## Data Sources: 2010 Poverty County Info Sheets

### **PAGE 1:**

#### **Population change since 2000:**

OHCS relies on county population data from the US Census Population Estimate program for 2000-2009 for each county and the state.

[www.census.gov/popest/estimates.html](http://www.census.gov/popest/estimates.html)

#### **Poverty Rates:**

2009 data comes from the US Census Small Area Income and Poverty Estimates program which produces annual poverty estimates for all states and counties in the US.

[www.census.gov//did/www/saipe/](http://www.census.gov//did/www/saipe/)

#### **Unemployment rates:**

Unemployment rates come from the Oregon Employment Department's local area unemployment statistics for average covered non-farm unemployment rate by county.

[www.qualityinfo.org](http://www.qualityinfo.org)

#### **Poverty Population Characteristics:**

Data for all counties comes from the 2005-9 American Community Survey tables B17001 A-I, B17010, and B17016.

[www.census.gov/acs/www/](http://www.census.gov/acs/www/)

#### **One Night Homeless Count:**

Homeless counts come from the January 2010 Point In Time Homeless Count (PITHC). This is a count done in a single night includes single individuals and individuals in families receiving shelter and services, those turned away, and those counted on the street.

Consistent with the State of Oregon definition, chronically homeless includes individuals who have been continually homeless for a year or more, or had at least four episodes of homelessness in the past three years, in addition to having a disability, mental illness or addiction disorder. During the one-night count, respondents can report one or more reasons for leaving a previous living arrangement. Since respondents can report multiple causes for homelessness, this is a duplicated count.

## PAGE 2:

### Household Income and Housing Burden:

Data for all counties comes from the 2005-9 American Community Survey tables B19013, B25119, B25071, B25092, B25074, and C25095.

[www.census.gov/acs/www/](http://www.census.gov/acs/www/)

Housing burden is defined as spending more than 30 percent of the household income on gross housing costs including utilities. According to the US Department of Housing and Urban Development, extremely low-income households earn 30 percent of median income, very low-income households earn 50 percent of median income, and low-income households earn 80 percent of median income.

### “How We Help” (Services) Table:

- **New units created with OHCS funding resources:** this number represents the number of new units in the county for the specified year supported by funding allocated by OHCS. The amounts do not represent rolling totals; the number reflects units funded for the specified year only. These could represent units being renovated or under construction. The data come from the OHCS Department Information System for Housing (DISH), based on the funding approval date.

- **OHCS funding for affordable housing:** this number represents the funds allocated by OHCS to projects in each county in the specified year based on funding approval date. It represents funding from several programs at OHCS implemented to help moderate- to low-income families by developing, financing and preserving locally supported affordable housing. These fund awards can apply to predevelopment, new construction and renovation activities. If there is a dollar amount and no new units in a given year, the specified funding supported predevelopment or non-housing investments (such as community rooms or public facilities). The data come from the OHCS Department Information System for Housing (DISH).

- **Single family loans for low-income households-#:** this number represents the number of single-family home loans financed through OHCS in conjunction with qualified lenders. These loans are for persons who earn less than 80 percent of the programs qualifying household income. These funds provide below market rate home loans and/or down payment and closing cost assistance. The data come from the OHCS Loan Information Processing System (LIPS).

- **Single family loans for low-income households-\$:** this number represents the dollar amount allocated for single-family home loans financed through OHCS in conjunction with qualified lenders. These loans are for persons who earn less than 80 percent of the programs qualifying household income. These funds provide below market rate home loans and/or down payment and closing cost assistance. The data come from the OHCS Loan Information Processing System (LIPS).

- **Households receiving energy assistance-#:** this number represents the number of households who received assistance for home heating costs for the specified calendar year. Energy assistance represents two programs: the Low Income Energy Assistance Program (LIEAP) and Oregon Energy Assistance Program (OEAP). Some households receive assistance from both LIEAP and OEAP. This data represents an unduplicated count within the county as well as for the state. State totals may not match the county sum of households receiving assistance as some households may have received services in multiple counties. The data come from the OHCS OPUS system for all counties except for Clackamas, Lane, Multnomah and Washington counties where the local jurisdiction's energy and weatherization programs submit data to OHCS energy program staff.

- **Disconnects Prevented-#:** this number represents the number of households receiving energy assistance that were able to avoid having services disconnected from their homes. The data come from the OHCS OPUS system for all counties except for Clackamas, Lane, Multnomah and Washington counties where the local jurisdiction's energy and weatherization programs submit data to OHCS energy program staff.

- **Restored Utility-#:** this number represents the number of households receiving energy assistance that were able to restore utility services to their homes. The data come from the OHCS OPUS system for all counties except for Clackamas, Lane, Multnomah and Washington counties where the local jurisdiction's energy and weatherization programs submit data to OHCS energy program staff.

- **Household income for energy assist avg-#:** this number represents the average household income of those receiving energy assistance. The county figures are actual averages and the statewide figure is derived from weighted averages of county level data. The data come from the OHCS OPUS system for all counties except for Clackamas, Lane, Multnomah and Washington counties where the local jurisdiction's energy and weatherization programs submit data to OHCS energy program staff.

- **Oregon Health Plan enrollment-%:** this percentage represents an unduplicated client count by year for the Oregon Health Plan divided by the Census population estimate for that year. In July of 2004, the Legislature closed Oregon Health Plan Standard enrollment (in addition, benefit reductions beginning in January 2003 triggered caseload decline before the 2004 enrollment closure). Therefore enrollment data after 2004 no longer directly relates to public demand for this program. Data comes from the Oregon Department of Human Services and queried from the Office of Medical Assistance Programs database. Please note that DHS analyzes this data using ZIP code boundaries; for those ZIP codes that cross county boundaries, DHS assigned the ZIP code to a single county.

- **Students eligible for free/reduced lunch-#:** this figure represents the number of children within each county that were eligible to receive free or reduced-price lunch. In general, students qualify for free or reduced-price lunch when the household receives public assistance, such as Temporary Assistance to Needy Families or food stamps, or if the household income does not exceed 185 percent of the federal poverty level. The data come from the Oregon Department of Education [www.ode.state.or.us/data/reports/toc.aspx#students](http://www.ode.state.or.us/data/reports/toc.aspx#students).

- **Students eligible for free/reduced lunch-%:** this figure represents the number of children within each county that were eligible to receive free or reduced-price lunch as a percentage of all enrolled students. In general, students qualify for free or reduced-price lunch when the household receives public assistance, such as Temporary Assistance for Needy Families or food stamps, or if the household income does not exceed 185 percent of the federal poverty level. The data come from the Oregon Department of Education [www.ode.state.or.us/data/reports/toc.aspx#students](http://www.ode.state.or.us/data/reports/toc.aspx#students).

- **Population receiving Food Stamps-%:** this number represents an unduplicated client count of food stamp recipients as a percentage of the Census population estimate for each year. The data come from DHS program staff.

- **Population receiving TANF-%:** this number represents an unduplicated client count of Temporary Assistance for Needy Families in the year specified as a percentage of the Census population estimate for each year. The data come from DHS program staff.

**Poverty Guidelines:**

The US Department of Health and Human Services provides 2010 poverty threshold data by family size.

<http://aspe.hhs.gov/poverty/10poverty.shtml>

**Fair Market Rents:**

The US Department of Housing and Urban Development fair market rent data for each county by unit size.
