NEED FOR THE RULE(S)

Senate Bill 109 (2021) directed OPRD to adopt rules governing drone takeoff and landing on state park property and the ocean shore. These rules establish clear, enforceable standards to provide recreational opportunities while protecting natural, cultural, scenic, and recreational resources and minimizing visitor conflict.

DOCUMENTS RELIED UPON, AND WHERE THEY ARE AVAILABLE

OPRD relied on: The proposed rules rely on Federal Aviation Administration (FAA) regulations governing unmanned aircraft systems, including 14 CFR Part 107. These regulations are publicly available on the Federal Aviation Administration's website. <https://www.faa.gov/uas>

STATEMENT IDENTIFYING HOW ADOPTION OF RULE(S) WILL AFFECT RACIAL EQUITY IN THIS STATE

OPRD anticipates no disproportionate impact on specific racial or ethnic groups. The rules apply uniformly statewide and establish clear, publicly available locations and conditions for drone takeoff and landing on OPRD-managed property.

FISCAL AND ECONOMIC IMPACT:

OPRD anticipates minimal fiscal impact to state government and local governments. Any workload impacts are expected to be limited and associated with implementation, public communication, and potential permit/pass administration as applicable.

COST OF COMPLIANCE:

(1) Identify any state agencies, units of local government, and members of the public likely to be economically affected by the rule(s). (2) Effect on Small Businesses: (a) Estimate the number and type of small businesses subject to the rule(s); (b) Describe the expected reporting, recordkeeping and administrative activities and cost required to comply with the rule(s); (c) Estimate the cost of professional services, equipment supplies, labor and increased administration required to comply with the rule(s).

Compliance costs for the public are expected to be minimal. Visitors may need to review OPRD's published drone operation area map and comply with site conditions; those seeking authorization outside designated areas or for commercial/research purposes may need to obtain a permit and meet associated requirements.

(1) Likely economically affected entities

- State agencies: OPRD (implementation, communication, and administration); other public agencies may coordinate in limited circumstances for emergency or operational needs.
 - Units of local government: minimal or none anticipated.
 - Members of the public: recreational drone users; commercial drone operators/photographers/film crews; researchers seeking to operate drones on OPRD property.
-

DESCRIBE HOW SMALL BUSINESSES WERE INVOLVED IN THE DEVELOPMENT OF THESE RULE(S):

(2) Effect on Small Businesses

(a) Number/type of small businesses:

Small businesses that may be affected include commercial photographers/videographers, drone service providers, film/media production firms, tourism/outdoor content creators, and research/consulting firms using drones. OPRD cannot reliably estimate the number.

(b) Reporting/record keeping/admin activities and cost:

If a permit is required, applicants may need to submit basic request information (e.g., location, dates, purpose, equipment, and operational plan) and comply with any conditions. Administrative time is expected to be minimal for most applicants.

(c) Cost of professional services/equipment/supplies/labor/admin:

No new equipment is required beyond what operators already use to conduct drone activities and comply with applicable FAA requirements. Potential costs are limited to staff time for application preparation and any permit/pass-related fees if established in the future.

WAS AN ADMINISTRATIVE RULE ADVISORY COMMITTEE CONSULTED? YES
