INTRODUCTION

Oregon provides many different opportunities for All-Terrain Vehicle (ATV) use, also known as Off-Highway Vehicle (OHV). The term ATV is generally used for all four classes of vehicles as described by Oregon law, which are:

• Class I (4-wheeler)
• Class II (trucks, Jeeps and sand rails)
• Class III (motorcycles)
• Class IV (side-by-side)

This handbook is your starting point to find information you need to know: an explanation of laws and rules, an overview of vehicle requirements, how to get an ATV Safety Education Card, requirements for youth riders, and a map with the riding areas and contact information for each area’s land manager.

The Oregon Outback, near Lakeview.
Where to Go

Oregon ATV opportunities are diverse. The state has over 50 designated trail systems and thousands of miles of dispersed trails and natural surface roads. You can ride sand dunes, open desert and wooded mountain trails. More than 60% of Oregon is public lands, meaning most designated riding areas are on public property.

Designated riding areas tend to have “higher” levels of service, which may include amenities like regular trail maintenance, posted signs and maps, and staging area facilities. “Lower” service level areas may be less developed but provide more opportunities for exploration and solitude on your ride.

Look at the map of designated riding areas on pages 40-41 and contact information on pages 71-77. Most land managers have geo-referenced trail maps you can access from their websites and download to your phone or tablet.

7 reminders for riding in Oregon:

1. All vehicles must display an ATV Permit (sticker). Permits cost $10 and are valid for two years. Purchase one online at store.oregonstateparks.org.

2. All riders must have an ATV Safety Education Card (see page 19 for details).

3. Youth riders must be supervised at all times.

4. Youth riders must wear a helmet.

5. Youth riders must properly fit their machine.

6. Washington and Idaho permits are no longer accepted.

7. Riders with a suspended or revoked driver license cannot operate an ATV.
Class I ATVs are known as 4-wheelers, quads or 3-wheelers. They can be 2- or 4-wheel drive. They also include 6x6 Class ATVs. Note: The Polaris Ace is considered a Class IV because it has a steering wheel and a seat.

**Class I defined (ORS 801.190)**
- Vehicle 50” wide or less
- Dry weight of 1,200lbs. or less
- Uses handlebars for steering
- Has a seat designed to be straddled by the operator
- Travels on three or more pneumatic tires that are 6” or more in width and has wheels with a rim diameter 14” or less.

**Class I vehicle requirements**
- **ATV Permit (sticker).** An ATV Operating Permit is required for your machine if you are operating it on lands open to ATV use. Permits are $10 and valid for two years. Purchase through our online store: store.oregonstateparks.org.
- **Insurance.** Liability insurance is not required for Class I vehicles but strongly encouraged to protect you from a lawsuit if you have an accident.
- **Titles.** Titles are not required for Class I ATVs, but titles are often required by banks or insurance companies in order to finance or insure a vehicle. Class I ATVs cannot be registered to get a license plate.
• **Equipment.** Meet the safety equipment standards in OAR 735-116-0000, including seat and foot pegs or floor pan, which protects rider’s feet. Must also have working brakes and a secure fuel tank. Must have a flag when operating on sand and headlights and taillights when operating after dark.

• **Mufflers.** Adequate muffler to limit sound emissions to 97 dBA. Spark arrestor during fire season.

• **Fire Season.** During fire season, there may be extra restrictions on equipment and where you can drive.

### Class I operator requirements

• **ATV Safety Card.** All operators must hold a valid ATV Safety Education Card (see page 19). Operators with a suspended or revoked driver license may not operate any class of ATV.

• **Helmets.** Youth under 18 must wear a DOT-approved helmet with the chin strap fastened (ORS 821.202).

• **Youth under 16:**
  1. Must be supervised by an adult who is at least 18 years old, holds a valid ATV Safety Education Card, and can provide immediate assistance and direction to the youth.
  2. Must meet rider fit rules, including arm, hand and leg length.

    - Brake reach: With hands placed in the normal operating position and fingers straight out, the first joint from the tip of the middle finger must extend beyond the brake lever.

    - Leg length: When sitting and with feet on the pegs, the knees must be bent at least 45 degrees.
- Grip reach: While sitting upright on the ATV with hands on the handlebars and not leaning forward, there must be a distinct angle between the upper arm and forearm.

- Handlebar turning: The operator must be able to turn the handlebars from lock to lock while maintaining grip on the handlebars and maintaining throttle and brake control.

Operators with disabilities may use prosthetics or modified or adaptive equipment to achieve rider fit for Class I or IV ATVs.

3. In addition to successful completion of an online ATV safety training course, the youth must also successfully complete a hands-on training course. Visit OregonOHV.org for details.
Class II ATVs include pickup trucks, SUVs, Jeeps, rock crawl vehicles and sand rails. They may be street legal or for off-highway use only.

Class II defined (ORS 801.193)

- Weighs more than 1,200lbs. or is wider than 50”
- Is designed for or capable of cross-country travel on or immediately over land, water, sand, snow, ice, marsh, swampland or other natural terrain
- Is actually being operated off a highway
- Is not a Class IV all-terrain vehicle (side-by-side)

If a side-by-side or 4-wheeler does not meet the definition of its category, such as after installing tracks, then it is defined as Class II vehicle.

Class II vehicle requirements

- **ATV Permit (sticker).** An ATV Operating Permit is required for your machine if you are operating it on lands open to ATV use. Permits are $10 and valid for two years. Purchase online at [store.oregonstateparks.org](http://store.oregonstateparks.org). If the vehicle has a license plate, it needs an ATV Permit on trails or sand dunes. If you are operating a vehicle with a valid license plate on roads open to passenger vehicles (such as logging roads), then you do not need an ATV Permit.

- **Insurance.** Liability insurance is required by law for all Class II vehicles (ORS 806.012 and 806.020). Contact your insurance company for more information.

- **Titles.** Titles are required for vehicles with a registration (license plate). Vehicles without a plate, such as a sand rail or rock crawler, do not need a title. Note: A title is often required by banks or insurance companies in order to finance or insure a vehicle.
• **Equipment.** Meet the safety equipment standards in OAR 735-116-0000 including: 2lb. fire extinguisher; roll bar or enclosed cab; seats and seat belts for operator and all passengers; and windshield wiper, if equipped with a windshield. Must also have working brakes, a secure fuel tank, and floor pan, which protects rider’s feet. Must have a flag when operating on sand and headlights and taillights when operating after dark.

• **Mufflers.** Adequate muffler to limit sound emissions to 95 dBA for front-engine vehicles and 97 dBA for mid- or rear-engine vehicles.

• **Fire season.** During fire season, there may be extra restrictions on equipment and where you can drive. This depends on the land owner and the time of the year. As a general rule, during fire season you should have a shovel and fire extinguisher for every vehicle when in the forest. You will also need a muffler and an exhaust system in good working order; this prevents sparks. Some areas may restrict use to improved roads free from vegetation.

**Class II operator requirements**

• **License.** Driver license or instruction permit. Operators with a suspended or revoked driver license may not operate any class of ATV.

• **Helmets.** Youth under 18 must wear a DOT-approved helmet with the chin strap fastened except when vehicle is registered (street legal) and has a roof or roll bar (ORS 821.202).

• **Seat.** Vehicle must be equipped with a securely mounted seat for the driver and each passenger.

• **Seat belts.** Vehicle must be equipped with securely mounted seat belts of the quick-release type and be readily available for use for the driver and each passenger. Youth under 16 must wear safety restraints in accordance with ORS 811.210, including child seats for children weighing less than 40lbs. Seat belts must be worn by everyone while on a road that is open to passenger vehicles, including gravel roads.
Class III ATV
(motorcycles)

Class III ATVs are 2-wheeled motorcycles. This includes dual sport (street legal) motorcycles that are ridden on trails.

Class III defined (ORS 801.194)

- Vehicles traveling on two tires
- Is actually being operated off highway

Class III vehicle requirements

- **ATV Permit (sticker).** An ATV Operating Permit is required for your motorcycle if you are operating it on lands open to ATV use. Permits are $10 and valid for two years. Purchase online at [store.oregonstateparks.org](http://store.oregonstateparks.org).
  
  Dual-sport motorcycles with a license plate, need an ATV Permit on trails or sand dunes. If you are operating a vehicle with a valid license plate on roads open to passenger vehicles (such as logging roads), then you do not need an ATV Permit.

- **Insurance.** Liability insurance is not required for Class III ATVs, unless they are street legal.

- **Titles.** Titles are not required for Class III ATVs, but a title is often required by banks or insurance companies to finance or insure a vehicle. Class III ATVs can only be registered to get a license plate if they were manufactured for highway use. Off-road motorcycles cannot be converted to be street legal.

- **Equipment.** Meet the safety equipment standards in OAR 735-116-0000, including seat and foot pegs or floor pan which protects rider’s feet. Must also have working brakes and a secure fuel tank. Must have a flag when operating on sand, and headlights and taillights when operating after dark.

- **Mufflers.** Adequate muffler to limit sound emissions to 99 dBA. Spark arrestor during fire season.

