

Better Health | Better Care | Better Cost

Central Oregon CCO

Housing Stability 5/6/16

Central Oregon CCO 101

- PacificSource is the Coordinated Care Organization (CCO) for Central Oregon and holds the Medicaid contract with the Oregon Health Authority (OHA).
- During the formation of the CCOs, Central Oregon wanted a governance structure that included additional community oversight, involvement, and transparency.
- Senate Bill 204 was created which allows the Central Oregon Health Council (COHC) to be the CCO governing entity in Central Oregon.
- The CCO and the COHC have a Joint Management Agreement that outlines roles/responsibilities, deliverables, and funding streams.

Uninsured rate (OHA, February 2015)	Crook: 1% Jefferson: 4.5% Deschutes: 2.6%

?

Approximately 2,000 individuals are homeless in Central Oregon

?

High-Risk Population

- The CCO manages a long list of quality measures for the entire membership (e.g. Emergency Department (ED) utilization, hypertension control, depression screenings).
- 400+ individuals are considered high ED utilizers (6 ED visits in 6 months) in Central Oregon
 - Approx. 40% of these high ED utilizers are homeless and an additional 25% have unstable housing.
- The CCO is currently leveraging the ED Information Exchange, a real time notification system of individuals in the ED. This allows our Case Management team, as well as regional providers, to provide timely outreach for follow up, needs assessments, and coordination of services.

Member Impact

- Provided funding for 21 members for housing-related needs during the Patient Support Funds pilot project
- Collaboration on community housing projects
- Coordination of medical and social services for a homeless member in need of detox and residential substance use disorder treatment

Regional Health Improvement Plan (RHIP)

- The CCO and COHC recently completed the four-year RHIP which includes housing as a subsection of Social Determinants of Health.
- The housing language was derived from the CCO's two-year Transformation Plan with the OHA.
- The RHIP workgroup that is focused on the housing subsection will develop a work plan to begin bridging housing solutions with the health system. The upcoming waiver, new rules, and existing restrictions from the Centers for Medicare and Medicaid Services may influence this work.
