

**BEFORE THE DIRECTOR
OF THE WATER RESOURCES DEPARTMENT
OF THE STATE OF OREGON**

KLAMATH BASIN GENERAL STREAM ADJUDICATION

In the Matter of the Claim of)	CORRECTED PARTIAL ORDER OF
THE KLAMATH TRIBES AND THE)	DETERMINATION
UNITED STATES DEPARTMENT OF)	
INTERIOR, BUREAU OF INDIAN)	Water Right Claim 624
AFFAIRS AS TRUSTEE ON BEHALF OF)	(Seeps and Springs)
THE KLAMATH TRIBES)	

The GENERAL FINDINGS OF FACT of the FINAL ORDER OF DETERMINATION is incorporated as if set forth fully herein.

**A. FINDINGS OF FACT AND DESCRIPTION OF MODIFICATIONS
TO THE PROPOSED ORDER**

1. Claims 614 and 624, (Claimants: THE KLAMATH TRIBES; AND THE UNITED STATES DEPARTMENT OF THE INTERIOR, BUREAU OF INDIAN AFFAIRS AS TRUSTEE ON BEHALF OF THE KLAMATH TRIBES (BIA)) and their associated contests¹ were referred to the Office of Administrative Hearings for a contested case hearing which was designated as Case 285.
2. Claim 614 was filed by the Klamath Tribes. It is a claim that incorporates by reference the United States Bureau of Indian Affairs' Claim 624 based on the hunting, trapping, fishing, and gathering purposes of the Klamath Treaty of 1864.
3. The Office of Administrative Hearings conducted contested case proceedings and ultimately issued a PROPOSED ORDER (Proposed Order) for Claims 614 and 624 on December 1, 2011.
4. Exceptions were filed to the Proposed Order within the exception filing deadline by (1) the Oregon Water Resources Department, (2) Upper Basin Contestants, and (3) John M. Mosby and Marilyn Mosby. Responses to exceptions were timely filed by the United States and the Klamath Tribes.

¹ Claim 614: 2062, 3018, 3121, 3251, 3316, 3646, 4004; Claim 624: 3023, 3256, 3326, 3656, 3885, 4014
CORRECTED PARTIAL ORDER OF DETERMINATION
CLAIMS 624 (Seeps and Springs) Page 1 of 21

5. The exceptions filed to the Proposed Order along with opposition to the exceptions have been reviewed and considered in conjunction with the entire record for Claims 614 and 624. The exceptions are found to be persuasive in part, and therefore, modifications are made to the Proposed Order as described in Sections A.8, A.9, A.10, and A.11, below.
6. For administrative convenience, OWRD has addressed Claim 614 in a separate Partial Order of Determination for Claim 614. Section B.2 of this Partial Order of Determination makes a legal conclusion about the relationship between Claim 614 and the United States' Claim 624, and the ownership of the water rights that are recognized in these claims.
7. The Proposed Order is adopted and incorporated, with modifications, into this Partial Order of Determination as follows:
 - a. The "Procedural History" is adopted in its entirety.
 - b. The "Evidentiary Rulings" is adopted in its entirety.
 - c. The "Expert Testimony" is adopted in its entirety.
 - d. The "Issues" is adopted is adopted in its entirety.
 - e. The "Findings of Fact" is adopted with modifications, as set forth in Section A.8, below.
 - f. The "Conclusions of Law" is adopted with modifications, as set forth in Section A.9, below.
 - g. The "Opinion" is adopted with modifications, as set forth in Section A.10 below.
 - h. The "Order" is replaced in its entirety by the Water Right Claim Description as set forth in this Partial Order of Determination for Claims 614 and 624. The Order is presented in a format standardized by OWRD. Consistent with Sections A.8, A.9, A.10 and A.11, below, the outcome of the Order has been modified (1) to correct the monthly flow values for 18 springs, and (2) to correct location information for four springs.
 - i. The "Attachment A" is adopted with modifications as set forth in Section A.11 below.
8. **Findings of Fact.** Within the Proposed Order's "Findings of Fact" section, a new Finding of Fact 26 is added as follows:

