THE COUNTY OF HARNEY

-----

In the Matter of the Determination )  
of the Relative Rights of the Various )  
Claimants to the use of the Waters ) NO.  
of the Silvies River and its Tributaries. )

DECREE ON MANDATE

This matter, having heretofore regularly been heard and considered by the Circuit Court of the State of Oregon, for Harney County, and the said Court having duly and regularly made its findings of fact and decree, and certain claimants being dissatisfied therewith having appealed from the same to the Supreme Court of the State of Oregon, the matter was thereupon heard and argued before said Court and submitted; after due consideration the said Court found that there was partial error as alleged in said appeal, and did thereupon

ORDER, ADJUDGE AND DECREE that the decree of the said Circuit Court be modified, and did thereupon issue its mandate directed to said Circuit Court which is on file herein, and it appearing that the claimants affected are entitled to judgement in accordance with said decree and mandate, which mandate is as follows:

BE IT REMEMBERED that at a term of the Supreme Court of the State of Oregon, held at the Supreme Court Room in the City of Salem, on the first Monday of March, 1925,

On this Friday the 2nd day of October, 1925, the same being the 49th judicial day of said term, there were present:

Thomas A. McBride, Chief Justice,  
Henry J. Bean, Associate Justice,  
George M. Brown, Associate Justice,  
George H. Burnett, Associate Justice,  
John L. Rand, Associate Justice,  
Oliver P. Coshow, Associate Justice,  
Harry H. Belt, Associate Justice,  
Arthur S. Benson, Clerk,

whereupon the following proceedings were had:

IN THE MATTER OF THE DETERMINATION OF THE ) RELATIVE RIGHTS OF THE VARIOUS CLAIMANTS TO ) THE USE OF THE WATERS OF <u>SILVIES RIVER,</u> ) AND ITS TRIBUTARIES, )	IN BANC.  Appeal from Harney County.
--	--

This cause having at Salem, on the sixth day of November, 1924, been duly tried, argued and submitted to the Court upon all the questions arising upon the transcript record and evidence, and then reserved for further consideration; and

An opinion having been rendered in this cause on the 23rd day of June, 1925, and the matter having been fully considered, it is now ORDERED, ADJUDGED AND DECREED by the Court that there is partial error as alleged. It is, therefore, ORDERED, ADJUDGED AND DECREED by the Court that the Decree of the Court below be and the same is in all things affirmed, except so far as the same is hereinafter expressly modified.

J. W. BIGGS' CLAIM

The award to this claimant with the number of acres found by the Court and Water Board is affirmed. The date of priority of 1886, however, is not supported by competent testimony. Within sixty (60) days after the filing of the Mandate herein in the Circuit Court, the claimant J. W. Biggs may apply to said Court for an order referring his claim to the State Engineer, in order that evidence may be taken in the regular way to fix the proper date of priority; that upon same being fixed it shall be inserted in this Decree, and the Supreme Court is authorized to correct the Decree accordingly; that if said application is not made within the time specified, the priority for such land shall be 1893.

XIII.

CLAIM OF THE SILVIES RIVER IRRIGATION COMPANY

Finding 15 of the Decree of the Circuit Court as the same fixes the rights of this Company, shall be modified to read as follows:

15.

That the Silvies River irrigation Company filed a statement and proof of claim in the above entitled proceeding, claiming a water right initiated under two notices of appropriation, recorded July 23, 1901, and signed by the Harney Valley Improvement Company, and a third notice of appropriation recorded July 24, 1901, signed by the Harney Valley Improvement Company, and a notice of appropriation recorded October 7th, 1907, signed by the Silvies River Irrigation Company, and an amended notice recorded the 29th day of October, 1907, signed by the Silvies River Irrigation Company.

That the lands to be irrigated under said notices were described as follows: All of T. 23 S.R. 32 $\frac{1}{2}$  E., all of T. 24 S.R. 32 $\frac{1}{2}$  E., all of T. 24 S.R. 33 E.W.M., and sections 6, 7, 8, 9, 16, 17, 18, 19, 20, 21, 22, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, T.23 S.R. 33 E., also Sections 1,2,3,4,5,6,10,11,12,13,14,15,22,23,24,25, 26, T. 24 S.R. 32 E.W.M.

That construction upon the ditch to irrigate said lands was begun in good faith after the posting of said notice and prior to the 29th day of March, 1908. SILVIES RIVER - 25.

That on or about the 29th day of March, 1908, the Pacific Live Stock Company began a suit in the Circuit Court of the United States for the District of Oregon against the Silvies River Irrigation Company and the Harney Valley Improvement Company, and said Silvies River Irrigation Company and the Harney Valley Improvement Company were enjoined from proceeding with the work of construction; that said suit was tried in said Court and said Silvies River Irrigation Company and Harney Valley Improvement Company were enjoined from proceeding with such construction, but the right was reserved to them and to each of them to apply to said Circuit Court of the United States for the District of Oregon, at any time after said decree for the vacation of the injunction, if it should thereafter be determined in some appropriate proceeding that there is any surplus water subject to appropriation by them or either of them, and said suit was thereupon appealed to the Circuit Court of Appeals for the Ninth Circuit, which Court reversed and remanded said cause with directions to allow the parties a reasonable time to take proceedings before the State Water Board of the State of Oregon, and in the event that they did not proceed thereunder within a reasonable time to require all parties interested to interplead and for a lower court to proceed to a determination of the issues between them in accordance with the laws of the State of Oregon. The parties have never proceeded further with said suit, but the proceedings before the State Water Board were instituted and all parties interested have appeared and filed claims thereunder, and the rights of said Silvies River Irrigation Company and Harney Valley Improvement Company under such appropriation notices are herein determined as follows:

That the rights of the Harney Valley Improvement Company shall be as tabulated in the tabulation hereinafter contained.

That the Silvies River Irrigation Company has a valid appropriation under the amended notice of appropriation of water filed for record on the 29th day of October, 1907, and having a priority date for such appropriation of the 17th day of October, 1907. That the lands to be irrigated are such as described in the notice and hereinbefore described in this finding. That none of such lands are now irrigated, and said Silvies River Irrigation Company shall be entitled to divert water for the irrigation of such lands under and in accordance with said priority date. The water master shall regulate such diversion in accordance with such date of priority, and shall not permit any diversion of any water by said Company at any time when such diversion would interfere with the rights of any water users having an earlier date of priority than such company.

Upon the filing of this mandate in the Circuit Court, the said Silvies River Irrigation Company shall have the right to apply to the Circuit Court to fix a date in the future when actual construction work must begin on its appropriation and when it must be completed and water put to a beneficial use. The Circuit Court, if it deems same advisable, may refer the matter to the State Engineer under Section 5717 of Oregon Laws.

The water under such appropriation shall not be applied upon any land other than that upon the land for which the same was appropriated, except that the place of use may be changed upon proper application and permit from the State Engineer.

That in lieu of the lands proposed to be irrigated in Sections 35, 21 and 19, and a portion of 17, T. 23 S. R. 33 E.W.M., the said Company may apply to the State Engineer to irrigate other lands described as follows:

Section 16 T. 23 S.R. 31 E.W.M.  
 Section 4 T. 24 S.R. 31 E.W.M.  
 Section 6 T. 24 S.R. 32 E.W.M.  
 Section 7 T. 24 S.R. 32 E.W.M.  
 Section 24 T. 24 S.R. 31 E.W.M.  
 Section 16 T. 24 S.R. 31 E.W.M.  
 Section 14 T. 24 S.R. 31 E.W.M.  
 Section 13 T. 24 S.R. 31 E.W.M.  
 Section 12, T.24 S.R. 31 E.W.M.

and if sancationed by the State Engineer, such change may be made, but the same shall not affect any prior right decreed herein but shall be subordinate thereto.

