

## Oregon Fire Service Coronavirus Response Team

### 03/23/2020 Information Bulletin 2020-05 Logistics –PPE Distribution Process

The Office of State Fire Marshal is the state lead for ESF-4 representing the fire service during the COVID-19 response in Oregon. As limited PPE is available the OFSCRT has taken the approach to ensure distribution to the fire service is determined by input from the fire service with a methodology that represents population, call data, transport and rural areas of the state.

PPE supply is limited and this process should **NOT** be your primary plan for orders, please continue to work with vendors to supply your department's needs. The PPE that are available to order from the stockpile currently are : **N-95's, Gowns and Face Shields.**

1. County Emergency Manager's will submit orders of PPE on behalf of the fire service. Orders are placed into the "Ops Center" software.
2. OSFM will review OPS Center daily and will review orders to determine if inventory is available to fill.
3. The OSFM will communicate with the agency or county any issues with ability to fill or further clarification.
4. Orders will be shipped on Tuesdays and Thursdays, unless there is a critical need.
5. Many orders will not be able to be filled entirely, we are only able to fill based on availability of resources from the stock pile.
