LEDS 20/20

POWERED BY e AGENT™

INTUITIVE. POWERFUL. RELIABLE.
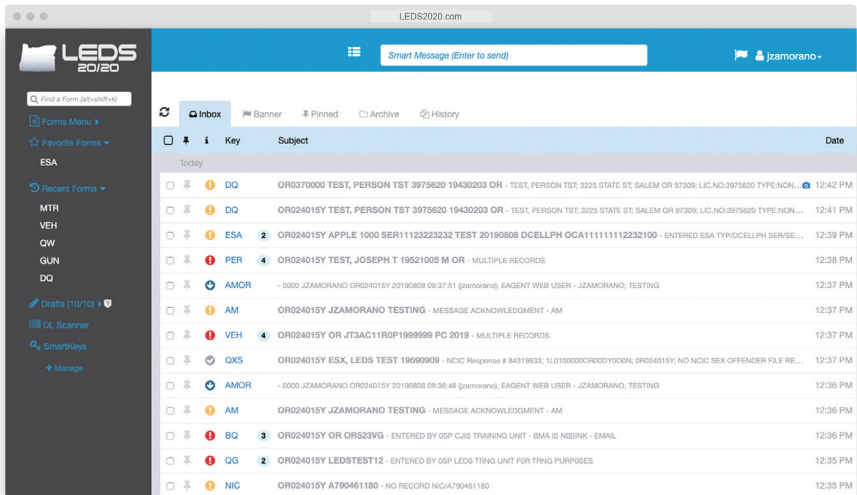

THE LEDS 20/20 PROJECT

"The LEDS 20/20 project has been underway since June 2014. Much of that time has been spent carefully researching the market space to ensure that only industry leading experts are involved in this mission critical project for Oregon Public Safety. LEDS 20/20 will modernize your system in ways that you will see and in many ways that you may not. Extensive planning has, and continues to take place to minimize project related risk and any adverse or unintended consequences to our customers.

The CJIS team at OSP, our contractors and Diverse Computing Incorporated are completely committed to project success, continued improvement and leading edge innovation for years to come. We are doing this by providing intuitive and easy to use products that maximize your ability to retrieve, view and understand the information that will make you most effective in your jobs."

— MAJOR TOM WORTHY
Oregon State Police

OFFICER-INSPIRED FEATURES

In addition to its powerful platform, eAgent 2.0 is our most user-friendly interface yet. We designed and developed everything based on real feedback from law enforcement personnel like you.

INBOX
Designed like a modern email inbox with tabs and color-coded messages to improve productivity.

SMART MESSAGE
Predictive algorithms anticipate and suggest entries for faster use.

IMPROVED FORMS
Easily access all your forms with links to your favorite and recent forms.

VINASSIST™
Quickly populates vehicle information into an EV.

MESSAGE DETAIL VIEW
Highlights search info inside your NCIC responses for faster viewing.