#### XIV.

##### MODIFICATION OF FINDING 19.

That Finding 19 of the Decree of the Circuit Court be modified as herein provided. That the same be stricken from the Decree of said Circuit Court and the following inserted in lieu thereof:

The water master shall distributá

SILVIES RIVER - 26.

the water for the lands described in these findings and in this decree, in accordance with this decree. The parties whose rights are adjudicated herein, and each of them, are herein, and each of them are hereby, directed and required to regulate, operate and construct and maintain their dams, ditches, canals, headgates, measuring devices, reservoirs and other works of all kinds and description, used for the purpose of distributing or aiding in the distribution of the waters of Silvies River system, to or upon the lands described in these findings and this decree in such manner as to enable the water master to divert and apportion the water for said lands in accordance with the dates of priority of the several water users awarded a water right herein.

"In all cases of construction or reconstruction or repairs of dams, canals, ditches, headgates, laterals, or other irrigation works, or systems for appropriating water, or in changing streams, sloughs, branches or depressions used as ditches, or as a means of conducting water from the river for any of the land awarded a right herein, in order to place such slough or branch stream or ditch on the line of the land over which the same runs, or to straighten the same, or for any purpose, the water user making such change, or building such works or system shall perform such work so as not to hinder or prevent the flow of water to any of the land awarded a right herein. And in the case of such change or reconstruction, a new ditch, flume or conduit for water shall be furnished to take the place of the old, so that the various water users awarded a right herein shall be afforded a means of conducting their water equal to the old method before such change, upon their contributing an equitable part of the labor and expense thereof. In cases where the water formerly ran wholly or in part over one owner's land to that of another without a regular ditch or other artificial works, and it becomes necessary or convenient to build a ditch or other works, the labor and expense thereof shall be equitably borne by the interested parties. Such work of regulation and construction to be done under the guidance and direction of the State Engineer and Water Master; all such new ditches or conduits to be of the size and dimension as directed by the Water Master or State Engineer. All to the end that the waters of Silvies River and its tributaries may be distributed in accordance with this decree."

XV.

MODIFICATION OF FINDING 23.

That Finding No. 23 as the same appears in the Decree of the Circuit Court be stricken therefrom. That if there be any decrees or agreements on file which have not been considered and passed upon by the Circuit Court, the said Court within sixty days after the going down of this mandate shall pass upon such decrees as are presented to it, and make such changes and corrections in the decrees as may be proper as the result of the construction and adjudication of such decrees as may be called to its attention.

XVI.

MODIFICATION OF FINDING 27.

Finding No. 27 of the Decree of the Circuit Court is hereby modified by striking therefrom the following sentence:

"That a right to store water is a separate and distinct right from the right to use such water for irrigation, and a water right for irrigation does not give the water user entitled thereto the right to store such water."

XVII.

MODIFICATION OF FINDING 32.

Finding No. 32 as prepared by the Circuit Court shall be stricken from said decree, and the same modified by inserting in lieu thereof a finding as follows:

SILVIES RIVER - 27.

"That in the tabulation hereinafter set forth wherein the rights of diversion are placed from any sloughs that receive their water from the main stream of the Silvies River or its tributaries, such diversion shall be considered as being from said main stream of Silvies River or its tributaries, as the case may be."

XVIII.

MODIFICATION OF FINDINGS 33 and 34, WITH REFERENCE TO THE  
DUTY OF WATER.

That Findings Numbered 33 and 34 as the same now appear in the Decree of the Circuit Court be stricken from said decree and that the said decree be modified and that there be inserted in lieu of such findings, a finding in the words and figures as follows:

"That all lands in Harney Valley irrigated or to be irrigated from Silvies River or its branches or tributaries, and all lands not in Harney Valley irrigated or to be irrigated from Silvies River, are entitled to not to exceed one-eightieth of one cubic foot of water per second for each acre of such lands, and not to exceed three acre feet per acre. It appearing that during the spring and early summer there is a large flow of water in Silvies River and its tributaries, and that heretofore the water users have used a large head of water during such time and should be permitted to continue the use of more than one-eightieth of a cubic foot per acre in order to approximate the quantity to which they are entitled for the irrigation season; therefore, the right to the use of water from Silvies River and its tributaries, except as modified by special findings herein, shall be limited to the diversion of not to exceed one and one-half acre feet per acre during any period of thirty days, prior to June first of each year, and thereafter not to exceed one acre foot per acre during any period of thirty days, provided that the total quantity of water diverted during the irrigation season shall not exceed three acre feet per acre, and that the rate of flow shall not exceed one-fortieth of a cubic foot per second per acre, except where rotation is practiced as herein provided.

The above provisions shall be in effect for a period of three years after the filing of this mandate in the Circuit Court. That from and after said date all lands in Harney Valley, irrigated or to be irrigated from Silvies River or its branches or tributaries, and all lands not in Harney Valley irrigated, or to be irrigated from Silvies river are entitled to not to exceed one-eightieth of one cubic foot of water per second for each acre of such lands; provided that the total quantity of water diverted during an irrigation season shall not exceed two acre feet per acre; that all lands not in Harney Valley, irrigated or to be irrigated from tributaries of Silvies river are entitled to not exceed one-sixtieth of one cubic foot of water per second for each acre of such lands, provided that the total quantity of water diverted during an irrigation season shall not exceed two acre feet per acre; provided, however, that when the ditches, canals, headgates, measuring devices, and other irrigation systems necessary to permit a determination with reasonable accuracy of the amount of water necessary for the irrigation of such lands shall be constructed and actual tests have been made, the amount allowed by this decree may be changed by the Circuit Court and the duty of water will be left open for further determination at a future time.

That the quantity of water to which all of such lands are entitled shall be measured at the respective headgate of the division, ditch or lateral of said claimants from which the water is to be used on the land to be irrigated, provided, however, that until such time as the ditches, canals, headgates or levees or any of them or any other works which may be necessary to permit a determination with reasonable accuracy of the amount of water diverted and used upon any tract or tracts of land

in Harney Valley, shall be constructed, the water for the irrigation of such tract or tracts for which no such measuring devices or controlling works are provided shall be measured at some proper and convenient point or points as near as may be to the lands to be irrigated. Such point or points of measurement shall be subject to change from time to time as changed conditions make such changes convenient or expedient, and the water for the irrigation of such tract or tracts for which no measuring devices or controlling works are provided shall be distributed to those entitled to its use by the regulation of dams, headgates or other works or devices for controlling or influencing the flow of the water, as nearly as may be in accordance with the priorities of the respective rights; subject, however, to the provisions of the decree hereinafter referred to and other findings herein. That the quantity of water herein specified to which any of such lands are entitled shall include the supply furnished or which may be or become available to any tract on account of the irrigation of other lands.

That the irrigation season, during which the water users from Silvies river and its tributaries shall be entitled to the use of the water for irrigation purposes, extends to March 20th to September 1st of each year; provided, however, that as irrigation depends upon climatic conditions and changes in the season, the season hereby fixed shall not prevent water users awarded a right herein to use the water of Silvies River and its tributaries for the purposes of irrigation according to their relative rights of priority, and in quantities in accordance with this decree, at other times when such use will be beneficial to the land and the crops grown thereon when the ground is not frozen and the same can be used without needless waste. "

#### XIX.

##### MODIFICATION OF BINDING 35.

That the decree of the Circuit Court be further modified by striking out paragraph 35 and inserting in lieu thereof a new paragraph as follows:

"In this proceeding in all cases wherein a water right has been awarded for lands to which the water has not been applied completely to a beneficial use the respective claimants shall be and they hereby are allowed five years from the date of the entry of the mandate herein in the Circuit Court, or such further time as may be allowed by the State Engineer to make a complete beneficial use of the water."

