MSgt Christopher Campbell / christopher.campbell.54@us.af.mil / 503-335-4236

DUTIES AND RESPONSIBILITIES

1. Advanced Testing & Flaw Detection: Select and perform complex nondestructive inspection (NDI) methods – including radiographic (X-ray), ultrasonic, eddy-current, magnetic particle, optical, and liquid penetrant testing – to locate hidden structural defects, delaminations, and heat damage.
2. Fluid & Oil Analysis: Conduct wear-metal and chemical fluid analysis on engine lubricating oils, chip detectors and subsystems to predict component or engine failures prior to occurrence.
3. Establish and monitor radiation safety areas, compute personnel exposure data, and ensure strict adherence to safety directives during X-ray operations.
4. Metallurgical & Material Evaluation: Determine precise metallurgical properties, such as alloy types, tempers, and material conductivity.
5. Supervision & Training: Manage NDI laboratories and workflow, supervise junior technicians (3- and 5-level Airmen), and provide technical guidance on testing procedures and equipment operation.

6. Quality Control & Record Keeping: Maintain accurate inspection records, interpret diagnostic readouts for repair centers, and enforce safety, hazardous waste disposal, and tool control programs.
7. Perform other duties as assigned.
