07/31/26	Nancy Lanyon	Hello - Our City Strategic Plan includes public support for trails - pedestrians and cyclists - throughout the city and our surrounding open spaces. Our town has a population of around 1,450, but visitors increase that by 4-5 times during tourist season. As you might imagine, our budgets are small, but our hopes are big to create a trail system which will support our economy, health and happiness! We are even buying our watershed and hope to connect parts of that beautiful space to a well-planned trail system. I can safely say that our community truly hopes that the grant revisions permitting our small town to more easily apply for grants is passed: 9b Local Government Grant Program rules OAR 736-006-0115, 0121/0125 Attachment B Thanks so much - this opportunity would help us on so many levels! Nancy Lanyon