#### XX.

##### MODIFICATION OF FINDING 26.

That finding 26 as the same appears in the decree of the Circuit Court be modified to read as follows:

"In all cases in this decree wherein the right to use water out of more than one stream or branch of a stream is confirmed for the same land, and the amount of water to be taken from each respective stream or branch is not determined herein, the matter of determining the quantity of water to be taken from each stream or branch for such land shall be left open for the Circuit Court to determine after actual experiment and use of the water upon the lands have been made so that an equitable apportionment of the amount to be used from each stream or branch can be made with a reasonable degree of accuracy, which cannot be done at the present time."

XXI.

CLERICAL AND SIMILAR MATTERS IN DECREE.

Following Paragraph 35 of the decree of the Circuit Court a new paragraph is added to said decree, as follows:

(A) That the Circuit Court shall make corrections of any clerical errors in these proceedings within six months from the date of filing this mandate in said Court.

(B) That in the decree of the Circuit Court and in the mandate of this Court modifying same, the figures in the column headed "Amount Cubic Feet Per Second" shall not be deemed controlling but the matter shall be controlled by the provisions of Paragraph 33 of the Decree of the Circuit Court as modified by the foregoing provisions of this mandate. In view of the fact that the duty of water and the amount of cubic feet per second per acre in subject to being changed in the future, the Circuit Court, or the State Engineer, under the directions of said Court, are hereby authorized to correct the tabulations in accordance with the Decree of said Court; when the duty of water is fixed and determined, such correction may be made on the original decree of the Circuit Court as modified if the Court deem same expedient.

(C) If by this modification of the decree of the Circuit Court certain paragraphs and findings have been eliminated and others added thus necessitating a change in the numbering of the paragraphs and findings in order to keep consecutive numbers, the Circuit Court in its decree to be entered in accordance with this mandate, is authorized to make such changes. The references herein to the paragraphs and findings of the Circuit Court refer to the numbering in the original decree of that Court."

XXII.

WASTE OF WATER.

Following the preceding paragraph of this mandate, a new paragraph is added to the decree of the Circuit Court as follows:

" Commencing three years after the filing of this mandate in the Circuit Court, any and all waste in the use of water by the parties awarded a right to the use of water from Silvies River, its tributaries, branches or sloughs, is hereby strictly enjoined and inhibited."

With and subject to the modifications herein mentioned, the decree of the Circuit Court is affirmed.

Each of the parties to pay his, her or its respective costs.

And it is further ordered that this cause be remanded to the Court below from which this appeal was taken, with directions to enter a decree in accordance herewith and to carry out the directions herein contained."

NOW, THEREFORE, based on said mandate, and in accordance therewith, it is CONSIDERED, ORDERED, ADJUDGED AND DECREED as follows:

1.

That on the 18th day of November, 1911, there was filed in the office of the State Water Board of Oregon, a petition signed by R.R. Sitz, Fred Otley and M. B. Hayes, water users on said stream, requesting a determination of the relative rights of the various claimants to the waters of said stream, and that said petitioners were users of the waters of the said Silvies River and its tributaries, a tributary of

Malheur Lake. That thereupon the said State Water Board, after a full investigation

and due consideration of said petition, finding the facts and conditions such as to justify the making of a determination of the relative rights of the various claimants of said stream and its tributaries, made and entered an order in the records of said office, fixing a time and place for the beginning and making of such an examination of said stream by the State Engineer, as would enable the said Board to determine the rights of the said claimants, and also the time and place for the beginning and taking of testimony by the Superintendent of Water Division No. 2. That the said time and place when said State Engineer, or his assistants should begin the examination of said stream was set by said Board, for Thursday, the 22nd day of August, 1912, and the time when the Superintendent of Water Division No. 2, should attend and take the testimony of the various claimants was set by order of said Board on Monday, the 26th day of August, 1912, at Seneca, Harney County, Oregon, and on Wednesday and Thursday, the 28th and 29th days of August, 1912, at the Court House at Burns, Harney County, Oregon, and on Saturday the 31st day of August, 1912, at Lawen, Harney County, Oregon, and from Thursday the 5th day of September, to Thursday the 5th day of December, 1912, at the office of the Superintendent of Water Division No. 2, at La Grande, Union County, Oregon.

2.

That a notice was prepared by said Board setting forth the date when the State Engineer, or his assistants, would begin the investigation of the flow of said stream and the ditches diverting water therefrom, and the time and place certain when the Superintendent of Water Division No. 2 would begin the taking of testimony as to the relative rights of the various claimants to the waters thereof, and said notice was published in the Harney County news, a newspaper published weekly at Burns, Harney County, Oregon, and of general circulation in the Counties of Grant and Harney, Oregon, for a period of 2 consecutive weeks, beginning on the 17th day of July, 1912, and ending on the 24th day of July, 1912, the date of the last publication of said notice being more than 30 days prior to the date fixed for the making of said examination and measurement of said streams and ditches by the State Engineer, and for the beginning of taking of testimony by the Division Superintendent.

3.

That prior to the 11th day of July, 1912, the Superintendent of Water Division No. 2, did send by registered mail, to each person, firm and corporation claiming a right to the use of the water of said stream, or any tributary thereof,

and to each person, firm and corporation owning or being in possession of land bordering on or having access to said stream or its tributaries, insofar as said claimants, owners, firms or corporations, in possession, could be reasonably ascertained, a similar notice to such published notice, setting forth the date when the State Engineer would commence the examination of said stream and its tributaries, and the ditches diverting water therefrom, and the time and place certain when the Superintendent did enclose with each of said notices a blank form upon which the said claimants or persons in possession, should present in writing all the particulars necessary for the determination of his rights to the waters of said stream, or a tributary thereof, under oath. That due proof of publication of said notice and of the sending of said notice by registered mail has been made, and is duly filed and is now a part of the record hereof,

4.

That at the time specified in said original notice, a duly qualified assistant of the State Engineer of the State of Oregon, did proceed to make an examination of the said stream and its tributaries, and all of the ditches diverting water therefrom, and of the lands irrigated and susceptible to irrigation from said ditches and canals, together with the measurements thereof, which observations and the measurements were made a matter of record in the office of the State Engineer, and the State Engineer did prepare a plat and a map on a scale of measurement of 2 inches to the mile, showing with substantial accuracy the course of said stream and its tributaries, and the location of the various ditches diverting water therefrom, and the legal subdivisions of land which had been irrigated or which were susceptible to irrigation from said ditches and canals already constructed, blue prints and copies of said maps and information duly certified to by the State Engineer being now on file herein, and a part of the records hereof.

5.

That the following named persons, firms and corporations, were duly notified by registered mail, and by publication of said notice, as hereinbefore set forth, but that each and all of them although so notified, have failed, neglected, and refused to appear herein, and submit proofs of their rights to said stream, if any they have or claim, and that such parties are in default and that said default should be, and hereby is, entered against them, to-wit:

9.

That after the filing of said contests the Superintendent of Water Division No. 2, did fix the time and place for the hearing of each and every of said contests and served notice of hearing of said contests on each of the parties to each and every of said contests, which said notices of hearing set the date for said hearing at more than thirty days and less than sixty days from the date said notice of hearing was served upon each of said parties. That due proof of service has been filed herein;

That said Superintendent of Water Division No. 2 did, at the time so set by said notices, begin the taking of testimony upon said contests, and did continue the said taking of said testimony upon said contests from time to time until each and every of said contests were fully heard, settled or otherwise disposed of.

10.

That thereafter exceptions were filed by various water users to the Order of Determination of the Board, duly bringing said matters for consideration of the Circuit Court for Harney County, and it thereafter appearing that it was necessary to remand the proceedings to the said Water Board. On November 6, 1919, an order remanding the order to the Board for the taking of certain testimony before a referee was duly made. That said testimony was taken, reported to the Board and further findings therein made by the said Board, and the findings and tabulation herein made by the Court include findings on matters contained in the original hearing, as well as upon the later hearing.

11.

