

FIRE  
WARNING

**KEEP WHAT'S HOT AWAY  
FROM WHAT'S NOT.**

Our homes are filled with sources of heat ... fireplaces, space heaters, candles and wood/pellet stoves. Every year, hundreds of fires are started by Oregonians leaving combustible objects too close to an unattended heat source. It might be a child's blanket atop a space heater or a candle left burning on a bedroom dresser. In just one careless moment, the results can be devastating.

A Message from the Oregon Life Safety Team: A Coalition of  
Fire Service, Community and Insurance Professionals

**HOME FIRE  
SAFETY**

**IS UP TO YOU!**
