

OYA OFFENDER JOB TRAINING MODULES

MODULE 3-11 EQUIPMENT ATTACHMENTS TEST

I. Multiple Choice

1. When inspecting attachments you should:
 - a) Not need to inspect because the last person to use it did the inspection.
 - b) Check for stress cracks, broken welds, the hydraulic line, bolts and pins, u-joints rollers, bearings, drive belts, and tension.
 - c) Talk with the manager to see if anything was wrong with it.
 - d) b and c.
2. Personal protection includes but is not limited to:
 - a) Hearing protection, safety glasses and gloves.
 - b) Hearing protection, safety glasses, gloves, and hardhat.
 - c) Hearing protection, safety glasses.
 - d) Hearing protection, safety glasses, gloves, safety vest, and hardhat.
3. When operating attachments, you must be familiar with:
 - a) Hydraulic controls.
 - b) Spotter hand signals.
 - c) The equipment and its capacity.
 - d) Weight limits.
 - e) All of the above.
4. When you park the tractor, you need to:
 - a) Turn it off and leave it as it is.
 - b) Put the attachments in a lowered position, then clean and inspect them.
 - c) Sing to the attachments to keep them happy.
 - d) Remove the attachments, regardless of your level of training.

II. True/False

5. _____ Loads carried in the bucket should be carried very low to prevent rollovers.
6. _____ The slope is not a factor in determining how fast you can drive the tractor.
7. _____ When performing an operation, you should use appropriate cones, signs, barricades and spotters.
8. _____ You don't need to monitor the blade attachment when in motion.
9. _____ Before operating any attachment, first read the appropriate owners manual.
10. _____ It is important to clear the area of large debris before using the broom/sweeper.
11. _____ There is no need to log any repairs made to equipment; just tell the next operator.
12. _____ Anyone can operate the forks attachment.
13. _____ You don't need to worry about rough terrain with front-end attachments, as they are pretty stable.

III. Discussion Questions

1. What could happen if the work area is not inspected for large debris before using the flail mower or broom/sweeper attachments?
2. Why is it important to move loads close to the ground?

Employee Name: _____ Pass _____ No Pass _____ Date: _____

Take this test to your supervisor or trainer for sign off.