- **Fire season.** During fire season, there may be extra restrictions on equipment and where you
can drive. This depends on the land owner and the timing of the year. As a general rule, during fire season you should have a shovel and fire extinguisher for every vehicle when in the forest. You will also need a muffler and an exhaust system in good working order, which prevents sparks. Some areas may restrict use to improved roads free from vegetation.

Class III operator requirements

• **ATV Safety Card.** All operators must hold a valid ATV Safety Education Card for trail use. Operators with a suspended or revoked driver license may not operate any Class of ATV. Dual-sport riders with a motorcycle endorsement still need an ATV Safety Card when on trails or sand dunes. If you are operating a motorcycle with a valid driver license on roads open to passenger vehicles (such as logging roads), then you do not need an ATV Safety Card.

• **Helmets.** Youth under 18 must wear a DOT-approved helmet with the chin strap fastened (ORS 821.202).

• Youth under 16:
  1. Must be at least 7-years-old.
  2. Must be supervised by an adult who is at least 18-years-old, holds a valid ATV Safety Education Card and can provide immediate assistance and direction to the children.
  3. In addition to successful completion of an online ATV Safety training course, the youth must also successfully complete a hands-on training course. Visit [OregonOHV.org](http://OregonOHV.org) for details.

If a ski and tracks are installed for use in the snow, then by law the vehicle is considered a snowmobile and needs a snowmobile title and registration.
Class IV ATVs are commonly known as side-by-sides. In broad terms, side-by-sides are vehicles with a steering wheel, non-straddle seat and roll cage. Recreation Off-Highway Vehicles (ROHV) and Utility Task Vehicles (UTV) are both considered Class IV ATVs. UTVs have a max speed of 30mph. The single-seat Polaris Ace is also a Class IV. Land managers may designate side-by-side trails based on attributes like narrow bridges or tight trees. 50” or 65” are common trail width designations.

**Class IV defined (ORS 801.194)**
- Is 80” wide or less at its widest point
- Has a dry weight of 2,500lbs. or less
- Has non-straddle seating
- Has a steering wheel for steering control
- Travels on four or more pneumatic tires that are 6” or more in width and has wheels with a rim diameter 14” or less.

**Class IV vehicle requirements**
- **ATV Permit (sticker).** An ATV Operating Permit is required for your machine if you are operating it on lands open to ATV use. Permits are $10 and valid for two years. Purchase online through store.oregonstateparks.org.
- **Insurance.** Liability insurance is not required by for Class IV vehicles but strongly encouraged to protect you from a lawsuit if you have an accident.
- **Titles.** Titles are not required for Class IV ATVs, but a title is often required by banks or insurance companies to finance or insure a vehicle. Class IV ATVs cannot be registered to get a license plate.
- **Equipment.** Meet the safety equipment standards in OAR 735-116-0000. Includes: 2lbs. fire extinguisher; roll bar or enclosed cab; seats and seat belts for operator and all passengers;
and windshield wiper, if equipped with a windshield. Must also have working brakes, a secure fuel tank and floor pan, which protects rider’s feet. Must have a flag when operating on sand and headlights and taillights when operating after dark.

- **Mufflers.** Adequate muffler to limit sound emissions to 97 dBA. Spark arrestor during fire season.

- **Fire season.** During fire season, there may be extra restrictions on equipment and where you can drive. This depends on the land owner and the timing of the year. As a general rule, during fire season you should have a shovel and fire extinguisher for every vehicle when in the forest. You will also need a muffler and an exhaust system in good working order, which prevents sparks. Some areas may restrict use to improved roads free from vegetation.

**Class IV operator requirements**

- **License.** Must have a valid driver license or instruction permit. If under age of 16, may operate a youth machine, with ATV Safety Education Card and adult supervision. Operators with a suspended or revoked driver license may not operate any class of ATV. Example: Polaris recommends that riders be at least 10 years old when operating the Polaris RZR 170. An age-appropriate youth would be allowed to operate this vehicle if the youth has been trained and has a valid ATV Safety Education Card.

- **Helmets.** Youth under 18 must wear a DOT-approved helmet with the chin strap fastened (ORS 821.202).

- **Seat.** Vehicle must be equipped with a securely mounted seat for the driver and each passenger.

- **Seat belts.** Vehicle must be equipped with securely mounted seat belts of the quick-release type and be readily available for use for the driver and each passenger. Youth under 16 must wear safety restraints in accordance with ORS 821.202, including child seats for children weighing less than 40lbs. Seat belts must be worn by everyone while on a road that is open to passenger vehicles, including gravel roads.
• Youth under 16 who do not have an instruction permit:
  1. Must be supervised by an adult who is at least 18 years old, holds a valid ATV Safety Education Card and can provide immediate assistance and direction to the children.
  2. Can only operate a machine that has a manufacturer recommendation for their age. While sitting in the normal operating position, youth must also be able to fully operate all hand and foot controls.
  3. Must also successfully complete a hands-on training course. Visit OregonOHV.org for details.

ATV Permit

ATV Permits in Oregon

An ATV Operating Permit (sticker) is required for your machine if you are operating it on lands open to ATV use. The price is $10 and is valid for two years.

Each permit represents the number of ATVs in Oregon and the appropriate fuel taxes are placed in the ATV Grant Fund. About $100 of fuel taxes are applied to every permit purchased in Oregon. These funds are put back on the ground to keep your riding areas open and in good condition.

To purchase a permit, you need to have make, model, class type (ATV, motorcycle, 4x4, side-by-side) and Vehicle Identification Number (VIN) for each ATV. You do not need a title or registration to purchase a permit.

It is highly recommended to have all of your vehicles titled. A title is often required to finance or insure an ATV. A title also establishes legal ownership and assists police in the recovery of lost or stolen vehicles.

Insurance: Insurance is not required for Class I, III, or IV ATVs used solely off-road. Cities and counties in Oregon that allow ATVs on their roads require liability insurance. Oregon’s
mandatory insurance law requires insurance for all Class II ATVs. It is highly recommended that you have insurance on your vehicle to protect yourself, the vehicle, and others if an accident does occur.

There are two ways to purchase a permit:

1) **Buy online**

Go to our State Parks online store at [store.oregonstateparks.org](http://store.oregonstateparks.org) to purchase. You will be emailed a receipt, to print or save on your phone, to show in the field, until your sticker arrives in the mail. It is good for 21 days.

2) **Find an onsite agent**

There are over 90 private ATV Permit agents located throughout the state along with several State Parks Offices in which to purchase a permit for placement on your vehicle. [bit.ly/OregonATVpermitAgents](http://bit.ly/OregonATVpermitAgents)

**Out-of-state Permits**

An ATV Operating Permit issued in another state is only honored in Oregon if the issuing state also honors Oregon-issued ATV Operating Permits. Oregon accepts permits from 19 states: California, Nevada, Arkansas, Connecticut, Delaware, Florida, Indiana, Louisiana, Michigan, Minnesota, Missouri, New Mexico, New York, Oklahoma, Ohio, Pennsylvania, Rhode Island, Tennessee, and Vermont. This list is subject to change, and [OregonOHV.org](http://OregonOHV.org) has the most current list. Out
of state residents from the other 30 states can purchase an Oregon permit for $10 and is valid for two years.

Washington, Idaho, Utah, Arizona, Colorado, Montana, and Wyoming no longer accept Oregon ATV Permits; therefore, Oregon does not accept their permits.

Visit OregonOHV.org for:

• A list of states that accepts Oregon permits
• A list of state permits that are valid in Oregon
• How Oregonians get out of state permits for the 16 states that require them

**Out of State License Plates**

Some states, such as Washington, Arizona, Utah, and Idaho issue “Restricted Use” license plates for ATVs, which allows them to operate on certain paved roads in their states, often under 45 mph. Those vehicles are NOT street legal in Oregon.

**Ocean Shore ATV Operating Permits**

Ocean Shore ATV Operating Permits are issued by OPRD. A person with a disability can establish they are entitled to a reasonable accommodation by providing OPRD a copy of physician’s letter; DMV disabled placard; veterans letter; or Oregon State Parks Special Access Pass.

Once established, they can qualify for a permit to operate a Class I ATV (4-wheeler) or Class IV ATV (side-by-side) on certain ocean shore areas. However, upon request from an individual with a disability, OPRD may issue such a permit for sections closed to motorized use using criteria established under OAR 736-004-0062.

For more information, please contact 503-881-4637.
Note: The riding area land manager may impose stricter sound limit restrictions; check with the land manager before you go.

- Oregon Dunes National Recreation Area (ODNRA) is 93 dBA.
- Sand Lake Recreation Area is 97 dBA* (Front engine vehicles must follow State standard of 95 dBA)
- Cline Buttes is 96 dBA (front engine vehicles must follow state standard of 95 dBA)

Most land managers listed on the Where to Ride map (pages 40–41) have a sound meter. Contact them the next time you plan on visiting the area. Many OHV clubs also have sound meters and checks are often conducted at OHV events.

