Survey And HSIS Distribution By County

The table below is to provide a basic idea of when a particular county's data would be reflected in the HSIS software. It is a generality, as it is dependent on the facilities completing and submitting the survey in a timely manner, and it is dependent on the amount of time it takes for the survey to be processed once received at the Office of State Fire Marshal.

Data within the HSIS software will be different each time the HSIS is run/distributed, because surveys are constantly being received and processed. Some of what is involved in processing a survey is reviewing, researching, performing data entry, and performing quality control against the data.

While every effort is made to provide accurate and complete information in the HSIS software, it is not guaranteed that the information provided by facilities is the most accurate, current, or correct.
