.

Defined words and terms are in "small caps" in the text of the Food Code chapters to alert the reader to the fact that there is a specific meaning assigned to those words and terms and that the meaning of a provision is to be interpreted in the defined context. A concerted effort was also made to place in "small caps" all forms and combinations of those defined words and terms that were intended to carry the weight of the definition.

(2) Calculation of Points:

(a) Three point priority foundation items shall be given an additional three point weight when a repeat violation is observed;

(b) Five point priority items shall be given an additional five point weight when a repeat violation is observed;

(c) Additional points shall accumulate and be added to the value of uncorrected items that are repeat violations;

(d) Each three point priority foundation item can accumulate to six points.

(e) Each five point priority item can accumulate to 10 points.

(3) Violations creating a potential danger to public health shall be recorded as in section (1) of this rule and shall specify:

(a) Any alternative procedure as may be approved, the time limit for its use, and that the alternative procedure must be implemented immediately; and

(b) The corrections to be made and the time limit by which the corrections shall be made. In the case where an alternative procedure has not been approved, the time limit by which the correction must be made shall be within but not to exceed 14 days.

(4) Violations creating an imminent or present danger to public health shall be recorded as required in sections (1) and (3) of this rule except when no alternative procedure is approved, the correction shall be required immediately.

(5) If a restaurant obtains a sanitation score of less than 70 upon an unannounced complete inspection, the operator or person in charge shall be notified by a statement on the inspection form that the restaurant shall be closed, if the score of another complete inspection conducted within 30 days is not 70 or above.

(6) Violations creating a significantly increased risk for foodborne illness shall require a recheck inspection if found on consecutive complete inspections, and for the purposes of enforcement shall be considered uncorrected.

(7) If a restaurant is ordered closed, the closure order as designated by the Authority shall be attached to the inspection form and delivered to the operator or person in charge.

333-157-0010 Approved Alternative Procedures

(1) An alternative procedure may be approved on a temporary basis for a designated time period, if in the judgment of the Environmental Health Specialist the procedure provides interim health and safety protection equal to that provided by the rule. The Environmental Health Specialist may extend the designated time period if justified by unforeseen circumstances. Such an alternative procedure shall not authorize or condone any priority item or priority foundation item violation.

(2) All alternative procedures which have been approved shall be implemented immediately.

333-157-0020 Public Notice of Restaurant Sanitation

(1) The notice of restaurant sanitation shall be based upon the sanitation score calculated on the inspection form at the end of each unannounced complete inspection and shall be posted at a customary entrance to the establishment. If, upon recheck inspection, any priority item or priority foundation item violation listed on the inspection form is not corrected within the designated time limit, the notice of restaurant sanitation posted at the end of the unannounced complete inspection shall be removed, the notice of closure posted, and closure action taken.

(2) A notice of restaurant sanitation that states that the establishment "Complied with the Acceptable Sanitation Standards" shall be assigned to a restaurant that obtains a sanitation score of 70 or more in an unannounced complete inspection provided all priority item and priority foundation item violations have been corrected or remedied by approved alternative procedures. Upon recheck inspection, any uncorrected priority item and priority foundation item violations shall cause the notice of restaurant sanitation to be removed, the notice of closure to be posted, and closure action taken.

(3) A notice of restaurant sanitation that states that the establishment "Failed to Comply with the Acceptable Sanitation Standards" shall be assigned to a restaurant that obtains a sanitation score of less than 70 in an unannounced complete inspection provided all priority item and priority foundation item violations have been corrected or remedied by approved alternative procedures. (3) The increased inspection schedule will revert to semi-annual inspections after the facility has obtained four (4) consecutive scores of 70 or above.
(4) At the Assistant Director's option, one of the four required inspections may be an inspection using Hazard Analysis and Critical Control Point (HACCP) principles, as defined in these rules. HACCP based inspections may be announced. Participation by a restaurant in a HACCP-based inspection shall be the equivalent of a score of 70 or above for the purposes of this rule.
(5) The inspecting agency may assess a fee for each quarterly inspection required under this rule of up to one-half of the annual licensing fee otherwise assessable to the restaurant.