Spark Arrestor

Class I, III and IV ATVs are required to have USFS-approved spark arrestors or endcaps. Most mufflers or endcaps will be stamped “USFS Approved Spark Arrestor” if it meets the requirement. Many vehicles come with spark arrestors. Motorcycles and 4-wheelers built for closed-course competition (cross-country or motocross) often do not have spark arrestors. Also, some after-market exhausts do not have spark arrestor.

Class II vehicles need a muffler and an exhaust system in good working order.

ATV Violations

Dangerous operation:
• Permitting dangerous operation of ATV (Owner allows underage or intoxicated driver) (821.250)
• Dangerous operation of ATV (speeding, negligence, endangering others, jumping without spotter) (821.290)

Vehicle equipment:
• Operating ATV w/o required equipment (lights, muffler, flag, foot pegs, etc.) (821.040) (also includes OAR 735-116-0000)
• Operating an ATV without proper lighting (821.230)
• Operating ATV without off-road permit (821.195)
• Fail to carry out-of-state ATV permit (821.142)

Operator requirements:
• Operating Class I/III ATV without driving privilege (821.170/172)
• Failure to wear helmet on ATV if under 18 (821.202)
• Endangering Class I/III ATV rider or passenger under 18 who is riding without helmet (821.203)
• Endangering Class I/III operator – Parent allows child to operate ATV without Safety Card, or unsupervised (821.292)
Closed areas:
- Operating ATV in posted closed area (821.192)
- Operating motor vehicle on closed sections of the ocean shore (390.678)
- Unlawful operation of all-terrain vehicle on highway or railroad (821.190)
- Committing unlawful damage (821.280/285)
- Treble damages for damage to property (821.310)

Hunting/firearms:
- Operating ATV with loaded firearm (821.240)
- Hunting or harassing animals from ATV (821.260)
- Casting artificial light from vehicle while possessing certain weapons (166.663)
- Discharging weapon on or across highway (166.630)

Other Motor Vehicle Violations that apply to ATVs:
- Driving while suspended or revoked (811.175 class A traffic) (811.182 criminal)
- Open container of alcohol (811.170)
- Operation with obstructing passenger (811.190)
- DUII (813.010)
- Driving uninsured (Class II only) (806.010)
- Fail to carry proof of insurance (Class II only) (806.012)
- Operating vehicle without driving privileges or in violation of license restrictions (807.010)
Oregon requires safety education for people operating Class I and III ATVs on public land. A free online ATV safety education course is available online at RideATVoregon.org.

The online course is designed to teach you about Oregon laws, safe riding practices and environmental awareness. You can print a 30-day temporary card and a permanent one will be mailed to you upon successful completion.

Out-of-state residents who do not have a similar state issued card in their state need to get the Oregon ATV Safety Education Card.

Youth under the age of 16 need to complete a hands-on course found at RideATVoregon.org/training within six months of successful online course completion.

For those age 16 and over
Take the free online course, available at RideATVoregon.org.

For those under age 16
Youth under age 16 must complete two-steps in order to obtain an ATV Safety Education Card.

• Step One – Take the FREE online course: RideATVoregon.org
• Step Two – Take a hands-on course

Once the youth has completed an approved online course, the youth will be given an
Instruction permit/certificate that is good for six months. After the youth has gained some riding experience and is familiar with the vehicle, it’s then time to find a hands-on course. The youth can then proceed to Step Two, which is to take a hands-on training or evaluation course.

**Class I (4-wheeler, 3-wheelers)** – ATV Safety Education Card required for all ages.

**Class II (sand rail, trucks, SUVs)** – Valid state-issued driver license or instruction permit required.

**Class III (off-road motorcycle)** – ATV Safety Education Card required for all ages.

**Class IV (side-by-side)** – Valid state-issued driver license or instruction permit. If under 16, an ATV Safety Education Card required unless they have instruction permit.

If you are renting an ATV, you get a 30-day temporary card from the rental agency after reading and signing an ATV Rental Safety Checklist.

For riders with no internet services or access to a public library, call 877-7SAFELY (877-772-3359) to request a Correspondence Course Equivalency Exam.

Oregon will only honor out-of-state ATV Safety Education Cards if they are officially issued by another state. The following states issue ATV safety cards:

If your state is not listed, and you want to ride in Oregon, you must first obtain an Oregon ATV Safety Education Card.
ATV Safety Card

Oregon requires an ATV Safety Education Card for youth operating ATVs on public land. A free online course is available at RideATVoregon.org. Youth under the age of 16 need to complete a hands-on course found at RideATVoregon.org/training, in addition to the online course within six months.

Minimum Age/Rider Fit

Class I (4-wheeler, 3-wheelers) – There is no minimum age, but youth must meet rider fit requirements.

Youths operating Class I (4-wheeler) ATVs that are too big for them are at serious risk of injury or death. Youth must meet all the following minimum physical size requirements (rider fit) in relationship to the vehicle:

- **Brake reach:** With hands placed in the normal operating position and fingers straight out, the first joint (from the tip) of the middle finger must extend beyond the brake lever.

- **Leg length:** When sitting and with feet on the pegs, the knees must be bent at least 45 degrees.

- **Grip reach:** While sitting upright on the ATV with hands on the handlebars and not leaning forward, there must be a distinct angle between the upper arm and the forearm.
• **Turning of handlebars:** The operator must be able to turn the handlebars from lock to lock while maintaining grip on the handlebars and maintaining throttle and brake control.

• Disabled operators are allowed to use prosthetic devices or modified or adaptive equipment to achieve rider fit for Class I or IV ATVs.

Class II (sand rail, trucks, SUVs) – Must be at least 15 years old with “driving privileges” (license or instruction permit).

Class III (off road motorcycle) – Must be at least 7 years old.

Class IV (side by side) – Operators under age of 16 must meet manufacturer’s age recommendation. Therefore, youth can only operate youth machines.

**Helmets**

DOT-approved helmets are required for youth under age 18 for all ATVs, except Class II (sand rail, trucks, SUVs), which are street legal (have a license plate and current registration).

Class I (4-wheeler, 3-wheelers) – Helmets required for all youth under 18.

Class II (sand rail, trucks, SUVs):

• Helmets required for all youth under 18 in non-street legal vehicles.

• Helmets not required for youth in street legal vehicles.
Class III (off-road motorcycle) – Helmets required for all youth under 18.

Class IV (side-by-side) – Helmets required for all youth under 18.

**Seat Belts**

All youth under age 16 must wear a seat belt and follow rules for highway use of child restraining seats. If a child must be in a child seat on the highway, they must also be in a child seat on a Class II ATV (sand rail, trucks, SUVs) or Class IV (side by side) ATV. A child should never be placed in child seat on a Class I ATV (4-wheeler) since it does not have a roll over protection system.

Oregon law also states that all Class II (sand rail, trucks, SUVs) or Class IV (side-by-side) vehicles must have a seat and seat belt for the operator and all the passengers. Therefore, extra passengers may not ride in the back of a pickup truck.

**Adult Supervision**

Adult supervision is required for youth operators under age 16.

- By law, a supervisor is defined as a person who is at least 18 years of age, holds a valid ATV Safety Education Card, and is able to provide immediate assistance and direction to the youth.

**Passenger Requirements**

- Helmet is required if under age 18 in all classes of ATVs. Both operators and passengers of all classes of ATVs must wear a DOT-approved helmet with the chin strap fastened if they are under age 18 (unless in a registered street legal Class II vehicle with a roof or roll bar).

- Seats and seat belts are required if under 16 in Class II and IV vehicles and must have securely mounted quick-release seat belts for the driver and each passenger.

- Children riding as passengers must follow ODOT on-road restraint requirements.
• All ATVs must have a floor pan or foot pegs that will keep the driver’s and passenger’s feet within the frame of or from underneath the vehicle. **Note: Riding double on a Class I (4-wheeler) and Class III (motorcycles) ATVs can be very dangerous.**

Additionally, there is a law that says that the passenger cannot be in the operator’s lap or embrace (ORS 811.190 “Driver Operations with Obstructing Passenger”). This is a Class D traffic violation.

If riding double on a motorcycle, you must have a second set of foot pegs, which are common on street legal motorcycles.

If riding double on a 4-wheeler, the passenger must be behind the operator and must have room for their feet on the foot pegs/floorboard. A passenger may not ride on the front or rear rack of a 4-wheeler since there is no foot protection.
• **Helmet** – The most important piece of protective gear is a DOT-approved motorcycle helmet to help prevent serious head injury. The fastened helmet should fit snugly and be worn with goggles. Side-by-sides are designed to have a helmet and seat belt work together in case of a crash.

• **Goggles** – Goggles are essential to help maintain your vision and protect your eyes. Goggles must fit tightly against your face to help keep sand, dust, and debris out of your eyes. Eyeglasses or sunglasses do not provide adequate eye protection. Goggles should be impact resistant. Consider colored lenses to help improve visual contrast during the day.