That each and all of the contests and exceptions filed herein involve the dates of appropriation, the acreage irrigated, together with the amount of water necessary to irrigate the land. That the date of the appropriation and acreage irrigated by each of the claimants to the use of water of said River is hereby established as set forth in the tabulation hereinafter contained. That the amount of water necessary to irrigate said lands is hereby established as set forth in the Court's general finding upon the duties of water. That any question arising especially to any contest, exception or claim, if not wholly settled by the general findings, are hereby settled by a special finding.

12.

That Silvies River and its tributaries flow through three agricultural valleys; Bear Valley near the headwaters of the stream, Silvies Valley immediately below, and Harney valley, the most important of the three, lying adjacent to Malheur Lake, into which Silvies River empties. That the almost simultaneous melting of the snow on all parts of the drainage area gives rise to excessive floods during the spring season. That the waters of the stream are used to a limited extent for the irrigation of lands in Bear Valley and Silvies Valley, but the irrigation of lands in these valleys is of comparatively small importance as compared to the irrigation of lands in Harney Valley, not only on account of the much larger area involved in the latter valley, but also because water used in the upper valleys to a large extent finds its way back into the channel of Silvies River and is available for use in Harney Valley. That the stream passes through a narrow gorge between Silvies Valley and Harney Valley, and then spreads out upon the practically level lands of Harney Valley.

That in Harney Valley during the spring of each year and while the stream is at its flood, a large amount of water overflows the banks of Silvies River and the various sloughs. That this overflow is aided by the placing of dams in the river and sloughs, also diversions are made into irrigation ditches by means of putting dams in the river and

sloughs and a large amount of land is irrigated by means of placing dams in the river and sloughs, so as to hold the water up for the sub-irrigation of adjoining lands. That the placing of these dams in the river and sloughs holds the water from flowing down the particular channel in which the dam is placed and causes such water to overflow its banks and flow into other channels. Thus by putting in or taking out dams water can be turned from Silvies River to Poison Creek and from Poison Creek to Silvies River, and water can be thrown from the West fork to the East fork of Silvies River or vice versa or water can be thrown into various sloughs from any particular water channel. That the water flows from one tract to another on its course down Harney Valley, and is used many times before it finally reaches Malheur Lake. In fact all irrigated lands in Harney Valley, except these for which the water is subject to control and measurement, may be regarded as being under one general system, the water for which is delivered at a point above Burns and the waste therefrom flowing into Malheur Lake.

13.

That Melville Fenwick, J. C. Foley, Ora Hill, Simon Lewis, J. J. Lampshire, Henry Vulgamore, and the Pacific Livestock Company have each filed statements and proofs to water for certain lands for which the Harney Valley Dam, Ditch & Irrigation Company has filed a statement and proof of claim. That Henry Vulgamore has succeeded to the rights of Melville Fenwick and M. B. Hayes has succeeded to the rights of Ora Hill. The description of all of the land so claimed in said statements and proofs is hereinafter tabulated under the name of Harney Valley Dam, Ditch & Irrigation Company and not under the individual name.

14.

That Albert S. Swain filed statement and proof of claim for 10 acres in the SW $\frac{1}{4}$  NE $\frac{1}{4}$  and 30 acres in the SE $\frac{1}{4}$  NE $\frac{1}{4}$  of Section 5, T. 23 S.R. 31 E.W.M., that in such claim he states that such land had not been irrigated since 1900 and the testimony taken was to the effect that such land had not been irrigated since 1900, and said rights have therefore been abandoned, and are not tabulated herein.

15.

That the Silvies River Irrigation Company filed a statement and proof of claim in the above entitled proceeding, claiming a water right initiated under two notices of appropriation, recorded July 23, 1901, and signed by the Harney Valley Improvement Company, and a third notice of appropriation recorded July 24, 1901, signed by the Harney Valley Improvement Company, and a notice of appropriation recorded October 7th, 1907, signed by the Silvies River Irrigation Company, and an amended notice recorded the 29th day of October, 1907, signed by the Silvies River Irrigation Company.

That the lands to be irrigated under said notices were described as follows: All of T. 23 S.R. 32 $\frac{1}{2}$  E., all of T. 24 S.R. 32 $\frac{1}{2}$  E., all of T. 24 S.R. 33 E.W.M.,

and Sections 6, 7, 8, 9, 16, 17, 18, 19, 20, 21, 22, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, T. 23 S.R. 33 E., also Sections 1, 2, 3, 4, 5, 6, 10, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, T. 24 S.R. 32 E.W.M.

That construction upon the ditch to irrigate said lands was begun in good faith after the posting of said notices and prior to the 29th day of March, 1908. That on or about the 29th day of March, 1908, the Pacific Livestock Company began a suit in the Circuit Court of the United States for the District of Oregon against the Silvies River Irrigation Company and the Harney Valley Improvement Company, and said Silvies River Irrigation Company and the Harney Valley Improvement Company were enjoined from proceeding with the work of construction; that said suit was tried in said Court and said Silvies River Irrigation Company and Harney Valley Improvement Company were enjoined from proceeding with such construction, but the right was reserved to them and to each of them to apply to said Circuit Court of the United States for the District of Oregon, at any time after said decree for the vacation of the injunction, if it should thereafter be determined in some appropriate proceeding that there is any surplus water subject to appropriation by them or either of them, and said suit was thereupon appealed to the Circuit Court of Appeals for the Ninth Circuit, which Court reversed and remanded said cause with directions to allow the parties a reasonable time to take proceedings before the State Water Board of the State of Oregon, and in the event that they did not proceed thereunder within a reasonable time to require all parties interested to interplead and for a lower court to proceed to a determination of the issues between them in accordance with the laws of the State of Oregon. The parties have never proceeded further with said suit, but the proceedings before the State Water Board were instituted and all parties interested have appeared and filed claims thereunder, and the rights of said Silvies River Irrigation Company and Harney Valley Improvement Company under such appropriation notices are herein determined as follows:

That the rights of the Harney Valley Improvement Company shall be tabulated in the tabulation hereinafter contained.

That the Silvies River Irrigation Company has a valid appropriation under the amended notice of appropriation of water filed for record on the 29th day of October, 1907, and having a priority date for such appropriation of the 17th day of October, 1907. That the lands to be irrigated are such as described in the notice and hereinbefore described in this finding. That none of such lands are now irrigated, and said Silvies River Irrigation Company shall be entitled to divert water for the irrigation of such lands under and in accordance with said priority date. The water master shall regulate such diversion in accordance with such date of priority, and shall not permit any diversion of any water by said Company at any time when such diversion would interfere with the rights of any water users having an earlier date of priority than such company.

Upon the filing of this decree in the Circuit Court, the said Silvies

River Irrigation Company shall have the right to apply to the Circuit Court to fix a date in the future when actual construction work must begin on its appropriation and when it must be completed and water put to a beneficial use. The Circuit Court, if it deems same advisable, may refer the matter to the State Engineer under Section 5717 of Oregon Laws.

The water under such appropriation shall not be applied upon any land other than upon the land for which the same was appropriated, except that the place of use may be changed upon proper application and permit from the State Engineer.

That in lieu of the lands proposed to be irrigated in Sections 35, 21, and 19, and a portion of 17, T. 23 S.R. 33 E.W.M., the said company may apply to the State Engineer to irrigate other lands described as follows:

Section 16, T. 23, S.R. 31 E.W.M.  
Section 4, T. 24, S.R. 31 E.W.M.  
Section 6, T. 24, S.R. 32 E.W.M.  
Section 7, T. 24, S.R. 32 E.W.M.  
Section 24, T. 24, S.R. 31 E.W.M.  
Section 16, T. 24, S.R. 31 E.W.M.  
Section 14, T. 24, S.R. 31 E.W.M.  
Section 13, T. 24, S.R. 31 E.W.M.  
Section 12, R. 24, S.R. 31 E.W.M.

and if sanctioned by the State Engineer, such change may be made, but the same shall not affect any prior right decreed herein but shall be subordinate thereto.

