Joanne	Kittel	07/01/26	it has come to my attention that the site administrators of the Local Government Grant do not necessariy assure that SHPO requirements are met when a grant project involving ground penetration on public property for an approved project. (I am not including Yachats City government that does comply.) Is there followup by receiving a SHPO report that an evaluation has been completed or that a prior evaluation / investigation has been complete? Or ,do the administrators take the word of the city staff in their periodic reports? if it is the latter, then there is a serious error in assuring this essential measure has been completed. Reports need to be received by SHPO or a local Tribe's THPO to assure this requirement is met. Thank you for your consideration of this matter.