26. A letter sent by OWRD to the Claimants prior to the claim filing deadline states that "[c]laimants will not be allowed to make an additional claim to water by enlarging their original claim after the April 30, 1997, claiming deadline." Letter from A. Reed Marbut to Carl Ullman, dated April 25, 1997, OWRD Ex. 1, pgs. 6-7. The Claimants were therefore aware, prior to the claim filing deadline, that OWRD would not allow increases in the quantity of water claimed after the claim filing deadline.
9. **Conclusions of Law.** Within the Proposed Order's "Conclusions of Law" section, Conclusion of Law 2 is replaced in its entirety as follows:
 2. Increases in the quantity of water claimed by Claimants in their Amended Claims filed October 1, 1999 are prohibited by ORS 539.210.

The remainder of the Conclusions of Law are incorporated without modification.

Reason for Modification: To make the Conclusions of Law consistent with OWRD's interpretation of the law.

10. **Opinion.** Within the Proposed Order's "Opinion" section, Section III of the Opinion is replaced in its entirety as follows:

III. Amended claims.

Through contest amendments and closing briefs, Contestants argue Claimants' amended claims, filed October 1, 1999, are impermissible because they expand on the initial claims and therefore constitute new claims under the Department's interpretation of the terms "amendment" and "new matter." OWRD asserts, in closing briefs, that because no extension beyond the April 30, 1997 deadline was granted by the Department, those amended claims for increased flows constitute impermissible new claims rather than permissible amended claims. Claimants rely on the 1998 letter from OWRD, as well as the Department's position in other cases throughout this adjudication, to support their position that claim amendments were permissible until the commencement of the open inspection period. The parties each rely, to varying degrees, on ORS 539.210, OAR 690-030-0085, and OAR 690-028-0065 to support their arguments. Claimants also argue that this issue has been addressed by ALJ Russell in the Amended Order.

As a preliminary matter, it is important to note that, while ALJ Russell did address this argument in the Amended Order, he did not dispose of the contest raised by UBC. Rather, ALJ Russell simply refused to summarily dismiss Claimants' amended claims or limit such claims to the amounts reflected in the initial claim. For that reason, the arguments raised by Contestants and OWRD must be addressed in this order.

OWRD incorporates its GENERAL CONCLUSIONS OF LAW CONCERNING CLAIM AMENDMENTS. In addition, OWRD addresses certain conclusions reached in the Proposed Order and certain arguments made by the Claimants in their closing briefing and responses to exceptions.

The Proposed Order's allowance of upward claim amendments after the claim-filing deadline is based on (1) an interpretation of ORS 539.210 and OAR 690-030-0085, and (2) a letter sent by OWRD to Claimants in 1998, which the Proposed Order interprets as allowing upward amendments of the claims at issue.

A. The Proposed Order incorrectly interprets ORS 539.210 and OAR 690-030-0085

The Proposed Order concludes that upward amendments must be allowed after the claim-filing deadline, because not doing so would be inconsistent with OAR 690-030-0085. OAR 690-030-0085 provides, in relevant part:

(1)***[T]he Water Resources Director (Director) may not permit any alteration or amendment of the original claim after the period for inspection has commenced, but any new matter that the claimant may wish to set forth must be set forth in the form of an affidavit, regularly verified before a proper officer and filed with the Director prior to the close of the period for public inspection.

OWRD interprets OAR 690-030-0085 to mean that partial withdrawals of claims (including any downward adjustments of claim terms) are not “alteration[s] or amendment[s] of the original claim” and are thus permissible after the beginning of open inspection.

OWRD also concludes that ORS 539.210 prohibits certain increases in claim terms after the claim-filing deadline, because the increases are significant enough to constitute “new” claims – claims not made “at the time and in the manner required by law” – that are time-barred by ORS 539.210.² Therefore, some changes to claims are prohibited by statute even prior to the beginning of the period for inspection.

