

OREGON STATE BOARD OF NURSING

NCLEX Individualized Plan of Study

What is this form?

OAR [851-031-0006](#) allows initial licensure applicants four attempts to successfully pass the NCLEX exam. After four attempts, each subsequent NCLEX attempt requires a completed retake application, payment of fees, and documentation of remediation. Applicants may complete an **NCLEX review course** or an **individualized plan of study** for remediation.

Applicants may use this form to submit their individualized plan of study for NCLEX remediation.

What must be included?

An individualized plan of study must contain the following:

- List of NCLEX domains you did not pass, from your candidate performance report. (This can be found in your Nurse Portal Message Center) You must include **all areas not passed** from your **most recent NCLEX attempt**.
- An outline of the specific content that was reviewed within that domain/topic area
- Your study methods for the content. This can include:
 - Independent or self-study
 - Study groups, tutors
 - Retaking or auditing nursing coursework
- **If your study methods include an NCLEX prep or review course, you can submit the documentation of completion in lieu of this individualized study plan**
- The total hours spent studying the content within each domain, and any resources you used (Textbooks, ATI, HESI, Kaplan...)
- The approximate start and end dates for your studying
- Your name and contact information documented on the plan of study