(3) If a violation which creates a potential danger to public health has not been corrected within the designated time limit, the restaurant shall be closed.
(4) When a restaurant has been closed because a priority item and priority foundation item violation(s) has not been corrected, it may be reopened after 24 hours if:

(e) A restaurant closed and reopened as described in this subsection shall be assigned a notice of restaurant sanitation based on the sanitation score of the unannounced complete inspection which identified the priority item and priority foundation item violations causing the closure.

(5) If a restaurant has obtained a sanitation score of less than 70 on two consecutive complete inspections conducted within 30 days as described in OAR 333-157-0000(5), it shall be closed.

(6) When a restaurant has been closed for failure to obtain a minimum acceptable sanitation score of 70 or more, it may be reopened after 24 hours if:

(b) The plan of correction is approved by the Administrator; and

(c) A complete inspection after the restaurant has been closed produces a sanitation score of 70 or more.

(d) A closure dismissal order designated by the Authority is delivered to the operator or person in charge; and

(e) The closed sign previously posted is removed by the Administrator;

(f) A restaurant may be reopened earlier than 24 hours following a voluntary meeting attended by the restaurant operator or person in charge, the Administrator, and the inspecting Environmental Health Specialist, at which the provision of subsections (6)(a) through (e) of this section are demonstrated to be met;

(g) A restaurant closed and reopened as described in this subsection shall be assigned a notice of restaurant sanitation based on the sanitation score of the complete inspection performed while the restaurant was closed.

(7) Appeals of closures are contested cases pursuant to ORS chapter 183.

(8) Operators whose facilities have been closed for failure to obtain a minimum acceptable sanitation score of 70 or more, or for failure to correct repeat priority item and priority foundation item violations must agree in writing, as part of reopening the restaurant, to:

(a) Enroll in and successfully complete an approved food manager

training course; or

DIVISION 158 - COMBINATION FOOD SERVICE FACILITIES

Combination Facilities Engaged in Activities Subject to Regulation by the Oregon Department of Agriculture and by the Oregon Health Authority

333-158-0000 Licensing and Inspections

The licensing of combination facilities shall be the responsibility of either the Authority or the Oregon Department of Agriculture in accordance with the following criteria:

(1) The establishments subject to these rules are those combination facilities as defined in OAR 333-150-0000 1-201.10(B).

(2) A determination shall be made for each firm covered in OAR 333-150-0000 1-201.10(B) as to which agency shall inspect and license. The determination shall be based upon which agency has statutory responsibility and authority for the predominant activities of the firm.

(3) In those instances where it is determined that either a full or limited service restaurant or other activity for which the Authority has authority, is predominant, the Authority shall perform the inspectional and licensing responsibilities to the exclusion of the Oregon Department of Agriculture.

(4) In those instances where it is determined that the bakery, retail grocery, food processing or other activities for which the Oregon Department of Agriculture has authority, is predominant, the Oregon Department of Agriculture shall perform the inspectional and licensing responsibilities to the exclusion of the Authority.

(5) The determination of the predominant activity at any combination facility subject to this agreement shall be made first by the field Environmental Health Specialists. If agreement is not reached, then it shall be referred to program supervisors of the Local Public Health Authority, and the Oregon Department of Agriculture for a determination of predominant activity. If an agreement is not reached among the Local Public Health Authority and the Oregon Department of Agriculture, or if a licensed facility disagrees with the determination, the matter may be appealed to an arbitration panel composed of the Administrator of the Food and Dairy Division (or appointee), the Administrator of the Center for Health Protection (or appointee), and one representative each from the Conference of Local Health Officials, an association representing the restaurant industry and an association representing the retail grocery industry. The decision of this panel shall be final except as provided in section (6) of this rule.

(6) Any licensee wishing to contest the determination of predominance by agencies may produce records of gross annual sales to support the protest and be heard by the Local Public Health Authority in accordance with ORS chapter 183.

(7) Notwithstanding sections (2) through (6) of this rule, if the Local Public Health Authority and the Oregon Department of Agriculture agree that the complexity rather than the predominance of food processing activities should determine the regulating agency, inspectional and licensing responsibilities may be transferred to the Oregon Department of Agriculture to the exclusion of the Local Public Health Authority.

(1) Any facility licensed and inspected by the Authority, pursuant to OAR 333-158-0000 through 333-158-0030, shall be subject to the applicable rules under OAR Chapter 333 of the Authority for all activities subject to ORS Chapter 624.
