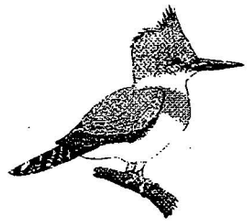
BIRDS OF FORT STEVENS STATE PARK

Fort Stevens State Park provides habitat for a remarkable variety of birds. Some are residents, living all year long in the forests, wetlands, and beaches of the park. Others are seasonal visitors, using the park for a season or two before moving on to somewhere else. A few arrive accidentally, blown here by the fierce winds of the Pacific Coast.

This list includes species which have been observed in the area surrounding and including Fort Stevens State Park. Those known or suspected to breed in the park are marked with an asterisk.



Visitors are asked to report observations of birds not on the list to park personnel.

Seasonal occurrence and relative abundance are coded as shown:

W: Winter (December-February)
S: Spring (March-May)
S: Summer (June-August)
F: Fall (September-November)

C: Common; difficult to miss
O: Occasional; seen often
U: Uncommon; easy to miss
R: Rare; almost never seen
A: Accidental; out of range