• **Gloves** – A good pair of riding gloves will provide protection and comfort while riding. Gloves help to maintain handle bar and steering wheel grip while preventing your hands from getting cold, bruised, scraped, and sore.

• **Long-sleeve shirt and long pants** – Help to prevent scratches and abrasions while providing a needed barrier between your skin and the elements. Generally, the stronger the material, the better.

• **Sturdy, over-the-ankle boots** – Provide ankle support and help to prevent your feet from slipping off the footrests. They also protect your feet and lower legs from hazards like rocks and tree roots, and offer protection from sharp or hot parts of your vehicle.

• Based on the riding conditions, people may also wear additional gear such as chest protectors, knee pads, elbow pads, neck brace, and kidney belts.

Operating an ATV can result in injuries. This equipment will not prevent all injuries. You operate an ATV at your own risk.
ATVs are popular vehicles for hunting. Hunters must follow the same rules as other ATV operators. This includes displaying a valid ATV Operating Permit, carrying an ATV Safety Education Card, observing the same training and equipment requirements, adhering to sound level regulations, and riding only on designated routes.

Scouting and retrieving game must be done on designated trails and roads. Harvested game can be carried by hand to a road or trail and then taken by vehicle. Some areas allow cross-country travel. Game shouldn’t be shot if it can’t be packed out. Leaving a new set of cross-country tracks invites others to follow and creates a dead end trail for future riders.

Rules

• No hunting or harassing animals from a snowmobile, ATV, or passenger vehicle.

Exception: Hunters with disabilities may qualify for and obtain an Oregon Disabilities Hunting and Fishing Permit to hunt from a motor-propelled vehicle, except while the vehicle is in motion; the vehicle is on any public road or highway; or the vehicle is within a Cooperative Travel Management Area, as outlined in the General Hunting Regulations published by the Oregon Department of Fish and Wildlife.

• Do not shoot from an ATV.

• Do not shoot from or across a public right-of-way or railroad right-of-way (ORS 166.630).

• Do not carry loaded firearms on an ATV.

Note: A loaded firearm is one having live ammunition in the chamber or arrows out of a quiver. A person who has a license to carry a concealed handgun is allowed to carry a loaded firearm on an ATV (ORS 821.240).
• Do not cast artificial light from a motor vehicle while in possession of a weapon or cast an artificial light upon a game mammal, predatory animal or livestock from within 500' of a motor vehicle while in possession of a weapon (ORS 166.663).

• Always carry your ATV Safety Education Card.

Tips

• Stay on designated trails and roads. Respect closed roads and trails.

• Know and understand the meaning of trail signs and vehicle symbols.

• Remember that other hunters may be in the area on foot. Respect other hunters’ rights.

• Do not consume alcohol while riding ATVs and hunting. Laws concerning driving under the influence of intoxicants also apply to ATVs.

• Limit ATV use in and around campgrounds. Be respectful of other campers’ desires for quiet and minimal disruption.

• Avoid driving an ATV in wet conditions, wetlands, streams, and shorelines.
PLAN YOUR TRIP

• A well-planned trip makes for an enjoyable and safe ride. Contact the land manager of your destination before you go; ensure that the OHV area is open and check on the trail and weather conditions.

• Dress in layers to prepare for changing weather. Wear appropriate protective gear.

• Reserve a campsite in advance if you are going on an extended trip.

• Ride with someone; never go alone.

• Always let someone know where you are going and when you plan on returning. Consider leaving a map of the riding area with that person. If you need help, they will know where to look.

• Know the rules of the ATV area before you go.

• Make sure your machine is not too loud for the area and that you have the proper equipment installed.

• Keep your machine in good shape. Always inspect your machine before each trip to ensure it is in good mechanical shape.

• Carry the basics with you on the trail, including:
  - Water and snacks
  - Basic tools to make on-the-trail repairs
  - Basic first aid kit
  - Extra spark plugs
  - A tow strap
  - Waterproof matches or lighter
  - Tire repair kit
  - A cell phone, CB or two-way radio. Many riding areas have limited cell service. Higher elevations and view points can sometimes get a signal. Text messages can sometimes work when phone calls can’t go through.
  - Duct tape
  - Knife
  - Emergency blanket
Map of riding area. Many riding areas are in locations without cell phone service. Most agencies have geo-referenced maps that are saved in a PDF format. These maps can be saved to a phone or tablet with GPS capabilities and used without cell service. The GPS will pinpoint your location on the trail map. You should carry an extra battery or a 12-volt charger you can charge from your ATV.

Riding in the Dunes

Sand Hazards

Be aware of:

- Razorbacks (aka slipface) located on the downwind sides of dunes where loose sand creates steep drop-offs. Do not cross straight over a razorback.

![](image1)

- Dune crests – Approach dune crest at an angle so you are able to scan the terrain and look for other riders. Use caution as there may be other riders approaching from the opposite side of the crest.

![](image2)
• Deep depressions – these deep depressions typically located within hillsides can vary in size and be hard to see. If you approach one, slow down and let others know.

• Depth perception – The sand colors blend together making it difficult to judge distance and contours. Wearing orange- or yellow-colored lenses can help you see better during the day.

• Downed trees, lakes, streams, soft and saturated sand – Traveling through changing terrain can cause you to lose control of the vehicle.

Flags
Highly visible red or orange flags are required on all vehicles within the Oregon Dunes National Recreation Area (ODNRA), Sand Lake Recreation Area and Christmas Valley. They must measure 8” by 12” and be displayed 9’ above the ground on all ATVs.

Sound
Residential areas surround the ODNRA and Sand Lake Recreation Area. Sound buffers help reduce noise. U.S. Forest Service (USFS) personnel are equipped to provide sound checks. Call ahead or request a test before riding. Some OHV dealers also have sound testing equipment.

Lights
Bright lights can blind an oncoming rider, especially when entering a staging area. Law enforcement has started citing people for failure to dim (811.515).

Jumping
Always have a spotter at the top of the dune to make sure the area is clear of other riders and vehicles.

Alcohol Ban
Alcohol and ATVs don’t mix. Accidents and injuries, unsafe environments, and resource damage have led to an alcohol ban in the ODRNA and Sand Lake Recreation Area outside developed sites (36 CFR 260.50 and CFR 260.58). For more information, contact the USFS at 541-271-3611.
Beaches
Riding ATVs on the beach is allowed only at designated motorized vehicle sites. Sand Lake and Oregon Dunes National Recreation Area have sections of the beach open to ATV riding. The speed limit on Oregon’s beaches is 25 mph.

ATVs on Forest Trails

Wildfires
Many ATV areas close their trails in the summer, due to high fire danger. Fire conditions vary throughout the state so check with the land manager before you go. Most ATV areas require USFS-approved spark arrestors on ATVs to reduce the chance of starting a wildfire.

Protecting Resources
Riding off designated trails can damage sensitive areas, often forcing agencies to spend more time closing illegally created trails and less time maintaining or creating new designated trails.

Logging and Road Construction
Many trail systems are in forests that have active logging and road construction. Stay out of closed areas because they can be falling trees, even on weekends. Log trucks and dump trucks also use the same roads you might be using. These vehicles need the entire road and take a long time to stop.

Trail Signs
Learn how to read trail signs to determine the difficulty of a trail and the types of ATVs allowed.

Forest Roads
Forest roads are typically open to ATVs. Check road conditions, and remember that many forest roads are open to two-way traffic. Keep speeds low and watch for other vehicles. It could be a log truck or another ATV; you never know.

Keep Your Lights On
The forest canopy creates shady areas that make it hard for others to see you coming. Keep your lights on for safety!
Bright Clothing
Wear bright clothing, especially during hunting season.

Hunting Season
Find out if hunting is allowed where you ride.

ATVs in the High Desert

Fragile Ecosystem
The high desert is a fragile ecosystem. Please ride ATVs on designated trails and road systems only.

Sound Carries
In the high desert, natural sound buffers such as hills and valleys are few and far between. Keep muffler and exhaust systems in good working order and at or below the state’s recommended decibel levels.

Fences and Cattle
Do not cut fences. Respect the rights of property owners. Most central and eastern Oregon public lands are open to cattle grazing. Look out for cattle and slow down when nearing them. It is against the law to chase or harass livestock, game animals or any other wildlife.

Wildfires
Many ATV areas close their trails in the summer, due to high fire danger. Most ATV areas require USFS-approved spark arrestors on ATVs to reduce the chance of starting a wildfire.

Weeds
Weeds are non-native plants that displace natural vegetation. Weeds can increase soil erosion and degrade water quality.
Eradication is difficult and expensive. The best way to get rid of weeds is to prevent them from spreading!
• Stay on the established roads and trails.
• Check and wash your ATVs, pickups, and trailers before and after a drive. Seeds can stick to tires, radiators, and the undersides of vehicles.
• Clean your clothes of any weed seeds.
• Do not pick flowers or noxious weeds.
• Do not pick and transport wildflowers that you cannot identify.
• Do not camp in weed-infested areas.
• Report weed-infested sites to the land manager or the Oregon Department of Agriculture Weed Hotline: (866)-INVADER (468-2337).

