I. INTRODUCTION

Portland Historic Resource Inventory

I. Introduction

The City of Portland has been nationally recognized for over a decade as a leader in historic preservation. In 1980, perceiving an opportunity to further enrich its preservation program, the City undertook a city-wide inventory of properties of historical and architectural significance. Work on the project took nearly four years and resulted in a body of information on some 5000 individual properties, each ranked according to its relative importance.

The Inventory will provide a data base for the Portland Historical Landmarks Commission, Portland Planning Commission and the State of Oregon Historic Preservation Office. It will satisfy requirements of the State of Oregon Land Conservation and Development Commission stated in its Goal 5:

Programs shall be provided that will: (1) insure open space, (2) protect scenic and historic areas and natural resources for future generations, and (3) promote healthy and visually attractive environments in harmony with the natural landscape character. The location, quality and quantity of the following resources shall be inventoried...

- i. Historic areas, sites, structures and objects...

Although intended primarily as a planning tool, the Inventory will also serve as a valuable resource for historical research.

The Inventory will be submitted for review and acceptance by the Portland Historical Landmarks Commission. As background for Portland's Comprehensive Plan, it will probably need to be expanded to cover areas annexed to the City in the future.

This volume is one of ten presenting the results of the Inventory. Areas of the city covered by each volume are shown on the map on the front cover. Each volume contains quarter section maps and listings of inventoried properties. Pictures and basic data for Landmarks, for National Register listings and for the most significant inventoried properties are also included. Additional information can be obtained from the companion documents titled Identified Properties, as well as from the Inventory computer file.

II. BACKGROUND INFORMATION

II. Background Information

Portland's Historic Resource Inventory is the product of thousands of hours of work by City staff and citizen volunteers. Each of the 5000 properties included has been researched, photographed and ranked according to its relative importance. Inventory data is available both in published form and from an automated computer file. The Inventory will serve as a data base for local and state planning activities.

Inventory Process. Properties included in the Inventory were selected by an architectural historian, a historian and neighborhood committees. The architectural historian conducted a "windshield survey," driving throughout the city and noting any structure of architectural significance. The historian conducted a "literature search," consulting published and unpublished local histories for personages and events of historical importance to the city and noting the properties with which they were associated. Neighborhood committees noted properties of either historical or architectural significance to their areas. Planning Bureau staff did basic research on each property, obtaining information such as date of construction, original owner and architect. The historian researched the important persons and events which he had selected and wrote a short paragraph on each. Neighborhood committees supplied much additional information. Data on each property was entered in a computer file.

Using computer print-outs with photographs attached for reference, the architectural and historical significance of each property was evaluated. Bureau staff assigned each property a preliminary rank, using a scoring system based on criteria for local landmark designation and listing on the National Register. (See Appendix A.) Ten area-based citizens advisory committees then reviewed the preliminary ranks, suggesting changes which they thought appropriate. A technical advisory committee (composed of staff members, Landmarks Commission members and various experts) also reviewed the preliminary ranks, and suggested changes. Each citizens advisory committee reviewed only properties in its own area. The technical advisory committee reviewed all properties, grouped by architect, function or style. Working from ranks suggested by the citizens advisory committees and technical advisory committee, Planning Bureau staff assigned final ranks. To arrive at final ranks staff either averaged citizen advisory committee and technical advisory committee ranks or, when there was a difference of only one rank, assigned the higher rank suggested. This system was followed in all but a few cases in which it was necessary for staff to adjust ranks in order to achieve reasonable consistency of ranks city wide. Ranks were defined as follows:

Rank I - Individually the most important properties in the city, distinguished by outstanding qualities of architecture, historical values, and relationships to the environment. Highest priority for landmark designation; eligible for National Register.

Rank II - Properties which are of individual importance by virtue of architectural, historical, and environmental criteria. Secondary priority for landmark designation; eligible for National Register.