The Proposed Order concludes that OWRD’s interpretations of OAR 690-030-0085 and ORS 539.210 are inconsistent with the wording of OAR 690-030-0085, because OAR 690-030-0085 “implies” that claim amendments are permissible prior to the beginning of the period for public inspection. The Proposed Order also concludes that OWRD’s interpretations effectively render OAR 690-030-0085 meaningless, because the rule does not prohibit the downward amendment of claims, and because the rule does not appear to the ALJ

² ORS 539.210 provides:

Whenever proceedings are instituted for determination of rights to the use of any water, it shall be the duty of all claimants interested therein to *appear and submit proof of their respective claims, at the time and in the manner required by law.* Any claimant who fails to appear in the proceedings and submit proof of the claims of the claimant shall be barred and estopped from subsequently asserting any rights theretofore acquired upon the stream or other body of water embraced in the proceedings, and shall be held to have forfeited all rights to the use of the water theretofore claimed by the claimant.

(Emphasis added). To provide certainty to water users, ORS 539.210 requires that prospective claimants in an adjudication appear and define their claims “at the time and in the manner required by law,” or be barred from asserting claims in the future. Many of the attributes that make up a water right, such as the quantity of water, the season of use, and the priority date, can result in the use of water by a right holder to the exclusion of other, junior right holders. When a claimant attempts to increase the terms of one of these attributes, that claimant is effectively making a “new” claim for water use – by claiming water use that was not covered by the original claim and that could have an effect on the use of water by other users. The statutes and rules governing the adjudication require claimants to identify these terms by a deadline specified by OWRD. OWRD considers that identifying the amount of water claimed is part of the “manner” required by law. OWRD therefore interprets ORS 539.210 to mean that a claimant who subsequently attempts to increase the claimed amount of water has failed to make this “new” claim for water use in the time and manner required by law, and is barred from doing so by ORS 539.210.

to prohibit any upward amendments of claims that are not already prohibited by ORS 539.210.

First, by its own terms OAR 690-030-0085 is not a grant of authority to make any particular “alteration or amendment of the original claim.” It is a *prohibition* on any such “alterations” or “amendments” after the beginning of the period for public inspection. OWRD’s interpretation of ORS 539.210 therefore does not prohibit any changes to claims that OAR 690-030-0085 requires OWRD to permit, and that interpretation cannot be said to be inconsistent with the terms of the rule.

Second, ORS 539.210’s prohibition on untimely “new” claims does not deprive OAR 690-030-0085 of all meaning. OWRD interprets ORS 539.210 to mean that adjudication claimants may amend their claims after the claim filing deadline by making certain modifications to the location of a place of use, for example, without increasing the overall size of the place of use. Claimants may also make changes to the location of a point of diversion or increase the number of claimed points of diversion, as long as the overall claimed quantity of water does not increase. None of these amendments to claims result in a “new” claim of water use that was not made “at the time and in the manner required by law.”

Because OWRD’s interpretation of OAR 690-030-0085 is not inconsistent with “the wording of the rule itself, or with the rule’s context, or with any other source of law...”, the interpretation is entitled to deference. *Don’t Waste Oregon Com. v. Energy Facility Siting Council*, 320 Or 132, 142 (1994). The Claimants’ upward amendments to the quantity of water claimed are time-barred “new” claims and must be denied.

B. OWRD’s December 16, 1998 letter does not permit the increases in the claimed quantity of water at issue in this case

The Proposed Order concludes that a letter sent by OWRD to the Claimants in 1998 allows the Claimants to increase the claimed quantity of water for the claims at issue in this case. The relevant portion of the letter states: “[t]he Department does not intend to close the amendment period before the commencement of open inspection, and will accept claim amendments for filing until the close of business on the day before the commencement of open inspection.” Letter from Dick Bailey, Adjudicator, to Michael Gheleta, federal attorney, dated December 16, 1998, Ex. J to the Affidavit of David W. Harder, dated April 18, 2011.

This language does nothing but reiterate the language in OAR 690-030-0085. It does not describe what constitutes a permissible amendment, or otherwise interpret the term “amendment.” The Claimants were entitled to file amended claims up until the “close of business on the day before the commencement of open inspection,” *provided* that the amendments made were allowable under ORS

539.210. As described above, an upward amendment to the claimed quantity of water is not an allowable amendment under ORS 539.210.

