AFHMP - Locating the Correct Census Data for your Property

https://factfinder.census.gov/faces/nav/jsf/pages/index.xhtml
Now, you can locate the Census Tract, Housing Market Area and Expanded Housing Market Area to complete Sections 1d and 1e on page one of the AFHMP.

1d. Census Tract

1e. Housing/Expanded Housing Market Area

The list of geographical areas that come up for your property’s address include the census tract and housing market areas. Most choose the city as the Housing Market Area and then the County for the Expanded Housing Market Area. Add that information to the appropriate section of the AFHMP document noted above.
Census Bureau Reports:

Now, in the Fact Finder system, choose the Census Tract, Housing Market Area and Expanded Housing Market Area from the list generated:

Click on Census Tract, then, Housing Market Area & then Expanded Housing Market Area. Once loaded, you will see them added to your search selection.

Once the areas are listed in the “Your Selections” window, close the “select geographies” window.

After closing the window, you will see a list of thousands of reports. Next, we will narrow the search to get what is needed. The specific reports used is not a requirement. However, these are the reports that OHCS recommends.
Report 1: Race, Ethnicity & Familial Status; the DP-1 report will provide race, ethnicity and familial status information.

In the search bar, click Topics and type DP-1 in the search bar and click GO. A group of reports will populate the table.

Next, select (check the box) the report Dataset titled: “2010 Demographic Profile” and then click View.

This will produce the Census Data for all 3 of the geographic areas that you selected and added to the “Your Selections” Window. You will be able to view the data for each geographic area you selected. Print the report “Census Tract”. Next, from drop down choose, Housing Market Area – print and then do the same for the Expanded Housing Market Area.
Once you have obtained and printed these reports, set them aside for later work with the AFHMP Worksheet 1.

Next, click “Back to Advanced Search” in the right hand corner of the screen.
Report 2: Disability Status: Census Tract

Now we will obtain census data for disability. In “Your Selections” window, remove the DP-1 Report, the housing market area and the expanded housing market area by clicking on each corresponding, so that only the Census Tract is left.

Next, click on Topics in the left navigation bar and then click on “people” to expand the category in the topics box to the right. Then click the “+” by “disability” to expand and click on the blue Disability link. This will then move it to the Your Selections window. Then close the Topics window.
Next, in the Search bar, search for Topics and type QT-P21 and click GO. Select the report Dataset titled “2000 SF3 Sample Data” and then click View.

The following report will show in the Table Viewer:

Print the report. Look for the % with a disability for both sexes for the population 5 years. Set this report aside for later use on Worksheet 1.
Now we will be collecting the disability information for the other two housing market areas.

**Report 2: Disability Status: Housing Market Area and Expanded Housing Market Area**

Now, remove Census Tract and QT-P21 from the “Your Selections” window by clicking the small blue circled ‘x’. Click on “Geographies” in the left navigation bar again (be sure you are on the Address selection in this area – you may have to re-enter your property’s address) and select the housing market area and expanded housing market area again. Once loaded, these will reappear in the “Your Selections” window. In the search bar, search topics for the report DP02.

DP02 will now appear in the Your Selections window. From here, select the first report on the list:
The following report will appear in the Table Viewer:

![Table Viewer Image]

NOTE: Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces

For more information on confidentiality protection, sampling error, nonsampling error, and limitations, see Survey Methodology.

Several lines down the list in this report you will find the information needed. Locate the % of the total civilian non-institutionalized population with a disability.

Now that you are finished gathering the data required to accurately complete Worksheet 1 of the AFHMP, you can review the reports and enter the corresponding census data per geographic area identified into the boxes of the Worksheet.
