Technician Vacancy Announcement Number

N/A

DESCRIPTION OF DUTIES

(1) Directs, monitors or performs overall maintenance, servicing, inspections and documentation for one or more aircraft. Work is performed in complex working conditions under time and/or mission constraints to include all weather and night operations. Works with, coordinates and oversees the work of subordinate aircraft mechanics. Coordinates and oversees the work of journey level workers in other trades working simultaneously on the assigned aircraft. Reviews, trains and prepares to perform battle damage assessment/repair. Participates in mission generation/regeneration operations. Directs multiple specialists in preparing aircraft for combat operations. Expedites aircraft operations to include concurrent servicing, hot pit refueling and/or combat turns or integrated combat turns. Performs preflight, postflight, thru flight, periodic, isochronal, phase, hourly and special inspections, as well as servicing, defueling, scheduled and unscheduled maintenance. Serves as the technical authority to advise on, inspect and approve all airframe, mechanical, electrical/environmental, avionics, engine and pneudraulic repairs on assigned aircraft. Works closely with the production control function to report current aircraft status, requests and coordinates specialist support for accomplishing maintenance exceeding sortie generation capabilities or time constraints. Controls and performs work assignments based upon priorities, workload, availability of parts, facilities, material and personnel. Assigns maintenance and repair functions to subordinate mechanics. Coordinates with production control to direct short notice availability of the aircraft to accomplish work on delayed discrepancies and other scheduled maintenance to meet mission requirements. Observes and inspects performance and work procedures to ensure compliance with applicable technical publications, directives and local policy. Accomplishes operational tests of aircraft systems and components. Directs and performs the ground movement of aircraft. Launches, recovers, parks and services aircraft. Performs end of runway inspection. Installs, removes, inspects and adjusts aerial delivery systems to mission requirements. Makes diagnoses and solves malfunctions of aircraft systems and components by utilizing a wide variety of complex state of the art computerized and/or non computerized diagnostic and precision equipment, by studying layout drawings, blueprints and wiring diagrams and by analyzing construction and operating characteristics of aircraft and their components. Performs or oversees maintenance such as troubleshooting, removing, repairing, replacing, rigging, aligning, cleaning, painting and corrosion control. May be required to assist DEPOT level maintenance activities on individual assigned aircraft discrepancies. Ensures all mission associated support (-21) equipment is available and serviceable for deployment and employment.

(2) Ensures aircraft documentation and Maintenance Information Systems (MIS) accurately reflect the airworthiness of the Aircraft. Provides technical guidance and assistance to flight crews regarding observed discrepancies and experienced in-flight characteristics and system malfunctions. Performs or assists in aircrew debriefing when required.

(3) Performs in-process and final inspection of aircraft and components undergoing repair, overhaul and/or modification to verify and certify by signature adherence to work techniques, procedures and quality standards established by applicable publications. Completed work is reviewed for adherence to maintenance policy independently to determine that the aircraft is prepared and safe for flight. Due to the nature of operations tempo, must make decisions on a wide range of matters that may involve changes to past precedents to ensure completion of the mission. Clears Red X symbols on aircraft forms, accomplishes or directs engine power runs, may taxi aircraft in accordance with applicable directives.

(4) Plans, develops and conducts training during the technician work week to a multi facet workforce comprised of from 3 to 8 assigned military positions. Training sessions are designed to provide instructions in techniques of repair and maintenance of aircraft and related equipment. Conducts and certifies Cross Utilization Training (CUT) of non WG-88XX series Aircraft Mechanics to meet mission requirements. Selects the appropriate instructional method, utilizing either formalized classroom or practical on-the-job method of instruction. Evaluates and certifies effectiveness of training by observation as the trainee performs the task(s). Determines experience and skill level of assigned personnel. Maintains Career Field Education and Training Plan (CFETP) for assigned members.

(5) Prepares for and participates in various types of readiness evaluations, inspections, mobilization and command support exercises and Operations Other Than War (OOTW). May be required to perform such additional duties as structural firefighting, aircraft fire/crash/rescue duty, security guard, snow removal, munitions loading and handling, heavy equipment operation, maintenance of facilities and equipment or to serve as a team member on boards to cope with natural disasters or civil emergencies. May be required to travel in military aircraft and drive military vehicles. May be required to participate in various periods of temporary duty away from place of assignment.

(6) Complies with safety, fire, security, environmental and housekeeping regulations. Ensures that material and equipment are properly and safely protected and maintained.

(7) Performs other duties as assigned.