16.

That statements of proof of claim have been filed and the rights claimed therein have not been tabulated in the tabulation hereinafter contained as follows, to-wit:

W. E. Crowder for the  $\frac{1}{2}$  of Section 13, T. 23 S.R. 31 E.W.M., for water from Poison Creek Slough; Vivian V. Gray for the  $\frac{1}{2}$  of Section 4, T. 25 S.R. 32 $\frac{1}{2}$  E.W.M., for water from the east fork of the Silvies River; James H. Stewart for the  $\frac{1}{2}$  of Section 28, T. 24 S. R. 31 E.W.M., and the  $\frac{1}{2}$   $\frac{1}{2}$  SW $\frac{1}{2}$  and the SW $\frac{1}{2}$  SE $\frac{1}{2}$  of Section 17, T. 24 S.R. 22 E.W.M., for waters from Silvies River; P. S. Weitenheiller for Section 21, T. 23 S.R. 32 E.W.M. That it appears from the evidence that no beneficial use of water had been made upon the lands of said claimants and each of them, nor had any appropriation of water been made for lands or any part of them and the claims of said claimants in their several statements and proofs and each thereof are hereby denied and said claimants can only acquire rights in the said waters of Silvies River by securing a State Engineer's permit.

17.

That State Engineer's permits have been secured by claimants in these proceedings as follows:

Frank E. Dickinson and Leona R. Dickinson, permits Nos. 177 and R. 147; Almond B. Guernsey, Enlargement permit No. 3; J.O. Hoyt, permits Nos. 347 and 348; W.H. Lincoln, permit No. 681; C. B. McConnell, Emory Cole and Leonard Cole, (Harney Valley Basin Development Co. successors in interest) Reservoir permits Nos. 233, 235, 236, and 237; Pacific Live Stock Company permits Nos. 2366 and 2367; Field E. Smith, Estella Grace Smith Sellers, Oliver T. Smith, Britta E. Smith Gaiser, Anna E. J. Smith, Lillian M. Smith Stout, John Flemon Smith, Myrtle Beatrice Smith, Kate Inez Smith, Mary Katherine Smith, Alberta Belle Smith, heirs of William T. Smith, deceased, permit No. 1083.

That each and all of said claimants shall have such rights as they are entitled to upon the final proof of the application of water to beneficial use in accordance with the law applicable to said permits.

18.

That an agreement has been filed herein by the Pacific Live Stock Company and Austin Goodman, wherein said Austin Goodman is to receive water from a certain spring arising on the E $\frac{1}{2}$  SE $\frac{1}{4}$  of Sec. 35, T. 23 S.R. 30 E.W.M. to irrigate the S $\frac{1}{2}$  SW $\frac{1}{4}$  and the SW $\frac{1}{4}$  SE $\frac{1}{4}$  of Sec. 36, T. 23 S.R. 30 E.W.M. and all waste water to be turned to the lands of the Pacific Live Stock Company in Sec. 36, T. 23 S.R. 30 E.W.M. The Water Master shall distribute said water in accordance with said agreement.

19.

The Water Master shall distribute the water for the lands described in these findings and in this decree, in accordance with this decree. The parties whose rights are adjudicated herein, and each of them, are herein, and each of them are hereby, directed and required to regulate, operate and construct and maintain their dams, ditches, canals, headgates, measuring devices, reservoirs and other works of all kinds and description, used for the purpose of distributing or aiding in the distribution of the waters of Silvies River system, to or upon the lands described in these findings and this decree in such manner as to enable the Water Master to divert and apportion the water for said lands in accordance with the dates of priority of the several water users awarded a water right herein.

In all cases of construction or reconstruction or repairs of dams, canals, ditches, headgates, laterals, or other irrigation works, or systems for appropriating water, or in changing streams, sloughs, branches or depressions used as ditches, or as a means of conducting water from the river for any of the land awarded a right herein, in order to place such slough or branch stream or ditch on the line of the land over which the same runs, or to straighten the same, or for any

purpose, the water user making such change, or building such works or system shall perform such work so as not to hinder or prevent the flow of water to any of the land awarded a right herein. And in the case of such change or reconstruction, a new ditch, flume, or conduit for water shall be furnished to take the place of the old, so that the various water users awarded a right herein shall be afforded a means of conducting their water equal to the old method before such change, upon their contributing an equitable part of the labor and expense thereof. In cases where the water formerly ran wholly or in part over one owner's land to that of another without a regular ditch or other artificial works, and it becomes necessary or convenient to build a ditch or other works, the labor and expense thereof shall be equitably borne by the interested parties. Such work of regulation and construction to be done under the guidance and direction of the State Engineer and Water Master; all such new ditches or conduits to be of the size and dimension as directed by the Water Master or State Engineer. All to the end that the waters of Silvies River and its tributaries may be distributed in accordance with this decree.

20.

That a decree of the Circuit Court of the State of Oregon for Harney County wherein R. R. Sitz was plaintiff and A. S. Swain was defendant was filed in these proceedings, which said decree affects the lands tabulated herinafter under the names of R. R. Sitz and A. S. Swain; that said lands are irrigated by means of a dam owned and operated upon the lands of said A. S. Swain; in the operation of said dam the water is held up by such dam while the lands are being irrigated and the water is turned loose by taking out such dam whenever the lands of said A. S. Swain are fully irrigated without regard as to whether or not the lands of said R. R. Sitz are fully irrigated.

21.

That a decree of the Circuit Court of the State of Oregon for Harney County wherein Homer B. Mace was plaintiff and F.L. Mace was defendant was filed in these proceedings wherein it was decreed that water for the irrigation of the SE $\frac{1}{4}$  of Section 20, T. 23 S.R. 31 E.W.M. should be allowed to flow from the east fork of Silvies River through a natural slough heading on Lot 3 of said section 20, and the water master shall regulate the flow of water to said lands in accordance with said decree.

22.

That the Circuit Court of the State of Oregon for Harney County, referred the suit of the Pacific Live Stock Company, a corporation, plaintiff, vs. Burns Flour Milling Company, a corporation, defendant, to the State Water Board under and by virtue of section 6635 of Lord's Oregon Laws; that the determination of the rights of said parties in these findings shall be taken and considered as a settlement of said suit.

purpose, the water user making such change, or building such works or system shall perform such work so as not to hinder or prevent the flow of water to any of the land awarded a right herein. And in the case of such change or reconstruction, a new ditch, flume, or conduit for water shall be furnished to take the place of the old, so that the various water users awarded a right herein shall be afforded a means of conducting their water equal to the old method before such change, upon their contributing an equitable part of the labor and expense thereof. In cases where the water formerly ran wholly or in part over one owner's land to that of another without a regular ditch or other artificial works, and it becomes necessary or convenient to build a ditch or other works, the labor and expense thereof shall be equitably borne by the interested parties. Such work of regulation and construction to be done under the guidance and direction of the State Engineer and Water Master; all such new ditches or conduits to be of the size and dimension as directed by the Water Master or State Engineer. All to the end that the waters of Silvies River and its tributaries may be distributed in accordance with this decree.

20.

That a decree of the Circuit Court of the State of Oregon for Harney County wherein R. R. Sitz was plaintiff and A. S. Swain was defendant was filed in these proceedings, which said decree affects the lands tabulated herinafter under the names of R. R. Sitz and A. S. Swain; that said lands are irrigated by means of a dam owned and operated upon the lands of said A. S. Swain; in the operation of said dam the water is held up by such dam while the lands are being irrigated and the water is turned loose by taking out such dam whenever the lands of said A. S. Swain are fully irrigated without regard as to whether or not the lands of said R. R. Sitz are fully irrigated.

21.

