

## Marijuana Rules Advisory Committee and OLCC Technical Committees

In order to implement Measure 91, the Oregon Liquor Control Commission is required to establish a Rules Advisory Committee (RAC). The RAC is charged with assisting in development of the fiscal impact statement and helping the Commission develop the set of rules necessary to implement the provisions of Measure 91.

Due to the complexity of the issues surrounding Measure 91, the OLCC will establish technical committees of subject matter experts who will assist the RAC and the OLCC in fully understanding the impact that the draft rules will have upon specific areas of the regulated marijuana market. Two Technical Committees; *Licensing, Compliance & Enforcement*, and *Labs* will be ongoing to educate and inform the RAC and OLCC staff on issues and topics in the recreational market.

At the time of formation, all committees will engage in a group charter process. Each subject matter technical committee will report to the *Licensing, Compliance & Enforcement*, and the *Labs* committees who will in turn, work with the OLCC Director and staff to prepare recommendations for the RAC. All committees will apply rigorous project management methodology to produce accountability and the best possible results for the public.
