Public testimony will be taken on action items at the Chair’s discretion.

Please contact 503.603.7785 to notify staff of your request to provide testimony at the meeting or submit written testimony to PERS.Board@state.or.us (three days in advance of the meeting is preferred.)
October 5, 2018

Board members present:
Chair Sadhana Shenoy, Stephen Buckley, Krystal deAsis, and Steve Demarest were present. Vice-Chair Lawrence Furnstahl attended by phone.

Staff present:
Amanda Marble, AnneMarie Vu, Debra Hembree, Elizabeth Rossman, Jessica Williams, Jason Stanley, Jordan Masanga, Katie Brogan, Kevin Olineck, Marjorie Taylor, MaryMichelle Sosne, Melanie Chandler, Neil Jones, Stephanie Vaughn, Yong Yang, Yvette Elledge-Rhodes

Others present:
Gay Lynn Bath, Peter Wong, Matt Larrabee, Ron Vaught, Nate Carter, Scott Preppernau, Debra Grabler, Claire Havener, Shijie Liang, Aruna Masih, Trudy Vidal, Samantha Nalvan, Josh Eggleston, Jeff Renfro, Mike Jaspin, Ray Hubbell, Twylla Miller, David Lacy, Tim Nesbitt, Roger Dawes, David Moore, Carol Samuels, James Young, Jeff Gudman, Tahni Fagerberg, Edie Rusch, Sandra Montoya, Rosie Sanchez, Nancy Brewer, Scott Winkels

Chair Sadhana Shenoy called the meeting to order at 10:01 a.m.

ADMINISTRATION

A.1. MEETING MINUTES OF AUGUST 3, 2018
Board member Buckley moved to approve the minutes submitted from the August 3, 2018 Board meeting. Board member deAsis seconded the approval of the minutes. The motion passed unanimously.

A.2. DIRECTOR’S REPORT
Director Kevin Olineck introduced Jessica Williams, Chief Financial Officer and Elizabeth Rossman, Communications Officer. Olineck reviewed the Forward Looking Calendar and noted that the Scorecard Report on agency performance measures and the actuarial financial modeling results will be agenda items at the December meeting.

Olineck presented the Oregon Investment Council (OIC) Investment Report of the Oregon Public Employees Retirement Fund (OPERF) for the period ending August 2018. The year-to-date earnings are 4.63 percent.

Olineck presented the Budget Execution Report. He noted that the current projected positive variance is 4.7% of the operations budget. PERS requested a rebalance between divisions consisting of two actions: (1) transfer of positions between divisions; and (2) transfer of savings (positive variance) among division budgets to fund unanticipated one-time and ongoing costs.

The Board Orientation Manuel was created by PERS as a resource to assist PERS Board Members. It is a living document and will continue to be updated on a regular basis. Shenoy commented that it has been very helpful.
ADMINISTRATIVE RULEMAKING

Stephanie Vaughn, Policy Analysis and Compliance Section Manager, presented.

B.1. ADOPTION OF IAP TARGET DATE FUND RULES

Vaughn presented the change to the IAP Target Date Fund (TDF) rules. The TDF policy with regard to deceased, non-retired member accounts was altered. In processing a beneficiary’s application for benefits, staff will credit earnings to the member’s account in the member’s TDF from January 1 to the date of distribution. If any balance remains in the account at the end of that month, the balance will be transferred to the Retirement Allocation Fund (RAF). Accounts in the RAF that are in payout status (i.e. retirement installments, and any other partially paid account) receive monthly earnings. When the remaining beneficiaries apply for their benefits, no additional processing will be required.

This adjustment in policy is reflected in the amendments to OAR 459-080-0015 and a new rule, OAR 459-007-0335, outlines the earnings crediting to these accounts.

Demarest moved to adopt modifications to the IAP Target Date Fund rules, as presented. Furnstahl seconded the motion. The motion passed unanimously.

B.2. ADOPTION OF RULES IMPLEMENTING SB 1566 (2018)

a. Adoption of Pooled Side Accounts for School District Employers Rule

This rule incorporates a section of Senate Bill 1566 (2018) which established a pooled school district employers side account and defines its revenue sources to include proceeds from excess debt collection, capital gains tax, estate taxes, and proceeds from unclaimed property. The new rule specifies that the new pooled side account will be administered in the same manner as the individual employer side accounts, with modifications as needed to accommodate the nature of multiple employers in one side account. Based on the input from employers and consistent administrative practices, the draft rule presented for adoption establishes a 20-year amortization period for the pooled school district employers side account.

Board member deAsis moved to adopt the Pooled Side Accounts for School District Employers rule, as presented. Buckley seconded the motion to adopt the rule. The motion passed unanimously.

b. Adoption of Employer Lump Sum Payments Rules

This rule allows employers who make lump sum payments of $10 million or more into a new side account to elect an alternate amortization schedule for that side account and to allow employer lump sum payments into side accounts to be considered for matching funds from the Employer Incentive Fund established under Senate Bill 1566 (2018). No modifications were made to this rule since notice or first reading.