Gravel and Paved Roads

• Paved roads and two-lane gravel roads are generally closed to non-street legal ATVs, unless posted open.
• Gravel roads, one and a half lanes wide or less, are generally open to ATVs. On USFS lands, all roads are closed unless posted open (as shown on their specific Motor Vehicle Use Map).
• You may cross a road at an intersection or at least 100’ from an intersection.
• Some cities and counties in Oregon allow ATV use on some paved roads. For more information go to OregonOHV.org.

As of January 2022, six counties have ordinances that allow ATV use. Grant County allows use on all their roads. Baker, Lake and Union counties allow use on most of their roads with exceptions on several high use roads. Klamath and Douglas counties each have one road open.

There are numerous cities, mostly in eastern Oregon, that allow ATV use. The cities with the most access to riding areas are Lakeside, Lakeview, Sumpter and Prairie City.

ATV Highway Access Routes are specifically designated sections of state highway that are open to ATV use. Currently Lakeside and Sumpter are the only two sections designated. Visit OregonOHV.org for detailed information on:

• ATV highway access routes on state highways
• County Ordinances
• City Ordinances
Oregon’s many great riding areas need respect and care. In some cases, it is simply a matter of treading lightly, staying on designated trails, packing out your own trash, and being responsible. In other cases, trails need serious work.

Ride Responsibly

Riding responsibly is the best way to protect your ATV access in Oregon.

- Know where you are permitted to ride and where you are not.
- Respect private property and closed areas. Private property or timberlands are often located adjacent or within OHV riding areas.
- Riders should never go onto private land unless they have permission from the land owner or the land is posted open to ATV use.
- Damage from OHV use cannot be effectively managed and maintained on private lands and reflects negatively on the perception of OHV users and the sport in general.
- Avoid wet areas and waterways. They are a vital resource for plants and animals.
- If you must cross water, ride carefully and only at designated spots.
- Cutting switchbacks and taking shortcuts damage trails and cause erosion.
- Share the trails and be friendly to other trail users. Respect their rights to the trail, too.
- Respect seasonal closures. They are needed to minimize damage to the trails and allow time for animals to reproduce undisturbed.
- View animals from a distance. They use valuable energy reserves when they flee.
- Know and respect the sound limits where you ride.
- Keep your RPMs and speed down and steady when you are around non-riders.
• Always use a spark arrestor. It doesn’t sacrifice power but can save the forest from fires.
• Maintain your exhaust system. Remember, noise doesn’t equal horsepower. Too little exhaust backpressure can actually reduce power and cause engine damage.
• If you pack it in, pack it out. Trash is an eyesore that endangers wildlife. Remember, even biodegradable materials such as food scraps take time to break down.

Volunteer

Please do your part to maintain the trails. Many clubs and land managers organize volunteer trail work parties throughout the year. By participating, you can show your interest and dedication to ATV recreation; you can learn about terrain, soils and trail layout. Working on foot and “in the dirt” can also improve your riding skills. Most work parties end with rides for participants.

Contact your local club or riding area land manager to see what work parties are scheduled. They depend on volunteers like you.

Land Use — What You Can Do

As an ATV rider, your involvement is the greatest resource to keeping land open to ATV recreation. Here are some ways to get involved:

• Attend meetings with OHV clubs, land use managers, and legislators. Let land managers and legislators know how much you enjoy public lands.
• Write to your state or federal land manager. A simple letter explaining how much you enjoy trail riding can have significant impact. Express your opinion and let your love of the sport be known.
• Write letters to your state and federal representatives. Let them know the importance of supporting motorized recreation.
• Attend trail maintenance work parties. Contact your local club or the land managing organization’s recreation coordinator for more information.

**Hand Signals**
When encountering people on the trail, raise a hand and signal the number of riders behind you.

- **One rider following**
- **Two riders following**
- **Three riders following**
- **Last rider in group**
Tillamook State Forest OHV area
Oregon has over 50 designated riding areas. This handbook has a map of the riding areas in Oregon, as well as information on each riding area. You can find more information online as well as links to each land manager. Most of these areas receive regular funding from fuel taxes and ATV sticker sales. Most areas have maps you can access online and sometimes save them as a PDF file that you can use on your cell phone without service.

Riding areas are managed by the U.S. Forest Service (USFS), Bureau of Land Management (BLM), Oregon Department of Forestry (ODF), counties and non-profit organizations. Rules may vary between each managing agency and riding area.

Sand Dunes

Oregon has over 20,000 acres of sand dunes open to ATV use. The Oregon Dunes National Recreation Area (ODNRA) managed by the U.S. Forest Service represents a large riding area between Florence and Coos Bay (10,000 acres). Just south of Florence, there are several dune access points. Between Reedsport and Coos Bay, there are multiple access points and campgrounds. These areas include: Spinreel, Winchester Bay, Riley Ranch and Horsfall. Further north near Tillamook is Sand Lake (1,000 acres), which has both dune and beach access. In southeast Oregon, north of Lakeview, are the BLM managed Christmas Valley Sand Dunes (9,900 acres), which is Oregon’s largest inland dunes riding area.

Central Oregon

There are over 1,000 miles of OHV trails within one hour from Bend. East Fort Rock is the largest area in Central Oregon, located east of Bend and La Pine. The area comprises mostly ponderosa pines and has higher elevations. The area is also generally snowed in during the winter but mostly ridable spring, summer, and fall. The Millican Area is east of Bend/Redmond and tends to be ridable during most of the winter. During the summer, the area can be very dusty. The Cline Buttes area, located between Bend, Redmond, and Sisters, is a newer area with Barr Road and Buckhorn staging areas.
Other Areas

Portland - Several riding areas are within a 1½ hour drive. To the west, the Tillamook State Forest, located in the Coast Range offers over 250 miles of trails. Further west, Sand Lake is the closest dune access area. To the east, Mount Hood National Forest has three main riding areas: McCubbins Gulch, Rock Creek, and La Dee Flats. In the Columbia River Gorge, Hood River County Forestry has over 60 miles of trails near the well-known Post Canyon Mountain Bike Area.

Salem - To the west, Nestucca is a smaller riding area geared more towards motorcycles and ATVs. To the east at the summit of the Cascades, the Santiam Pass offers a variety of trails for ATVs and side-by-sides. These riding areas often get closed due to snow levels in winter.

Eugene - To the west, the sand dunes just outside of Florence are extremely popular. To the east you can ride trails at Shotgun Creek and Huckleberry Flats. These areas often get closed due to snow levels in the winter.

Medford - Just west, outside of Jacksonville, are trails within the Lily Prairie OHV area managed by the Motorcycle Riders Association. BLM also manages trails adjacent to Lily Prairie. To the east, USFS manages many miles of ATV trails within the Prospect OHV Area.

NE Oregon - Several large trail systems are available: Morrow County OHV Park (Heppner), Winom-Frazier (south of Pendleton), Mount Emily Recreation Area (La Grande) and Virtue Flat (Baker City). There are also many miles of U.S. Forest Service managed gravel and dirt roads open to ATV use.

SE Oregon - Christmas Valley is a popular dune riding area located about one hour north of Lakeview. From Klamath Falls to Burns, there are many miles of BLM and USFS roads and trails open to exploring.
This map shows general locations of OHV recreation sites in Oregon. For specific directions, contact the land manager (next page).
1 NICOLAI MOUNTAIN OHV AREA
(46.150667, -123.451617) Elev. 991’
CONTACT: OREGON DEPARTMENT OF FORESTRY (ODF)
Astoria Office
92219 Hwy 202, Astoria, OR 97103
503-325-5451
WEBSITE AND TRAIL MAP: oregon.gov/ODF/Recreation.
Click on “Off-highway vehicle (OHVs) trails.”
SITE LOCATION: U.S. Hwy 30 to Shingle Mill Road (milepost 75.5). Head south on Shingle Mill Road to milepost 1.5. Turn left on spur road.
SITE DESCRIPTION: Clatsop County contains approximately 425,000 acres of forest lands. The Nicolai Mountain area is surrounded by private timber companies that do not allow OHVs. Please respect the closures. The area offers limited parking and approximately 30 miles of easiest to more difficult trails, open to quads, motorcycles, and side-by-side ATVs. Trails open to side-by-side ATVs are limited to 65” in width, and are not open to jeeps and other 4x4 vehicles. Dispersed camping is permitted. Please use established sites and pack out all trash. Be aware that cell phone service is spotty in the area.
An OHV map of the area is available online and from the Astoria District Office.
SEASON: Year-round. Riding is best in spring and fall. In summer, trails get dusty and areas may close due to fire restrictions or to protect wildlife. Area may be snowed in during the winter. Contact the land manager for trail status.