Rank III - Buildings which provide the setting for more important buildings and which add richness and character to the neighborhood; properties associated with personages and events of secondary importance or which illustrate particular stages in the development of the city. These properties may be eligible for the National Register as part of a district.*

For some properties additional information on the structures, interiors, landscapes or associated persons and events might have elevated their significance and resulted in higher ranks. Some structures of architectural and historical significance may have been entirely missed, particularly if obscured by vegetation or adjacent structures. Interior spaces were not investigated; they were however, noted and taken into consideration in the ranking process when information was available. Many significant landscapes (primarily those in private ownership) were not included.

Some objects of importance were too numerous and scattered to be included in the Inventory, i.e. horse hitching rings, cobblestones, streetcar tracks, and street names and dates in curbs and sidewalks. These objects could, however, be protected by blanket ordinances, as, in fact, cobblestones already are.

The number of final ranks were as follows: Rank I, 75; Rank II, approximately 690; and Rank III, approximately 2800. Approximately 1500 properties did not achieve Rank III.

Elements of the Inventory. All Inventory data is stored in an automated computer file managed by the City of Portland Archives and Records Center. Data on individual properties, as well as a wide variety of indexes (by owner, architect, function, etc.), can be obtained from this file. (See Appendix B.)

Copies were made of individual property print-outs and photographs. Ten-volume sets of copies, (titled Identified Properties,) are available at the Portland Archives and Records Center, the Planning Bureau, the State Historic Preservation Office and at the Oregon Historical Society. (See Appendix C for sample print-out.) Ranks on these print-outs are final ranks. Scores for properties whose preliminary ranks were either raised or lowered were not, however, adjusted and should, in such cases, be disregarded.

*(Adapted from Splendid Survivors by Charles Hall Page and Associates, Inc.)

Photographic negatives are stored at the City Archives, where orders for prints can be placed.

Quarter section maps and lists of Landmarks, National Register Listings, and Rank I, II and III properties are included in this publication. There is also a photograph and some data on each Landmark, National Register listing and Rank I and II property. Properties which did not achieve at least a III rank do not appear in this publication. They do, however, remain in the computer file and are included in the ten-volume copies of computer print-outs.