That a decree of the Circuit Court of the State of Oregon for Harney County wherein Homer B. Mace was plaintiff and F.L. Mace was defendant was filed in these proceedings wherein it was decreed that water for the irrigation of the SE $\frac{1}{4}$  of Section 20, T. 23 S.R. 31 E.W.M. should be allowed to flow from the east fork of Silvies River through a natural slough heading on Lot 3 of said section 20, and the water master shall regulate the flow of water to said lands in accordance with said decree.

22.

That the Circuit Court of the State of Oregon for Harney County, referred the suit of the Pacific Live Stock Company, a corporation, plaintiff, vs. Burns Flour Milling Company, a corporation, defendant, to the State Water Board under and by virtue of section 6635 of Lord's Oregon Laws; that the determination of the rights of said parties in these findings shall be taken and considered as a settlement of said suit.

In the tabulation hereinafter contained, the Pacific Live Stock Company is given an award for 236.5 acres in part from Trout Creek, for lands in Sec. 13, T. 19 S.R. 31 E. W.M., Sec. 18, T. 19 S.R. 32 E.W.M., with a priority date of 1883, Walter Cross is given an award for 287 acres for lands in Sections 5 and 6, T. 20 S.R. 32, E.W.M., and Sec. 31, T. 19 S.R. 32 E.W.M. with a priority date of 1883. Nellie Hardesty is given an award for 54 acres in Sec. 7, T. 20 S.R. 32 E.W.M., with a priority date of 1883, and Cora M. Shephard and Jessie J. Shephard, co-owners, are given an award for 55 acres in Sec. 7, T. 20 S.R. 32 E.W.M., with a priority date of 1883, all from Trout Creek.

Insofar as Trout Creek is concerned, while all parties have a priority of 1883, the rights of said Walter Cross, Nellie Hardesty, and of Cora M. Shephard and Jessie J. Shephard, co-owners for the lands in this paragraph mentioned, shall be deemed prior in right to the awards tabulated and allowed to the Pacific Live Stock Company for the said 236.5 acres.

The award, as hereinafter tabulated, to Wm. M. Stewart for 260 acres irrigated from Poison Creek, and a branch of Foley Slough, and from springs, with a priority of 1884, shall be deemed subsequent and subordinate to the awards made to J. C. Clemens, as successor in interest to Peter Clemens for 555 acres, given a priority date of April 21, 1884, and to the awards to Frank J. Whiting for 160 acres given a priority date of Sept. 20th, 1884. The award to J. T. Baker, as hereinafter tabulated, for 320 acres irrigated from Poison Creek, given a priority date of 1884, shall be deemed subsequent and subordinate to the awards to the said J. C. Clemens, and to Frank J. Whiting for the lands of said Clemens and Whiting in this paragraph mentioned.

That all claimants herein for water for irrigation shall be entitled to use such water for stock and domestic purposes. That the right to the diversion and use of the water for stock and domestic purposes shall be continued by such claimants and such water users at any time during the year and such diversion shall be according to the dates of priority of such claimants, and such use shall be limited to the quantity of water reasonably necessary for stock and domestic purposes; that for stock purposes the amount to be so diverted and used shall not exceed the rate of one tenth of one cubic foot per second for each one thousand head of stock; that during the irrigation season the amount of water diverted for irrigation purposes shall not be increased by any amount to be used for stock and domestic purposes, but the quantity allowed and diverted for irrigation during the irrigation season includes the water for stock and domestic purposes, provided that the right to divert and use water for stock and domestic purposes shall not be construed to mean that during the winter season when the ice is frozen to require or permit an unreasonable quantity of water to be turned down the River or any diversion canal for the purpose of getting the water to the stock. The water for

## 24.

That all claimants herein for water for irrigation shall be entitled to use such water for stock and domestic purposes. That the right to the diversion and use of the water for stock and domestic purposes shall be continued by such claimants and such water users at any time during the year and such diversion shall be according to the dates of priority of such claimants, and such use shall be limited to the quantity of water reasonably necessary for stock and domestic purposes; that for stock purposes the amount to be so diverted and used shall not exceed the rate of one tenth of one cubic foot per second for each one thousand head of stock; that during the irrigation season the amount of water diverted for irrigation purposes shall not be increased by any amount to be used for stock and domestic purposes, but the quantity allowed and diverted for irrigation during the irrigation season includes the water for stock and domestic purposes, provided that the right to divert and use water for stock and domestic purposes shall not be construed to mean that during the winter season when the ice is frozen to require or permit an unreasonable quantity of water to be turned down the River or any diversion canal for the purpose of getting the water to the stock. The water for

stock purposes as well as for irrigation shall be measured at the headgate of the ditch or diversion lateral of each claimant, and whenever it requires more than double the amount of water herein provided at the point of diversion to reach the place of use for stock purposes, it will be construed as requiring an unreasonable amount of water to be turned down for that purpose.

25.

That in all cases where any person, firm or corporation has a right under this decree to supply and deliver water to others and charge for the same, or may hereafter acquire such right, it is the duty of such person, firm or corporation to supply water to any and all persons applying for water who can use water along the line of the works belonging to such person, firm or corporation, or who can be reasonably supplied with water from said works under reasonable and uniform contracts and for reasonable and uniform charges up to the limit of the capacity of said works, so long as said person so taking said water complies or is ready and able to comply with the terms of such contract. Such contract may provide for any reasonable and uniform method of pro rata distribution of water, and such person, firm or corporation may make such reasonable and uniform rules and regulations as may be necessary to facilitate such distribution. In case such contract does not provide for such distribution of water, then such water shall be supplied to the water users in the order of, and according to the date of priority of use upon the land, or at the place upon which such water is to be used, and subject to rotation as in this decree generally provided; provided that no contract shall be made to deliver water to lands or places not theretofore supplied, to such an extent as to deprive any land or place of water which land or place had theretofore been supplied and still has the right to such a supply and unless such land or place where said water is to be used be entitled to such use under a right granted by this decree, by a permit of the State Engineer, or by a water right certificate. All contracts for the use of water giving any preference other than as herein stated, are against the public policy and laws of the State of Oregon, and void.

26.

In all cases in this decree wherein the right to use water out of more than one stream or branch of a stream is confirmed for the same land, and the amount of water to be taken from each respective stream or branch is not determined herein, the matter of determining the quantity of water to be taken from each stream or branch for such land shall be left open for the Circuit Court to determine after actual experiment and use of the water upon the lands have been made so that an equitable apportionment of the amount to be used from each stream or branch can be made with a reasonable degree of accuracy, which cannot be done at the present time.

In all cases in these findings wherein a water user has both the right to store water and also the right to use such water for irrigation, he shall have the right to divert such water from the stream, according to the respective priority dates of such rights, and such right to store water may be used to supplement the diversion for irrigation, that is, when the water in said stream becomes so scarce that his right to the diversion of water for such irrigation is cut off, then he shall have the right to use the water so stored by him for the purpose of supplementing the right for irrigation, and of increasing the length of the irrigation season upon the lands for which he has such irrigation right.

That in all cases where water is stored by any claimant, said water shall be taken at any season of the year for said storage according to the dates of relative priority, and in case the owner of any reservoir desires to use the bed of any stream for the purpose of carrying such stored water from the reservoir to the consumer thereof, said owner of such reservoir shall install such headgate and measuring devices as the Superintendent of the Division or the Water Master of the district in which the water is situated and used shall order. Said stored water may be used at any time during the year that the owner thereof may desire. Whenever said owner of such reservoir desires to use such stored water, he shall notify the Water Master of the district in which the stored water is to be used, giving the date when it is proposed to discharge water from such reservoir, its volume, and the names of all persons and ditches entitled to its use. Said water master shall then determine the percentage of loss by seepage, evaporation or other causes, between the place of discharge from the reservoir into the stream, and the place of diversion from the stream, and shall close or so adjust the headgates of all ditches from the stream as will enable those having such right to secure the volume discharged from the reservoir, less the determined loss. That in all cases where reservoirs are built so as to include within their boundaries the bed of any stream, the waters of which are hereinadjudicated and determined, the owner, manager or lessee of such reservoir shall install in the stream above and below said reservoir, such measuring devices as the Superintendent of the Division or the Water Master of the district in which said reservoir is situated may order; the plans for the construction of said measuring devices shall be approved by the State Engineer. The said Water Master shall measure all water of such stream running into said reservoir and shall discharge from said reservoir sufficient water (Not exceeding the volume of water running into said reservoir) to supply such prior rights as may be entitled to use said water; such discharge of water shall only be necessary during the

time or season in which such prior rights are entitled to use the same.