2 TILLAMOOK STATE FOREST OHV AREAS
(45.612597, -123.349542) Elev. 1,546’
CONTACT: OREGON DEPARTMENT OF FORESTRY (ODF)
Tillamook Office: 5005 East 3rd Street
Tillamook, OR 97141
503-815-7024
Forest Grove Office: 801 Gales Creek Road
Forest Grove, OR 97116
503-359-7463
WEBSITE AND TRAIL MAP:
oregon.gov/ODF/Recreation
Click on “Off-highway vehicle (OHVs) trails.”
SITE LOCATION: Three areas are off Hwy 6:
• Browns Camp turnoff is at milepost 33
• Diamond Mill turnoff is at milepost 22.7
• Jordan Creek turnoff is at milepost 18
Trask is southeast of Tillamook on Hwy 101 and Trask River Road.

SITE DESCRIPTION: The forest offers some of the best off-highway vehicle trails in the Pacific Northwest. The Browns Camp, Jordan Creek, and Diamond Mill OHV areas combine to provide more than 250 miles of trails. The Browns Camp and Jordan Creek OHV areas include trails for motorcycle, quad, and four-wheel drive enthusiasts that range from easiest to extreme. The Diamond Mill trails are mostly more difficult technical single-track trails for motorcycle use only.

Browns Camp, Jordan Creek, and Diamond Mill campgrounds and staging areas also offer overnight camping, as well as day use. Day use is free in the Tillamook State Forest.

Browns Camp is generally open from early April through October. Rogers Camp Trailhead and Diamond Mill OHV Staging Area are open year-round. Jordan Creek is open from Memorial Day through mid-September.

Please note: Side-by-side ATVs such as the Yamaha Rhino, the Kawasaki Mule, and the Polaris Ranger series are Class IV ATVs and are allowed to operate on the trails only where designated and signed.

SEASON: Year-round. Riding is best in spring and fall. In summer, trails get dusty and areas may close due to fire restrictions or to protect wildlife. Area may be snowed in during the winter. Contact land management agency for trail status.

SAND LAKE RECREATION AREA
(45.286603, -123.957319) Elev. 26’

CONTACT: Siuslaw National Forest
Hebo Ranger District Office
31525 Hwy 22, Hebo, OR 97122
503-392-5100

WEBSITE: fs.usda.gov/activity/siuslaw/recreation/ohv

SITE LOCATION: 17 miles southwest of Tillamook and 10 miles north of Pacific City.

SITE DESCRIPTION: Easiest to most difficult riding. Fees for day use and camping. Camping is not allowed in dispersed areas unless you have and use a portable toilet. Alcohol is prohibited. No OHV riding from midnight – 6 a.m.
Map available from the Hebo District office.

SEASON: Year-round. Riding is best in fall and spring. Area is very busy in the summer months and on weekends.
4  UPPER NESTUCCA OHV AREA

(45.267150, -123.466783) Elev. 2,431’

CONTACT: Bureau of Land Management (BLM)
Tillamook Field Office
4610 3rd St, Tillamook, OR 97141
503-815-1100

WEBSITE: rideatvoregon.org/wheretoride/view/dsp_location.cfm?siteid=4

TRAIL MAP: arrmc.net

SITE LOCATION: In Oregon’s Coast Range, approximately 17 miles southwest of McMinnville and 9 miles north of Willamina.

SITE DESCRIPTION: Roughly 27 miles of easiest to most difficult trails and three staging areas (Whip Up, Grassy Flats, and Elk Flat). Some trails may be closed during fire danger. Campgrounds are nearby and may require a fee. Map available at the Tillamook Resource Area office.

SEASON: Year-round. Riding is best in spring and fall. In summer, trails get dusty and areas may close due to fire restrictions or to protect wildlife. Area may be snowed in during the winter. Contact land manager for trail status.

5  MOUNT BABER TRAILS

(44.612064, -123.822356) Elev. 176’

CONTACT: Oregon Department of Forestry (ODF)
Philomath Office
24533 Alsea Hwy, Philomath, OR 97370
541-929-3266 or 541-336-9419

SITE LOCATION: 2 miles east of Eddyville, turn south on Deer Creek Rd. and follow signs. From Elk City, go 5 miles on Elk City-Harlan Rd. to Updike Rd. and go 2 miles north to Mount Baber staging area.

SITE DESCRIPTION: Many easiest to more difficult trails and roads are available for Class I and III ATVs. The land ownership is among the State of Oregon, Bonneville Power Administration and four private landowners. OHV trail information and map can be found on ODF’s website. Information is also available at the Philomath office. For club membership, visit mtbaberatvclub.com or email trails@mtbaberatvclub.com.

Detailed information is available at the Philomath office or by calling members of the Mount Baber ATV club. (Stan Cook at 541-265-5656).

SEASON: Year-round. Riding is best in spring and fall. In summer, trails get dusty and areas may close due to fire restrictions or to protect wildlife. Area may be snowed in during the winter. Contact the land manager for trail status.
OREGON DUNES NATIONAL RECREATION AREA (ODNRA)

(44.010597, -124.113008) Elev. 83'

CONTACT: ODNRA Visitor Center
855 Hwy 101S, Reedsport, OR 97467
541-271-6000

WEBSITE: fs.usda.gov/activity/siuslaw/recreation/ohv

TRAIL MAP:
fs.usda.gov/activity/siuslaw/recreation/ohv

SITE LOCATION: 40 miles of coastline between Florence and Coos Bay. There are three main areas of sand dunes and beach access considered Northern, Middle, and Southern Dunes. Northern Dunes are near Florence with the South Jetty to Siltcoos areas. Middle Dunes are the Winchester Bay/Umpqua area near Reedsport. Southern Dunes are from Lakeside to Horsfall/Boxcar areas, which includes Spinreel, Riley Ranch, and Hauser areas.

SITE DESCRIPTION:

Northern Dunes – Located just southwest of Florence. Day-use access from South Jetty and Goosepasture OHV Staging Areas. South Jetty has some sand camping options. About 10 miles south of Florence, the Siltcoos area can be accessed from Driftwood II Campground and day-use area, with options for sand camping.

Middle Dunes – Located near Winchester Bay, this area has the tallest dunes on the Oregon Coast. Day-use access is at the USFS-managed Umpqua Beach #2 and #3 OHV Staging Area, with options for sand camping. Douglas County manages some dunes access sites, and Coos County manages Riley Ranch Campground, which provides access to sand trails and expansive beach.

Southern Dunes – Located just north of Coos Bay. Spinreel Campground and Day Use has options for sand camping. Other options: Horsfall Campground, Horsfall Beach Campground, Old Bark Staging Area, Bull Run Staging Areas, and sand camping options. Near Hauser there is dunes access and sand camping.

SEASON: Open year-round. Area gets much busier during the summer and during weekends.
**JESSIE M. HONEYMAN STATE PARK**

WEBSITE: douglascounty-oregon.us/265/Parks
SITE LOCATION: Located one-half mile west of Hwy 101 in Winchester Bay.
SITE DESCRIPTION: Both Windy Cove campgrounds are located 1/2 mile west of Hwy 101 in Winchester Bay. Situated in the heart of recreational activity on Douglas County’s coastline, these are the perfect campgrounds for the off-road enthusiast, fisherman or beachcomber. The campgrounds are located 1 1/2 miles from the ODNRA and are accessed via a dedicated OHV route.

Windy Cove Loop A Campground
Hookup and non-hookup facilities for RVs, pickup campers, and tents.
• 23 full hookup
• 4 electric Only

Windy Cove Loop B Campground
Hookup and non-hookup facilities for RVs, pickup campers, and tents.
• 39 full hookup
• 29 non-hookup
• 2 cabins
Showers and Wi-Fi are included in site fee.
For reservations, visit or-douglascounty.civicplus.com/276/Reservations or call 541-957-7001 Monday – Friday 9 a.m. – 4 p.m.
SEASON: Open year-round.

10 UMPQUA DUNES SAND CAMPING
(43.662075, -124.201953) Elev. 31’
CONTACT: Douglas County Parks Department
1036 SE Douglas Ave, Justice Building, Room #116
Roseburg OR 97470
541-957-7001
WEBSITE: douglascounty-oregon.us/265/Parks
SITE LOCATION: Located in Winchester Bay.
SITE DESCRIPTION: Open sand dune camping located south of the Douglas County Parks ATV Staging Area on Salmon Harbor Drive. There are no designated campsites. This has direct sand access. Enjoy the beautiful open air and pitch a tent on the soft coastal sand to stay a night.
SEASON: Open two weeks prior to Memorial Day and closed two weeks after Labor Day.
11 UMPQUA DUNES CAMPGROUND
(43.668242, -123.196803) Elev. 243’

WEBSITE: douglascounty-oregon.us/265/Parks
SITE LOCATION: Located between Half Moon Bay and the Umpqua Lighthouse.
SITE DESCRIPTION: Umpqua Dunes Campground has direct sand access for OHV campers. Nestled between Half Moon Bay and the Umpqua Lighthouse, the campground offers access to 10,000 acres of open sand, access to fishing, crabbing, and view of Winchester Bay.
Hookup and non-hookup facilities for RVs, pickup campers, and tents.
• 80 full hookup sites
• 3 partial hookup sites
• 14 cabins
• 6 group campsites
• Hot shows and flush restrooms
SEASON: Year-round