In addition to inappropriately relying on the 1998 letter, the Proposed Order ignores a letter sent by OWRD to the Claimants prior to the claim filing deadline, which states that “[c]laimants will not be allowed to make an additional claim to water by enlarging their original claim after the April 30, 1997, claiming deadline.” Letter from A. Reed Marbut to Carl Ullman, dated April 25, 1997, OWRD Ex. 1, pgs. 6-7. The Claimants were aware, prior to the claim filing deadline, that OWRD would not allow increases in the quantity of water claimed after the claim filing deadline. OWRD’s position has not changed. ORS 539.210 has not changed. The Proposed Order erred in allowing the upward amendments.

The remainder of the Opinion section is incorporated without modification.

Reasons for Modification: To make the Opinion section consistent with the Department’s legal conclusions, and to describe the legal reasoning behind certain of the Department’s legal conclusions.

11. **Attachment A.** The table identified as “Table 3” in Attachment A to the Proposed Order is modified as follows (additions are shown in underline text; deletions are shown in ~~strikethrough~~ text):

Reason for Modification: To limit the approved flow quantities to those claimed by the United States on April 30, 1997; to correct certain spring locations based on the evidence in the record.

B. DETERMINATION

1. The Proposed Order is adopted and incorporated, with modifications, into this Partial Order of Determination as follows:
 - a. The “Procedural History” is adopted in its entirety.
 - b. The “Evidentiary Rulings” is adopted in its entirety.
 - c. The “Expert Testimony” is adopted in its entirety.
 - d. The “Issues” is adopted is adopted in its entirety.
 - e. The “Findings of Fact” is adopted with modifications, as set forth in Section A.8, above.
 - f. The “Conclusions of Law” is adopted with modifications, as set forth in Section A.9, above.
 - g. The “Opinion” is adopted with modifications, as set forth in Section A.10 above.
 - h. The “Order” is replaced in its entirety by the Water Right Claim Description as set forth in this Partial Order of Determination for Claims 614 and 624. The Order is presented in a format standardized by OWRD. Consistent with Sections A.8, A.9 A.10, and A.11 above, the outcome of the Order has been modified (1) to correct the

monthly flow values for 18 springs and (2) to correct location information for four springs.

- i. The” Attachment A” is adopted with modifications as set forth in Section A.11, above.
2. Both the United States and the Klamath Tribes filed claims based on the hunting, trapping, fishing and gathering purposes of the Klamath Treaty of 1864. The Klamath Tribes’ Claim 614 incorporates the United States’ Claim 624 by reference. The Klamath Tribes’ claim is duplicative of the United States’ claim, not additive. The United States holds the rights recognized herein in trust for the Klamath Tribes. *Colorado River Water Conservation Dist. v. United States*, 424 US 800, 810 (1976). As a result, Claim 614 is denied in a separate Partial Order of Determination for Claim 614, and the United States’ Claim 624 is determined in this Partial Order of Determination for Claim 624.
3. Based on the file and record herein, IT IS ORDERED that Claim 624 is approved as set forth in the following Water Right Claim Description.

CLAIM NO. 624

CLAIM MAP REFERENCE:

CLAIM # 624, PAGES 116 – 148, AMENDED MAPS FILED OCTOBER 1, 1999

CLAIMANT: THE KLAMATH TRIBES
PO BOX 436
CHILOQUIN, OR 97624

UNITED STATES DEPARTMENT OF INTERIOR
BUREAU OF INDIAN AFFAIRS AS TRUSTEE ON
BEHALF OF THE KLAMATH TRIBES
911 NE 11TH AVE
PORTLAND, OR 97232

PURPOSE or USE:

SEEPS AND SPRINGS USE TO PRESERVE AND PROTECT THE TRIBES' HUNTING,
FISHING, TRAPPING AND GATHERING RIGHTS ON FORMER RESERVATION LAND

PERIOD OF ALLOWED USE: JANUARY 1 - DECEMBER 31

DATE OF PRIORITY: TIME IMMEMORIAL

RATE OF USE: THE RATE OF USE IS AS FOLLOWS, NOT TO EXCEED A TOTAL OF 2.633
CUBIC FEET PER SECOND (CFS):

**THE SOURCES OF WATER, DATES OF PRIORITY, RATE OF USE (CFS), AND POINTS OF
DIVERSION AND PLACE OF USE LOCATIONS ARE AS FOLLOWS:**
