

How to Schedule a Report in ART

Advantages to Scheduling Reports

- **The report runs behind the scenes, allowing you to do other work simultaneously**
- **You can run multiple reports at the same time**
- **The file automatically saves to your inbox**
- **Does not rely on your internet speed or use Java**
- **You can schedule reports to run automatically on a daily, weekly, or monthly basis**

Getting Started

- Log in to ServicePoint and then click on Connect to ART
- The process for scheduling a report begins the same as the process for running a report. However, rather than select “View Report”, you will select “Schedule Report”.
- After you select “Schedule Report”, you will be directed to the same report prompts that you use when running the report in real time. You will notice that the layout is a bit different.
- You will have to click on each prompt one at a time. Each prompt will generate a new pop-up for you to input your report parameters.
- Special note: Clicking on the “Next” button before all parameters are set will generate an error message.