12 SAUNDERS LAKE DUNES ACCESS
(43.537847, -124.218892) Elev. 83’
SITE LOCATION: Located between Hauser and Spinreel at Crannog Road.
SITE DESCRIPTION: 15 acres, no-fee access point to the Oregon Dunes National Recreation Area. Access is in a residential neighborhood from Crannog Road to the sand dunes. There is no street parking, no developed parking, or other resources at this site. The sand road is narrow (8’) with moderate incline.
SEASON: Year-round

13 RILEY RANCH
(43.516850, -124.220850) Elev. 104’
CONTACT: Coos County Parks and Recreation Office
250 N Baxter, Coquille, OR 97423
541-396-7759
WEBSITE: co.coos.or.us/parksrec/page/riley-ranch
SITE LOCATION: Between Hauser and Spinreel.
SITE DESCRIPTION: 130 acres of year-round fun. Campground has access to the Oregon Dunes National
Recreation Area and the following sites/amenities:
• 53 RV sites (water and electrical)
• 42 RV sites (water and electrical)
• 2 camping cabins
• 30 non-hookup sites
• 2 flush restrooms with showers
Day use includes motocross track, sand drag strip, and youth education and riding area. Additional attraction is Butterfield Lake which is stocked at least three times a year. Small launch ramp is available for non-motorized boats. Cabins and campsites are available through reservations at 541-396-7755 and online at properties.camping.com/Riley-Ranch-Coos-County-Parks/Reservations.

SEASON: Open year-round.

14 BLUE RIDGE
(43.278114, -124.087294) Elev. 1,531’
CONTACT: Bureau of Land Management (BLM)
Coos Bay District Office
1300 Airport Lane, North Bend, OR 97459
541-756-0100
SITE LOCATION: About 15 miles southeast of Coos Bay.
SITE DESCRIPTION: 12 miles of easiest to more difficult trails and gravel roads. Trails developed in association with the South Coast Trail Riders Association. Information available from Coos Bay BLM.
SEASON: Year-round. Riding is best in spring and fall. In summer, trails get dusty and areas may close due to fire restrictions or to protect wildlife. Area may be snowed in during the winter. Please stay off trails when wet (October – June). Contact land manager for trail status.

15 WINCHESTER TRAILS
(43.230369, -124.295500) Elev. 309’
CONTACT: Coos County Forestry
1309 West Central, Coquille, OR 97423
541-396-7750
WEBSITE: co.coos.or.us/forest/page/winchester-trail-system
SITE LOCATION: 12 miles south of Coos Bay on U.S. 101, milepost 251.
SITE DESCRIPTION: 30 miles of easiest to more difficult single-track trails and roads. Open to off-road motorcycles, ATVs and horseback riders. ATV riders should note that these trails are narrow and are geared more towards motorcycles.
Trails are numbered 1–22. Trails may be temporarily closed or rerouted to avert conflict with timber harvesting.

Park in staging area along highway. Maps are available at Coos County Forestry Office, Moe’s Bike Shop, and Coos Bay BLM.

SEASON: Year-round. Riding is best in spring and fall. In summer, trails get dusty and areas may close due to fire restrictions or to protect wildlife. Area may be snowed in during the winter. Please do not ride these trails during wet weather. Contact land manager for trail status.

541-560-3400
WEBSITE: fs.usda.gov/rogue-siskiyou/
TRAIL MAP URL: fs.usda.gov/Internet/FSE/Documents/fseprd764004.pdf
SITE LOCATION: 40 miles northeast of Medford on Hwy 62.
SITE DESCRIPTION: Many easiest to most difficult trails and roads for Class I, II, III and IV ATVs.
• Prospect Staging: Day use. No facilities.
• Woodruff Staging Camping: Day use, 10 fire rings, eight ADA Accessible picnic tables, restrooms, no water.
• Woodruff Play Area: Day use, restroom, no water.
• Corral Play Area: Day use, no facilities.
• Thousand Springs Trailhead: Camping allowed with self-contained trailers/RV within parking area; restrooms, no fire rings or water.
• Claude Lewis Trailhead: Camping allowed with self-contained trailers/RV within parking area, restrooms, no fire rings or water.
• Abbott Creek Campground: Five OHV campsites, restrooms, fire rings, picnic tables, hand pump water.
• River Bridge Campground: Two OHV campsites, restroom, fire rings, picnic tables, no water.

Side-by-side ATVs such as the Yamaha Rhino, the Kawasaki Mule, and the Polaris Ranger series are Class IV ATVs and are allowed to operate only on trails designated and signed for their use.

Detailed maps and information are available from the Prospect Office, OHV Program Coordinator.

**SEASON:** Woodruff Play Area is open in middle of June. The rest of the OHV system is open starting July 1.

The OHV system closes again in late October for green dot road closure during elk hunting season. Typical closure lasts about 10 days.

The OHV system closes again November 30.

Riding conditions are best in fall and spring. TRiding is best in spring and fall. In summer, trails get dusty and areas may close due to fire restrictions or to protect wildlife. Area may be snowed out in winter months.

Contact land manager for trail status.

Cottage Grove, OR 97424
541-767-5000

SITE LOCATION: About 35 miles southeast of Cottage Grove. Take I-5 Exit 174 and head east on Row River Road.

SITE DESCRIPTION: Three more difficult trails are available for several ATV Class types.

Noonday Wagon Road #1405 (6.9 miles) is open to Class I, II, III and IV ATVs.

Knott Trail #1417 (4.8 miles) and Bohemia National Recreation Trail #1407 (7 miles) are open to Class III ATVs.

Detailed information from the Cottage Grove Ranger District Office.

SEASON: Year-round. Riding is best in spring and fall. In summer, trails get dusty and areas may close due to fire restrictions or to protect wildlife. Area may be snowed in during the winter. Contact land manager for trail status.
HUCKLEBERRY FLATS
(43.842483, -122.374883) Elev. 2,686’

CONTACT: Willamette National Forest
Middle Fork Ranger District
46375 Hwy 58, Westfir, OR 97492
541-782-2283

WEBSITE: go.usa.gov/xKeMb

TRAIL MAP: fs.usda.gov/Internet/FSE_DOCUMENTS/fseprd640163.pdf

SITE LOCATION: Westfir exit off Hwy 58 at MP 31. Left after the (green) bridge onto Westfir Road. Continue for 14 (paved) miles on FS Road 19 (Aufderheide Scenic Byway) to Road 1928. Follow road to staging area.

If you need to stop by a store on your way, you can also get to Huckleberry Flats by continuing past the Westfir Turn off and continue east on OR 58 into Oakridge. At the traffic light, turn left, cross the bridge and then turn right onto 1st Street.

Continue through Uptown Oakridge to Oak Street, go left and then follow the Oakridge-Westfir Road to High Prairie Road (aka 1928, stay right) and follow that for several miles. When the road turns to gravel, go four more miles into Huckleberry Flats.

SITE DESCRIPTION: There are 65 miles of easiest to most difficult trails for Class I, III, and IV ATVs. Dispersed camping available. Detailed information and maps are available from the Middle Fork Ranger District office. Please note Class IV ATVs are only allowed to operate on the trails designated and signed for their use. At Huckleberry Flats, trails open to Class IV vehicles are choked and signed with the appropriate width restriction. Do not attempt to drive on trails that are too narrow for your OHV.

SEASON: Year-round. Riding is best in spring and fall. In summer, trails get dusty and areas may close due to fire restrictions or to protect wildlife. Area may be snowed in during the winter. Contact land manager for trail status.

SHOTGUN CREEK OHV AREA
(44.245747, -122.863428) Elev. 791’

CONTACT: Bureau of Land Management (BLM)
Northwest Oregon District
1717 Fabry Rd, Salem, OR 97306
503-375-5616

WEBSITE: rideatvoregon.org/wheretoride/view/dsp_location.cfm?siteid=24

TRAIL MAP: avenzamaps.com/maps/526580/shotgun-creek-ohv-staging-area
DIRECTIONS: From I-5 north, take Exit 216. Follow OR 228E 26 miles to Shotgun Creek Rd in Lane County. From I-5 south, take Exit 194A to Hwy 126, 4 miles east to Marcola Rd Exit. Turn left at the light, right on Marcola Rd and follow for 13 miles to Shotgun Creek Rd.

SITE DESCRIPTION: 34-mile system with easiest to most difficult trails. Majority of trails open to Class I and III operators. One trail (1.3 miles) open to Class II operators. Some trails now open to Class IV operators (65" or less).

Two Staging Areas: Crooked Creek and Cascade View. Crooked Creek offers parking, a restroom, loading ramps, and picnic sites. Dispersed camping is allowed. Cascade View offers restrooms, a picnic area, day-use parking, a training site, and a beginner riding loop (day use only). Please contact the land manager for training and organized events. While riding, please stay on signed trails.

Trails extend over a checkerboard pattern of public and private lands. A map is available online and at both staging areas. A geo-referenced map is also available for free on the Avenza maps mobile app. Non-plated OHVs must stay within the OHV boundaries.