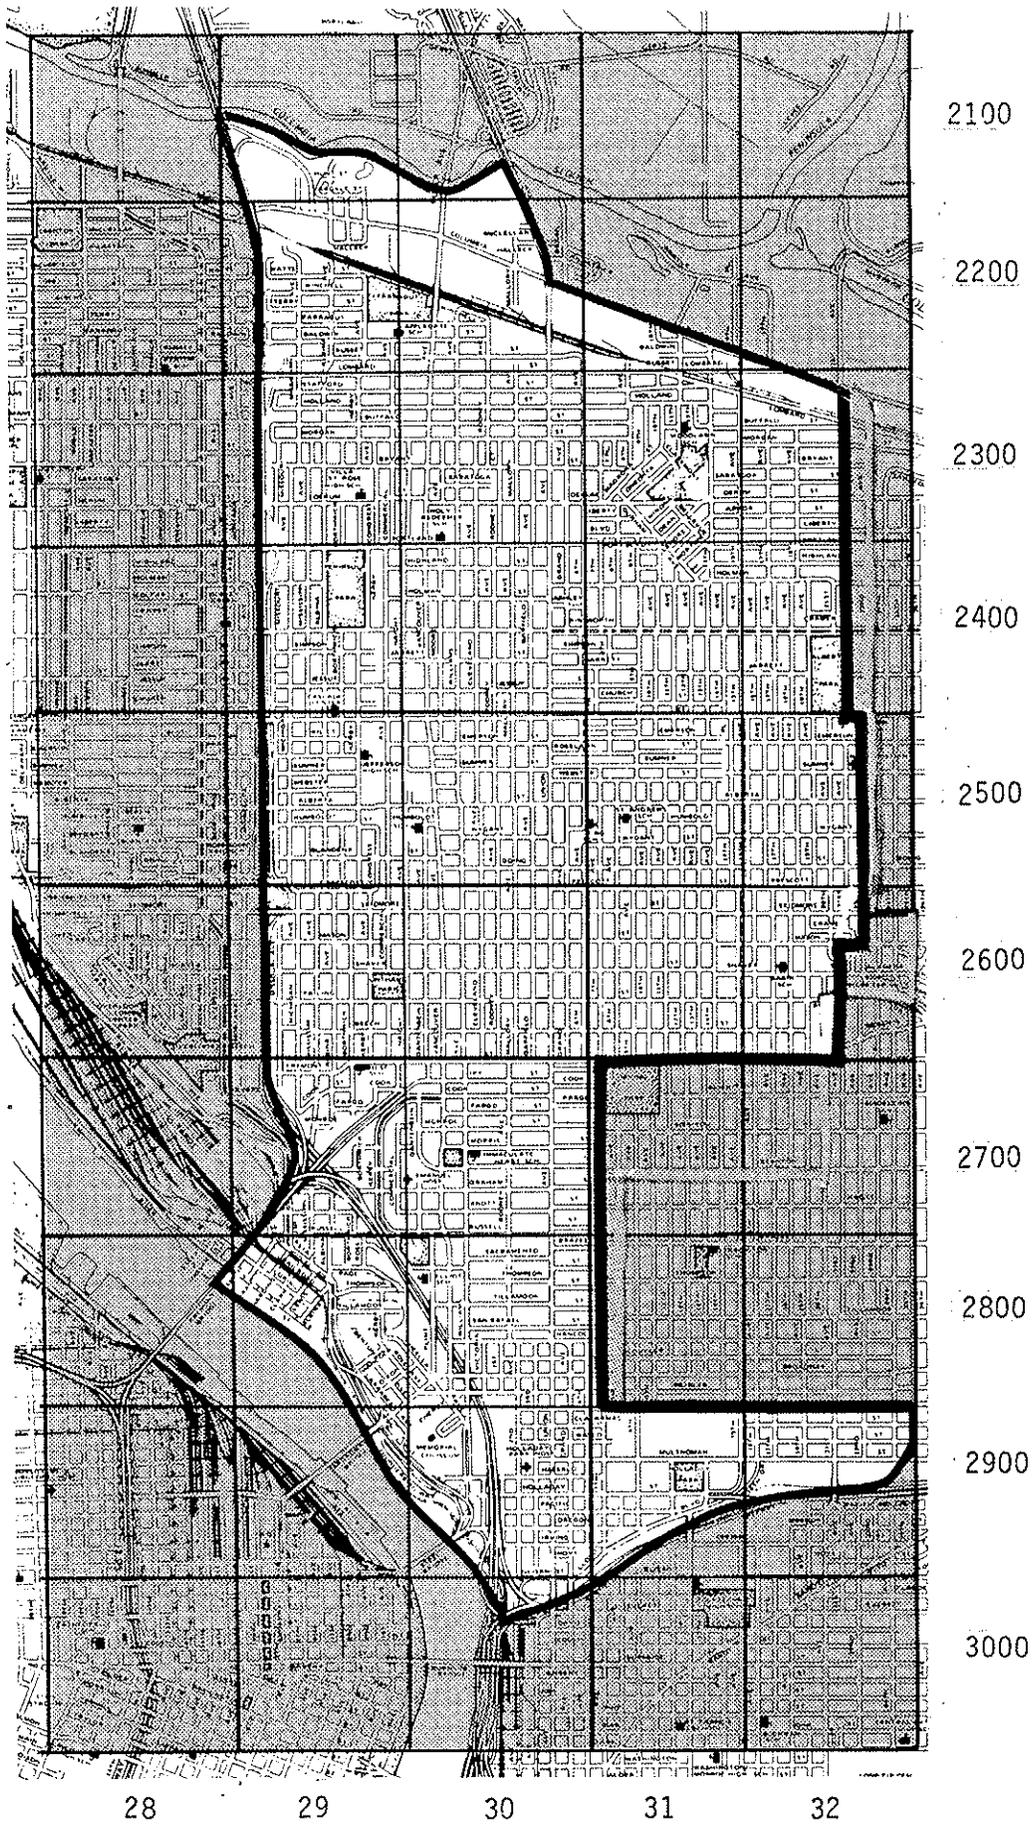

What it Means to be Included in the Inventory. A rank of I or II does not mean that a property has been either designated as a local landmark or listed on the National Register. Designation as a local landmark must be recommended by the Portland Historical Landmarks Commission and designated by ordinance by the Portland City Council. Listing on the National Register must be recommended by the State Advisory Committee on Historic Preservation and approved by the United States Department of the Interior. Inventory ranks should, therefore, be viewed as predictors rather than guarantees of designation or listing. (For information on landmark designation, contact the Portland Bureau of Planning, 796-7700. For information on National Register listing, contact the State Historic Preservation Office, 378-5001.)

All Rank I, II and III properties are included in the State of Oregon Inventory of Historic Properties, which serves as a data base for the State Historic Preservation Office staff in a variety of planning activities. The Inventory will also be used as a data base by the Portland Historical Landmarks Commission and the City of Portland Bureau of Planning.

IV. DATA ON LANDMARK AND NATIONAL REGISTER PROPERTIES

4-010-04543
4543 N. Albina Avenue
Clifford, South 30' of Block F
QUARTER SECTIONMAP #: 2529
ORIGINAL FUNCTION: Tavern

DATE BUILT: ca. 1895
ORIGINAL OWNER:
Clifford Real Estate(?);
M.E. Thompson (?)

TAX ASSESSOR'S ACCOUNT #: R-16390-3790
ZONING: C2
LANDMARK

SPECIAL FEATURES AND MATERIALS:

Stepped and curvilinear gable. Palladian window in gable end. Two-tiered porch with balustrade and latticework. Stepped gable wall dormer. Projecting rectangular bay window. One-over-one, double-hung windows. Exterior finish of wood shingles.