29.

That the rights of appropriation hereby confirmed are appurtenant to the lands herein described for irrigation purposes, and the right of use of the waters of said stream and its tributaries by virtue of such rights of appropriation, are limited and confined to the irrigation of the lands described herein to the extent of said lands as herein set forth, and the priorities herein confirmed confer no right of use of the waters of said stream, and its tributaries, on the lands other than those specified tracts to which such rights of appropriation are herein set forth as appurtenant. The right of a water user to change the place of use of a vested water right, in the manner now or hereafter, provided by law shall not be prohibited or affected by this decree.

30.

That the order of the rights of the respective appropriators of the waters of said stream and its tributaries, and in which order they are entitled to divert and use the said water shall be and is according to the date of the relative priority of the right as herein set forth and determined and the first in order of time according to the date of relative priority shall be and is the first in order of right, and so on, down to the date of the latest priority, and those having prior rights are entitled to divert and use the waters of said stream and its tributaries, when necessary for the beneficial use in connection with the irrigation of their respective lands or other useful and beneficial purposes for which they are decreed a right of use, at all times and against those having subsequent rights, without let or hinderance, and whenever the water is not required by the appropriator having a prior right to its use for the purpose for which said water was appropriated, he must and shall permit it to flow down in the natural channel of the stream as it was wont to flow in its natural course, without hinderance or diversion thereof, and those having subsequent rights are entitled to the use of such water and to divert the same to the extent of their rights of appropriation, according to the order of their priority rights; and at all times the waters diverted shall be beneficially, economically and reasonably used without waste by those having a right to do so by reason of their priority of their rights.

31.

That to get a sufficient head of water, the Water Master of the district in which such water is situated shall arrange such a system or systems of rotation as may be best applicable; first, by giving a greater amount of water for an appropriator for a proportionately less time, provided that the giving of such greater amount does not infringe upon any of the rights confirmed by this decree; second, where two or more

appropriators agree as between themselves as to the manner of said rotation in the use of the water, said Water Master shall distribute the water in accordance with such agreement; third, in the absence of an agreement between such appropriators arranging for such rotation, the said Water Master shall arrange such appropriators in groups or systems of rotation, first giving to the appropriator who is first in priority in such group a quantity of water equal to the combined appropriations of all the appropriators in said group or system for a length of time bearing the same ratio to the whole time required to make the complete rotation through the whole group of appropriators as the appropriation of said first appropriator bears to the combined appropriations of said group, and next serving another appropriator with a like quantity of water for his proportionate time, and so on until all of the appropriators in said group or system are served; then the distribution of water shall be repeated in the same manner throughout the irrigation season; provided always, that such arrangements into groups or systems of rotation shall not interfere with the prior rights of any appropriator, not a member of such group or system, and provided further, that such agreement shall be in writing, and filed by such appropriator with the Water Master.

32.

That in the tabulation hereinafter set forth wherein the rights of diversion are placed from any sloughs that receive their water from the main stream of the Silvies River or its tributaries, such diversion shall be considered as being from said main stream of Silvies River or its tributaries, as the case may be.

33.

That all lands in Harney Valley irrigated or to be irrigated from Silvies River or its branches or tributaries, and all lands not in Harney Valley irrigated or to be irrigated from Silvies River, are entitled to not to exceed one-eighthieth of one cubic foot of water per second for each acre of such lands, and not to exceed three acre feet per acre. It appearing that during the spring and early summer there is a large flow of water in Silvies River and its tributaries, and that heretofore the water users have used a large head of water during such time and should be permitted to continue the use of more than one-eighthieth of a cubic foot per acre in order to approximate the quantity to which they are entitled for the irrigation season; therefore, the right to the use of water from Silvies River and its tributaries, except as modified by special findings herein, shall be

limited to the diversion of not to exceed one and one-half acre feet per acre during any period of thirty days, prior to June first of each year, and thereafter not to exceed one acre foot per acre during any period of thirty days, provided that the total quantity of water diverted during the irrigation season shall not exceed three acre feet per acre, and that the rate of flow shall not exceed one-fortieth of a cubic foot per second per acre, except where rotation is practiced as herein provided.

The above provisions shall be in effect for a period of three years after the filing of this mandate in the Circuit Court. That from and after said date all lands in Harney Valley, irrigated or to be irrigated from Silvies River or its branches or tributaries, and all lands not in Harney Valley irrigated, or to be irrigated from Silvies River are entitled to not to exceed one-eightieth of one cubic foot of water per second for each acre of such lands; provided that the total quantity of water diverted during an irrigation season shall not exceed two acre feet per acre; that all lands not in Harney Valley, irrigated or to be irrigated from tributaries of Silvies River are entitled to not to exceed one-sixtieth of one cubic foot of water per second for each acre of such lands, provided that the total quantity of water diverted during an irrigation season shall not exceed two acre feet per acre; provided, however, that when the ditches, canals, headgates, measuring devices, and other irrigation systems necessary to permit a determination with reasonable accuracy of the amount of water necessary for the irrigation of such lands shall be constructed and actual tests have been made, the amount allowed by this decree may be changed by the Circuit Court, and the duty of water will be left open for further determination at a future time.

That the quantity of water to which all of such lands are entitled shall be measured at the respective headgates of the division, ditch or lateral of said claimants from which the water is to be used on the land to be irrigated, provided, however, that until such time as the ditches, canals, headgates or levees or any of them or any other works which may be necessary to permit a determination with reasonable accuracy of the amount of water diverted and used upon any tract or tracts of land in Harney Valley, shall be constructed, the water for the irrigation of such tract or tracts for which no such measuring devices or controlling works are provided shall be measured at some proper and convenient point or points as near as may be to the lands to be irrigated. Such point or points of measurement shall be subject to change from time to time as changed conditions make such changes convenient or expedient, and the water for the irrigation of such tract or tracts for which no measuring devices or controlling works are provided shall be distributed to those entitled to its use by the regulation of dams, headgates or

other works or devices for controlling or influencing the flow of the water, as nearly as may be in accordance with the priorities of the respective rights; subject, however, to the provisions of the decree hereinafter referred to and other findings herein. That the quantity of water herein specified to which any of such lands are entitled shall include the supply furnished or which may be or become available to any tract on account of the irrigation of other lands.

That the irrigation season, during which the water users from Silvies River and its tributaries shall be entitled to the use of the water for irrigation purposes, extends from March 20th to September 1st of each year; provided, however, that as irrigation depends upon climatic conditions and changes in the season, the season hereby fixed shall not prevent water users awarded a right herein to use the water of the Silvies River and its tributaries for the purposes of irrigation according to their relative rights of priority, and in quantities in accordance with this decree, at other times when such use will be beneficial to the land and the crops grown thereon when the ground is not frozen and the same can be used without needless waste.

34.

In this proceeding in all cases wherein a water right has been awarded for lands to which the water has not been applied completely to a beneficial use the respective claimants shall be and they hereby are allowed five years from the date of the entry of the mandate herein in the Circuit Court, or such further time as may be allowed by the State Engineer to make a complete beneficial use of the water.

35.

(a) That the Circuit Court shall make corrections of any clerical errors in these proceedings within six months from the date of the filing of the mandate herein in this Court, and the right is reserved so to do.