SEASON: Year-round. Riding is best in the fall and spring. Trails get dusty in the summer and slick in the winter. Some or all trails may be closed due to storms, construction, fire conditions, or logging operations at any time. Refer to the website trail closure signs at the staging areas or contact the land manager for trail status.

27 SANTIAM PASS MOTORIZED RECREATION AREA
(44.390467, -121.860950) Elev. 4,715’

CONTACT: Willamette National Forest
McKenzie Ranger District
57600 McKenzie Hwy, McKenzie Bridge, OR 97413
541-822-3381

WEBSITE: go.usa.gov/xKeMD

TRAIL MAP: fs.usda.gov/Internet/FSE_DOCUMENTS/fseprd741984.pdf

SITE LOCATION: A few miles south of Hwy 20 on Big Lake Road.

SITE DESCRIPTION: 53 miles of easiest to most difficult trails and shared use roads in the High Cascades open to OHV Classes I, II, III, and IV ATVs. The area has plenty of challenging routes as well as meandering trails and roads to entertain everyone. The Hoodoo Ski Area slopes are closed to OHV use.
Most difficult to extreme rock crawling trails are popular venues to test machines and skills at Santiam Pass. Learner Loop at Ray Benson OHV Staging/Sno-Park and Santiam Staging Area and 1 mile west of the Santiam Staging Area on the 860 Road provide riders opportunity to build their skills.

The Santiam Staging Area provides comfortable, shaded sites, a restroom facility and loading ramp. The trails are well signed and maps are available at trailheads.

Self-contained camping in an RV, trailer or truck camper is allowed at Ray Benson. Tent camping is allowed in dispersed camping areas for free or for a fee at Big Lake Campground.

Information is available from McKenzie River Ranger District office on Hwy 126.

**SEASON:** May–November. Riding is best in spring and fall. In summer, trails get dusty and areas may close due to fire restrictions or to protect wildlife. Area may be snowed in during the winter. All wheeled vehicles are not allowed on snowmobile routes after November 16. Contact land manager for trail status.

**28 MCCOY MOTORIZED RECREATION AREA**

((44.692814, -122.034256) Elev. 1,921’

**CONTACT:** Willamette National Forest
Detroit Ranger District
44125 North Santiam Hwy, Mill City, OR 97360
503-854-3366

**WEBSITE:** fs.usda.gov/recarea/willamette/recarea/?recid=72114

**TRAIL MAP:** go.usa.gov/xKeMK

**SITE LOCATION:** 8 miles east of Detroit off Hwy 22 on McCoy Road (FS Road 2233).

Parking areas are .7 and 4.3 miles up McCoy Road.

**DIRECTIONS:** From I-5: Take Hwy 22 east. Head 56.3 miles to McCoy Road, then turn left. From Santiam Junction (Highways 20 and 22): Head 25.7 miles west on Hwy 22 to McCoy Road, then turn right.

**SITE DESCRIPTION:** Temporarily closed due to Beachie Creek and Lionshead Fire closure. This shared-use road system is comprised of approximately 50 miles of easiest to more difficult roads open to motorized Class I, II, III, and IV users and highway vehicles. Scenic pleasure riding opportunities offer spectacular views of Mount Jefferson and many peaks in the Cascades. Motorized cross country travel is prohibited. Some paved segments are open to unlicensed (non-street
legal) vehicles. Public lands are interspersed with private lands. Please use the area map and the Motorized Vehicle Use Map (available from the Detroit Ranger District Office).

During the winter, the McCoy area is a designated snowmobile riding area. Wheeled vehicles are not allowed to travel over snow within the riding area. The McCoy Shelter is in the heart of the area where riders can stop, take a rest or have a picnic with a restroom on site. The shelter is available for day use only during the riding season. Cell phone service is unreliable. The nearest public phones and services are in Detroit and Idanha.

**SEASON:** Year-round. Riding is best in fall and spring. Wheeled vehicles are not allowed to travel over snow within the riding area. In summer, trails get dusty and areas may close due to fire restrictions or to protect wildlife. Area may be snowed in during the winter. Contact land manager for trail status.

TRAIL MAP: https://www.avenzamaps.com/maps/831391/virtue-flat-ohv-trail-guide-2018

SITE LOCATION: Approximately 11 miles east of Baker City on State Hwy 86.

SITE DESCRIPTION: More than 5,000 acres of trails offering a variety of challenges for the basic to advanced OHV enthusiast.

A staging area with seasonal restroom, loading ramp, bulletin boards, maps, and parking is provided.

Virtue Flat offers dispersed camping on BLM lands outside of the fenced staging area.

SEASON: Year-round. Riding is best in spring and fall. In summer, trails get dusty and areas may close due to fire restrictions or to protect wildlife. Area may be snowed in during the winter. Contact land manager for trail status.
BLUE MOUNTAIN OHV TRAIL
(44.547081, -118.341342) Elev. 4,983’

CONTACT: Whitman Ranger District
1550 Dewey Ave Suite A
Baker City, OR 97814
541-523-6391

WEBSITE AND TRAIL MAP: fs.usda.gov/detail/wallowa-whitman/recreation/ohv/?cid=stelprdb5292558

SITE LOCATION: 8 miles west of Unity on Hwy 26.

Oregon Campground: From Unity head west on Hwy 26 for 12 miles. The trailhead is above the Oregon Campground entrance.

Elk Creek Campground: Travel west from Unity on Hwy 26 to South Fork Burnt River Road (County Road 600); turn left. Travel 7 miles to forest boundary. At forest boundary, the road becomes Forest Road 6005; continue about 2 miles to campground on left.

Blue Springs Summit: From Baker City, head south on Hwy 7 for 26 miles to the Sumpter Valley Highway. Turn right onto the Sumpter Valley Highway (Hwy 220) and go 10 miles. The Blue Mountain Summit Sno-Park is located at the top of the summit on the left.

SITE DESCRIPTION: 60 miles of easiest to most difficult 50’ wide trails designed for Class I and III ATVs.

Oregon Campground: Located along Hwy 7 adjacent to the campground. The trailhead serves as a midway access area for the Blue Mountain OHV Trail. The recreation area has parking, a loading ramp, and an accessible vault toilet.

Elk Creek Campground: West of Unity, this small streamside campground is situated in a large old growth ponderosa pine forest along Elk Creek. Site has group picnic sites and tent-only campsites.

Blue Springs Summit: On County Road 24 off the Elkhorn Drive Scenic Byway, this centrally located site is used both as a snowmobile trailhead in the winter and as the northern OHV trailhead for the Blue Mountain OHV Trail spring – fall.

Map available from the Forest Service Office in Baker.

SEASON: Year-round. Riding is best in spring and fall. In summer, trails get dusty and areas may close due to fire restrictions or to protect wildlife. Area may be snowed in during the winter. Contact land manager for trail status.

Henderson Flat OHV Area near Redmond, OR
Can I ride two-up (double) on my ATV or off-road motorcycle?

The ATV must have a seat and a floor pan or foot pegs (OAR 735-116-0000). Motor vehicle laws also state that the passenger cannot be in the operator’s lap or embrace (ORS 811.190). This is a Class D traffic violation.

Can my dirt bike, 4-wheeler or side-by-side become street legal?

No. These vehicles were never intended for “on-road” use. They do not meet federal highway emission and safety standards and cannot be retrofitted to become street legal. Restricted Use License Plates issued by other states (such as Arizona, Idaho, and Washington) for ATVs and side-by-sides are only valid for those states. License plates are only issued to motorcycles that were originally manufactured as a dual sport.

Can I ride on paved roads?

Some cities and counties in Oregon have ordinances that allow ATV use on their roads. See page 33 or visit OregonOHV.org to find information for specific locations. Rules may vary from area to area.

Can I cross a highway?

The crossing of a highway must be made at a highway intersection or at a place that is more than 100 feet from any highway intersection.

Can I get a disability permit to ride my Class I or IV ATV on the ocean shore?

See page 15 or contact ADA Access Coordinator: 503-881-4637.
I’m not an Oregon resident. Do I need an ATV Safety Education Card to ride in Oregon?

Yes. ATV Safety Cards are required, but we accept some from out of state (see page 20). Out-of-state residents can get cards online for free before your trip.

I’m not an Oregon resident. Do I need an ATV Permit (sticker) to ride in Oregon?

Depends on the state you live in. California and Nevada are accepted in Oregon. Washington and Idaho permits are no longer accepted in Oregon. See page 14.

How do I replace my Safety Education Card?

Safety Card – The best way to order a replacement card is to access your RideATVoregon.org account online. The replacement card costs $8.

I lost my ATV Permit (sticker). Can it be replaced?

ATV Permits will be replaced for the full $10 fee. A new permit must be issued.

Where do I get a permit for my snowmobile?

Snowmobiles are registered through Oregon Driver & Motor Vehicle Services (DMV).

Do these laws apply on private property?

These laws are not applicable when operating an ATV on private property not open to the public.
