Annual Call for Data — Oregon Watershed Restoration Inventory (OWRI)

Date: February 18, 2026

To: Restoration Practitioners

From: Bobbi Riggers, Oregon Watershed Restoration Inventory Coordinator
971-345-7003, bobbi.riggers@oweb.oregon.gov

Voluntary watershed restoration efforts by Oregonians, an essential element of the Oregon Plan for Salmon and Watersheds, are tracked through a longstanding database known as the Oregon Watershed Restoration Inventory (OWRI). This central repository, which celebrates 30 years of data collection, is managed by the Oregon Watershed Enhancement Board (OWEB). OWRI's data tables and spatial information on completed restoration projects document Oregon's shared progress in species and habitat recovery, as well as water quality improvements.

Your contributions are important and worthy of recognition. Through OWRI's Annual Call for Data, you can voluntarily report projects completed by private forest landowners, tribes, state forests and parks, conservation organizations, and local or state agencies.

Report projects completed in 2025 (or earlier) through [OWRI Online](#) (OWRIO) by **March 31, 2026**. Contact project partners or OWRI staff if unsure whether a project was reported.

Thank you for supporting the Restoration Inventory!

Helpful guidance, interactive tools, and a sampling of publications featuring OWRI data can be accessed at:

[OWRI Information](#) – Background, details about project reporting, data uses & availability

[OWRI Data for Download](#) (1995-2024) - *click link and scroll to bottom of page – data refreshed 1/2026*
