

OREGON LIQUOR CONTROL COMMISSION

**Supplemental Form:
Producer Propagation Endorsement**

What is this form?

A producer licensee may apply for a propagation endorsement in order to grow additional immature marijuana plant canopy. Without a propagation endorsement, a producer is subject to the following limits for immature canopy:

- Micro Tier I: 625 square feet
- Micro Tier II: 1,250 square feet
- Tier I: 5,000 square feet
- Tier II: 10,000 square feet

With a propagation endorsement, a producer may designate additional immature canopy beyond these limits if this additional immature canopy is needed to produce immature plants for sale to other licensees.

Adding additional immature canopy will constitute a material or substantial alteration of the licensed premises or the usage of the licensed premises, which requires OLCC approval. In addition to obtaining this endorsement, you will need to submit an [Alterations to a Licensed Premises](#) request and receive approval prior to altering the premises or the usage of the premises.

How do I apply?

1. Fill out this form, completely and legibly.
2. Email this form to OLCC.MarijuanaAssignments@oregon.gov with the subject line "Propagation Endorsement". Attach this form to the email.

Section 1 – Producer Information

Application/License ID:	
Applicant/Licensee Name:	

Section 2 – Propagation Plan

As an applicant/licensee representative, I affirm that:

- I will produce immature plants for sale to other licensees; **and**
- This additional immature canopy is necessary in order to produce immature plants for sale to other licensees