(b) That in this decree, the figures in the column headed "Amount Cubic Feet Per Second" shall not be deemed controlling but the matter shall be controlled by the foregoing provisions of Paragraph 33 hereof, and by the provisions of said mandate. In view of the fact that the duty of water and the amount of cubic feet per second per acre are subject to being changed in the future, this Court, or the State Engineer, under the directions of this Court, if the Court so directs shall correct the tabulations in accordance with the decree and order of this Court; when the duty of water is fixed and determined, such correction may be made on this original decree as modified by said mandate if the Court deem it expedient, and the right is reserved so to do.

36.

Commencing three years after the filing of the mandate herein in this Court, any and all waste in the use of water by the parties awarded a right to the use of water from Silvies River, its tributaries, branches or sloughs, is hereby strictly enjoined and inhibited.

37.

That the name and address of each appropriator of water from said Silves River and its tributaries, arranged in alphabetical form, together with the date of relative priority of each appropriation, the amount of such appropriation in cubic feet per second, the number of acres to which such appropriation is applied and to which such water is appurtenant, the use or uses for which such water was appropriated and is now applied, and to which such use is limited, the name of the ditch or ditches through which such appropriation is diverted, the name of the stream or streams from which such appropriation is diverted, and the description of the land in the smallest subdivision to which such water is appurtenant, is set opposite the name and address of each appropriator, and is as follows, to-wit:

SILVIES RIVER - 69.

IN THE MATTER OF THE DETERMINATION OF  
THE RELATIVE RIGHTS TO THE WATERS OF  
SILVIES RIVER AND ITS TRIBUTARIES, A  
TRIBUTARY OF MALHEUR LAKE, IN GRANT  
AND HARNEY COUNTIES, STATE OF OREGON.

Order Correcting  
Decree.

Now on this 21st day of October, 1931, the above entitled matter coming on to be heard on motion of Chas. B. Foley, the duly appointed, qualified and acting Executor of the Estate of Tim Donovan, deceased, for the entry of an order correcting certain clerical errors and omissions in the decree rendered by the Court in the above entitled matter, and

It appearing to the court that the State Water Board of Oregon, in its consideration of the above entitled matter, awarded the late Tim Donovan a relative priority of 1906 for 0.33 cubic feet of water per second for the irrigation of 26 acres in SWNW Section 5, Twp. 23 S.R.31 E.W.M., such water to have its source in Foley Slough and waste water from the Rembold ditch, and to be delivered to said lands through the Farre Slough, and it further appearing that said finding and award was not appealed, and that the decree of this Court should conform to such finding and award in every particular except that since Foley Slough derives its water supply from Silvies River, such fact should be inserted in the decree, and it further appearing that by error or omission in copying said findings and award into the decree now in force and effect in this matter reference to Foley Slough and waste water from Rembold ditch have been omitted whereas in fact these references should be made a part of said decree, and

It further appearing to the Court that both the State Water Board of Oregon and this Court in its decree in this matter awarded the late Tim Donovan a relative priority of 1895 for 3.08 cubic feet per second for the irrigation of 185 acres in Section 7, Twp. 20, S.R. 30 E.W.M. to have its source in Main Silvies River and Foley Slough, and to be delivered through the Donovan ditch to the place of use, and it appearing to the Court that such finding and award is as to the source of supply erroneous for the reason that Foley Slough is some 20 miles downstream from the lands involved and that it would be a physical impossibility to divert water from Foley Slough to said lands, and that the decree in this matter should be changed to show Main Silvies River as the source of supply,

And it further appearing that F. W. Triska and L. E. Hibbard, the owners of lands adjacent to the Donovan premises in Section 5, Twp. 23, S.R. 31 E.W.M. and the only persons directly affected hereby, have filed herein their acknowledgment of notice and consent to such correction above mentioned, without further notice, now therefore

IT IS CONSIDERED, ORDERED AND DECREED That the decree of this Court in the above entitled matter be corrected to show Main River, Foley Slough and waste water from Rembold Ditch as the source of water for the irrigation of 26 acres in SW<sup>1</sup>/<sub>4</sub>NW<sup>1</sup>/<sub>4</sub> Section 5, Twp. 23 S.R. 31 E.W.M. the property of the late Tim Donovan, and that said decree be further corrected to show Main Silvies River as the sole source of supply for waters for the irrigation of the premises of the late Tim Donovan in Section 7, Twp. 20 S. R. 30 E. W. M.

AND IT IS FURTHER CONSIDERED, ORDERED AND ADJUDGED That the clerk of this court be and he is hereby authorized and directed to make the corrections herein ordered upon the records of this court in his custody and possession.

W. W. Wood  
Circuit Judge.

Filed Oct. 21, 1931.

IN THE CIRCUIT COURT OF THE STATE OF OREGON  
FOR HARNEY COUNTY.

In the Matter of the Determination  
of the Relative Rights to the Waters  
of Silvies River and its tributaries,  
a tributary of Malheur Lake, in Grant  
and Harney Counties, Oregon.

Order for Correction  
of Decree ✓

Now on this 29th day of August, 1933, the above entitled matter coming on to be heard on motion of Lulu H. Pierce and Ruby M. Erkenbrecker for the entry of an order correcting certain errors and omissions in the decree heretofore entered herein by the Court, and

It appearing to the Court from the motion of the petitioners and from the affidavit of L. B. Hayes attached thereto that the total acreage to which rights were decreed amounted to 195 acres whereas the distributed acreages total but 165 acres; and it further appearing that the decree shows 55 acres irrigated in NE $\frac{1}{4}$ SW $\frac{1}{4}$  which could not be correct; and it further appearing from said motion and affidavit that certain lands which are irrigated have not been mentioned in the decree whereas some lands are mentioned which are not actually irrigated, and

It further appearing that the rights of no persons other than the petitioners are involved and that no change in the point of diversion of the decreed waters is involved, now therefore,

IT IS CONSIDERED, ORDERED AND DECREED That the decree in the above entitled matter, insofar as it affects the lands of Ruby M. Erkenbrecker and Lulu H. Pierce be corrected to read as follows:

W. J. P. Hector - 1887 - 2.44 cu.ft. per sec. - 195 acres

20 acres in SE $\frac{1}{4}$ NW $\frac{1}{4}$  }  
35 acres in NE $\frac{1}{4}$ SW $\frac{1}{4}$  }

10 acres in NW $\frac{1}{4}$ SE $\frac{1}{4}$  }  
40 acres in SW $\frac{1}{4}$ SE $\frac{1}{4}$  }  
40 acres in SE $\frac{1}{4}$ SE $\frac{1}{4}$  }  
Sec. 35, T. 24 S. R. 32 E. W. M.

and

IT IS FURTHER CONSIDERED AND ORDERED That the clerk of this court be and hereby is authorized and directed to make the corrections herein ordered upon the records of this court in his custody and possession.

Based upon the foregoing findings and mandate of the Supreme Court which are hereby made a part of this decree, it is

ORDERED, ADJUDGED AND DECREED that the various claimants are entitled to the use of water as contained in these findings and decree and are hereby enjoined and prohibited from the use of water in any other amounts, manner or priorities than herein found.

Done and dated at Burns, Oregon, this 23rd day of February, 1926.

( SIGNED )--- DALTON BIGGS,  
Circuit Judge.

STATE OF OREGON )  
                  ) ss.  
County of Marion )

I, RHEA LUPER, State Engineer of Oregon, do hereby certify that the foregoing copy of Decree in the matter of the determination of the relative rights to the use of the waters of Silvies River and its tributaries, has been by me compared with the original, and that it is a true and correct copy therefrom, and of the whole thereof, as the same appears of record in my office and custody.

IN WITNESS WHEREOF, I have hereunto set my hand this 15th day of June, 1926.

  
RHEA LUPER  
State Engineer.
