Oregon Ignition Interlock Program
Technician Qualification Information

Instructions for Completing this Examination

Before beginning this examination, you must read and understand Oregon Revised Statutes (ORS) 813.599 to 813.680 and Oregon Administrative Rules (OAR) 737-005-0105 to 737-005-0180. These can be found online or you may request printed copies of these from the Oregon Department of Transportation – Ignition Interlock Device Program.

In order to be qualified as an ignition interlock technician, you must complete this knowledge and skills examination with a score of eighty percent or greater (80%+). You may refer to the applicable ORS and OAR while taking the examination. Answers will only be accepted if they are written in block capital letters (i.e., A, B, C, D). For true and false questions, mark T for true and F for false. If a mistake is made, cross out the previous answer and initial next to your new answer. No more than one answer will be expected or allowed per question. Every question must be answered; incomplete examinations will not be scored.

Once you have completed the examination, return it to your service center. Do not return these instruction pages or exam to the Oregon Department of Transportation.

Passing this examination does not qualify you as a certified interlock technician until you meet all of the qualifications listed in OAR 737-005-0145. You may not conduct interlock related services until you are fully qualified. If you fail this test, you will be provided an opportunity to request a reexamination immediately. That examination will follow the same format containing similar questions. If the reexamination is failed, you must wait at least fifteen (15) days before requesting another retest. Any questions regarding the ignition interlock technician knowledge and skills examination or the qualification requirements may be directed to the Ignition Interlock Program of the Oregon Department of Transportation.

Additional Requirements Include:

- You must be 18 years old.
- You complete all ignition interlock manufacturer, device, service center, and technician training as provided by your device manufacturer(s). Document these locations, dates, and hours of the training.
- You must complete and sign the Ignition Interlock Device Technician Declaration Form 737-3551.
- You must pass the criminal background check as defined in ORS 813.665 and OAR 737-005-0145.
Oregon Department of Transportation
Ignition Interlock Device Technician Questions
Questionnaire #3

Name:

Question 1

If the client has a complaint concerning a service center’s failure to comply with rules, they should contact the Oregon Department of Transportation Ignition Interlock Device Program.

True or False

Question 2

Clients should be instructed that it is okay to eat whatever they like as long as they are sure it doesn’t contain alcohol while driving a vehicle equipped with an ignition interlock device.

True or False