AREAS OF SIGNIFICANCE: Architecture

4-010-06400
6400 N. Albina Avenue
Gainsborough, Tax Lot 13
QUARTER SECTION MAP #: 2429
ORIGINAL NAME: Peninsula Park Bandstand
ORIGINAL FUNCTION: Bandstand

DATE BUILT: 1913
ARCHITECTURAL PLANS BY:
Lawrence, Ellis Fuller
ORIGINAL OWNER:
City of Portland
ZONING: OSR5
LANDMARK

SPECIAL FEATURES AND MATERIALS:

Octagonal structure. Tile roof with cresting. Wood posts, curvilinear brackets and open architrave. Brick base.

AREAS OF SIGNIFICANCE: Architecture; Performing Arts; Military

4-620-04314
4314 N. Mississippi Avenue
Multnomah, Block 1, Lots 10, 12
QUARTER SECTION MAP #: 2629
ORIGINAL FUNCTION: Residence

DATE BUILT: 1898
ORIGINAL OWNER:
Palmer, John and Bertie

TAX ASSESSOR'S ACCOUNT #: R-59190-0120
ZONING: C2
LANDMARK, NATIONAL REGISTER

SPECIAL FEATURES AND MATERIALS:

Cross gable roof. Ornate spindle and band saw decoration in gable ends. Bracketed decorative cornices. Paneled frieze. Upstairs covered porch with horseshoe arch. Two-story polygonal bay window. Drop siding with corner boards. Fancy butt shingles. Corbelled brick chimney. One-over-one, double-hung windows. Stained glass, Italian crackle glass, cranberry glass. Hand-carved entrance door with colored glazing from England.

APPENDIX A

Historic Resource Inventory
Property Rankings

Rank I - Individually the most important properties in the city, distinguished by outstanding qualities of architecture, historical values, and relationships to the environment. Highest priority for landmark designation; eligible for National Register.

Rank II - Properties which are of individual importance by virtue of architectural, historical, and environmental criteria. Secondary priority for landmark designation; eligible for National Register.

