

ECHO Bulk Fuel Switching Matrix

Primary Heating System	Site Built, Manufactured Homes & Multi Family
Electric Forced Air	Eligible
Ducted Heat Pump	Eligible
Ductless Heat Pump	Eligible
Zonal Electric	Eligible
Wood or Pellet Heat	<p>Eligible</p> <p>High efficiency electric heating system must be installed as part of weatherization.</p> <p>Existing heat may be left in place as a supplementary heat for a heat pump system.</p> <p>If woodstove/Pellet stove is removed, adding additional zonal electric as backup heat is an allowable expense.</p>
Oil/Propane	<p>Eligible</p> <p>High efficiency electric heating system must be installed as part of weatherization.</p> <p>Non-electric heating system must be decommissioned when possible. When needed for backup heat, existing system may be kept in place. If existing heat is removed, adding additional zonal electric as backup heat is an allowable expense.</p>
Natural Gas	<p>Ineligible</p> <p>Fuel switch request must be submitted and approved before <u>any</u> electric heat source may be installed.</p> <p>Baseload measures may be installed without a fuel switch.</p>
None Existing	<p>Eligible</p> <p>High efficiency electric heating must be installed as part of weatherization.</p>
