

OREGON LIQUOR CONTROL COMMISSION

Winery

A **Winery License** includes the following privileges:

- Importation of wine or cider with licensee's label.
- Bottle, produce, blend, store, transport, export and wholesale wine and cider.
- Privilege to sell wine, malt beverages and cider for consumption at the business, and to sell wine, malt beverages and cider for off-premise consumption.
- License privileges may be used at up to two additional locations upon application to OLCC.

Virtual Wineries

A virtual winery is a licensee that enters into a "Custom Crush" agreement with a federally bonded winery to have wine produced for them. On a state level they hold an OLCC Winery license. On a Federal level, they must have a Wholesaler Federal Basic Permit. All wine received must be tax paid by the producing winery. They may not receive wine in bond.

Alternating Proprietor

An alternating proprietor is a licensee that has an arrangement in which two or more entities take turns using the physical premises of a federally bonded winemaking facility. Each entity must qualify as a stand alone winery, obtain their own TTB registration as a Producing Winery Federal Basic Permit, and other TTB requirements as well as maintain their own records. Each entity would hold their own OLCC Winery License and maintain their own state reporting requirements.

Winery Facility

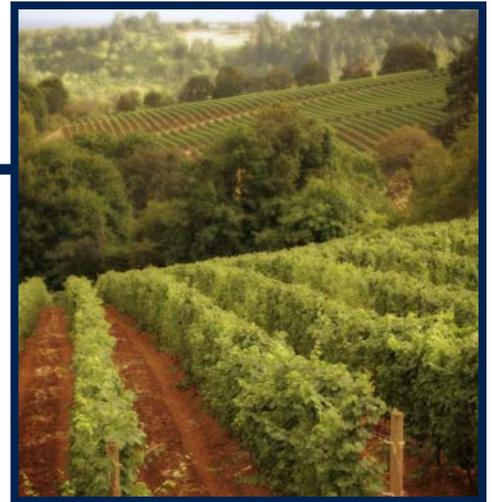

A winery facility is a licensee that holds both an OLCC Winery license and a Producing Winery Federal Basic Permit. This licensee produces, bottles and labels wine at their own facility. This licensee may produce for other licensees. They are required to maintain records and report on all wine they produce.

Oregon Wine Board Agricultural Tax

The Oregon licensee who produces the wine product is responsible for this tax.

Shipping Wine Under Federal Bond

Any bond to bond wine transfers must follow all federal guidelines and all federal paperwork requirements.