Rank III - Buildings which provide the setting for more important buildings and which add richness and character to the neighborhood; properties associated with personages and events of secondary importance or which illustrate particular stages in the development of the city. These properties may be eligible for the National Register as part of a district.

(Adapted from Splendid Survivors by Charles Hall Page and Associates, Inc.)

EVALUATION FORM
GUIDE

I. Design/Construction

Style/Type - Significance as an example of a particular style, type or convention.

- Especially fine or extremely early example 5
- Excellent or very early example 3
- Good Example 2

Artistic Quality - Significance because of quality of composition, detailing or craftsmanship.

- Excellent 5
- Very Good 3
- Good 2

Materials/Construction - Significance as an example of use of a particular material or type of construction.

- Especially fine or extremely early example 5
- Excellent or very early example 3
- Good Example 2

Designer/Contractor - Designer, contractor or craftsman of local, state or national importance.

- Of particular importance to the history of the community, state or nation 3
- Of secondary importance 2
- Of minor importance 1

Age - Significance because of age relative to local development.

- Pre-1875 10
- 1875 to 1899 5
- 1900 to 1929 2

II. History

Person(s) - Associated with the life or activities of a person, group, organization or institution that has made a significant contribution to the community, state or nation.

- Person of primary importance intimately connected with the property 20
- Person of primary importance loosely connected or person of secondary importance intimately connected 10
- Person of secondary importance loosely connected or person of neighborhood importance intimately connected 5

Event(s) - Associated with an event that has made a significant contribution to the community, state or nation.

Event of primary importance intimately connected with the property ...	20
Event of primary importance loosely connected or event of secondary importance intimately connected	10
Event of secondary importance loosely connected or of neighborhood importance intimately connected	5

III. Rarity

Significance as only remaining or one of few remaining properties associated with an important personage or event; significance as only remaining or of few remaining properties of particular design or construction.

Only one in city	10
One of several in city	5

IV. Environment

Contributes to the character or continuity of the street, neighborhood or area.

Of particular importance in establishing the character of an area or may be taken as a symbol for the city or region as a whole	10
Of importance in establishing the character of an area or conspicuous and familiar in the context of the city or region	8
Conspicuous and familiar in the context of the neighborhood	6
Contributes to the dominant character of the area	4
Compatible with dominant character of area	2

V. Integrity

Retains its original design elements, materials and character.

No changes or very minor changes	10
Minor alterations which do not destroy the overall character	8
Major alterations to portions of the property; remainder intact	6
Extensive alterations	4
Greatly altered but recognizable	2

APPENDIX B

Data Retrieval

The Portland Archives and Records Center uses SPINDEX data base management programs, developed by the National Archives, to provide access to HRI data. Each property in the data base is identified by a control number that reflects its current address, so persons researching a building or site must have this information. The city was divided into ten areas, and each volume of printouts contains a map that indicates the area it covers.

Each property is identified by a nine-digit master file number, which is a shortened version of the control number. It looks like this:

X-XXX-XXXXX

The first digit reflects the geographical quadrant in which the property is located, as follows:

- 0 = SW Named Streets
- 1 = SW Numbered Streets
- 2 = NW Named Streets
- 3 = NW Numbered Streets
- 4 = N Named Streets
- 5 = N Numbered Streets
- 6 = NE Named Streets
- 7 = NE Numbered Streets
- 8 = SE Named Streets
- 9 = SE Numbered Streets

Note that quadrant boundaries and area boundaries, while close, are not necessarily the same.

To find a property listing, determine which workbook it's in, and then look for the appropriate first digit. Addresses are arranged alphanumerically thereunder, named streets first, then numbered streets. Addresses appear in numerical order on a given street.

Special indexes can be produced to the entire data base or for any of the ten areas. These include indexes by architect, style, function, date, rank, special feature, etc. Persons interested in obtaining an index should contact the Portland Archives and Records Center at 248-4631. They will be charged for the cost of the index, which will range in price from \$5-25.
