<p>690-300-0010 (57)(C)(c) v1</p>	<p>RACM - Question: is this still needed given that it only applied to applications received prior to 7/17/1992? In other rule divisions, obsolete language was proposed to be removed Recommend -Remove (C)(c)</p> <p>(c) For surface water applications received before July 17, 1992, the provisions of subsection (a) of this section shall apply except that the determination of whether a requested source is over-appropriated under OAR 690-400-0010 and 690-410-0070 shall be based upon whether the quantity of water available during a specified period is not sufficient to meet the expected demands for all water rights at least 50 percent of the time during that period.</p>	<p>56 - Deletion made. Renumbered. Only one application pending and these rules wouldn't apply to it anyways (the rules in effect at the time would).</p>	<p>Complete. Changed in v2.</p>
