

**Grow site Transfer to Processor or Wholesaler Licensees  
Approved Facility Numbers**

**What is this Document?**

The below list of **medical marijuana grow sites registered to transfer marijuana to Processor or Wholesaler** licensees is provided for licensees to verify registration status prior to accepting a transfer of marijuana from a grow site.

[ORS 475B.825](#) and [OAR 845-025-2130](#) allow medical marijuana grow sites subject to tracking in CTS to register with the OLCC to transfer limited amounts of usable marijuana (dried marijuana flower and trim material, but not other plant material or other marijuana items) to recreational marijuana Processor or Wholesaler licensees. A recreational marijuana Processor or Wholesaler licensee may accept usable marijuana from a medical marijuana grow site as a transfer in CTS only if the grow site has fully registered for that privilege.

Only the facility number is published below. This number will show in a licensee’s “incoming manifests” window as the “license number” for the origin facility. Medical marijuana grow license numbers show in a different format than recreational marijuana licensees.

**Medical marijuana grow sites registered to transfer marijuana to Processor or Wholesaler licensees:**