Board member deAsis motioned to adopt modifications to the Employer Lump Sum Payments rules, as presented. Demarest seconded the motion. The motion passed unanimously.
ACTION AND DISCUSSION ITEMS

C.1. LEGISLATIVE UPDATE

Marjorie Taylor, Senior Policy Analyst, presented.

In preparation for the 2019 legislative session, staff requests that the Board confirm membership of the Legislative Advisory Committee (LAC). The proposed membership is balanced between labor and management representatives, and includes members who participated in previous LAC meetings. Members have been contacted and are willing to serve on the committee. The members meet infrequently on an as needed basis.

Board member Buckley moved to approve the recommended appointments, effective immediately. Board member deAsis seconded the motion to approve the recommended appointments. The motion passed unanimously.

During September Legislative Days PERS presented to the Emergency Board Committee. PERS also presented a report to the Joint Legislative Committee Information Management and Technology regarding the status of the PERS Information Security Program (ISP) and the Continuity Management Program.

For discussion during the 2019 session, PERS expects to request pre-session filing of one agency bill to resolve implementation issues with Senate Bill 1566(2018). A final draft of the Legislative Concept will be available for approval at the December 7 Board meeting.

C.2 SB 1566 UPDATE

MaryMichelle Sosne, Actuarial Business Analyst, presented.

a. School District Unfunded Liability Fund
   The survey of this group closed on September 17, 2018 and the majority opted to maintain the current 20-year amortization schedule.

b. Employer Incentive Fund
   Sosne gave an update on implementation activities. The final application and approval process will be presented to the Board during at the December 7, 2018 Board Meeting.

C.3 MEMBER & EMPLOYER SURVEY RESULTS

Elizabeth Rossman, Communications Officer, presented.

Rossman presented an overview of the 2018 PERS annual satisfaction survey for members (non-retired and retired) and employers. Responses from members increased due to the use of GovDelivery email system. The main member issues that are being addressed are call wait times, PERS website navigation and content, and timeliness of estimates. The key employer issues were from employer statements and the employer website.
C.4 2017 VALUATION RESULTS AND ADOPTION OF EMPLOYER RATES

Actuaries Matt Larrabee and Scott Preppernau of Milliman presented the 2019-21 employer rates for adoption.

Adoption of the proposed rates complies with the Board’s rate-setting principles and fulfills its statutory obligation to set employer rates for the 2019-21 biennium.

Vice Chair Furnstahl moved to approve the 2019-21 individual employer contribution rates as recommended by the PERS actuary. Buckley seconded the motion. The motion passed unanimously.

Shenoy adjourned the Board meeting at 11:42 a.m.

Respectfully submitted,

Kevin Olineck, Director
PERS Board Governance Assignments

DIRECTOR’S REPORT
KEVIN OLINECK, DIRECTOR

PERS DIRECTOR’S REPORT
AT A GLANCE

Welcome to the first edition of the PERS Director’s Report. The intent of this report is to provide the PERS Board with a high level overview of work currently being undertaken by PERS staff or issues that the board should be aware of that are not highlighted or discussed as distinct agenda items at this meeting.

I believe it is vitally important for the board to provide the appropriate governance oversight of the agency. To do so, it needs to fully understand and appreciate the breadth and depth of the agency’s work. It is also important to highlight other activities of the organization, such as community involvement, so the board can appreciate the culture of the organization.

This Report will evolve, as needed, to provide the fulsome, enterprise perspective board members need to keep apprised of relevant issues. It will also assist board members in making informed decisions about the agency so that, ultimately, we can appropriately fulfill the PERS mission.

BRANDING

The agency is undergoing one obvious change, updating our corporate brand. This is best evidenced in an updated website landing page, a new logo that is prominent in publications like PERS by the Numbers and the Comprehensive Annual Financial Report, as well as the overall look and feel of the Director’s Report.

One objective of the PERS Strategic Plan is to brand PERS as a retirement education and planning resource. To properly engage PERS members throughout their pension lifecycle, we need to build out brand recognition. PERS will be more readily identifiable and members will relate the brand to their source for retirement education during life events that impact their retirement.

Given the magnitude of making a change to our branding enterprise-wide, we have a cascading plan to roll out the new brand in a measured way, as resources allow.

GOVERNOR’S RECOMMENDED BUDGET UPDATE

At the August board meeting, the board approved our 2019-21 agency budget proposal. We then submitted our proposal to the Government’s Chief Financial Office, who worked with the agency to incorporate the majority of our budget proposal into the 2019-21 Governor’s Recommended Budget. Although our funding is via investment earnings and administrative fees collected from members, and not the State’s General or other funds, the agency is subject to the overall Governor’s goal of having a balanced budget. Consequently, some of our proposed elements were not included in the Governor’s Recommended Budget that was released on November 28th. We anticipate that PERS staff will make presentations to the General Government Subcommittee of Ways and Means during the 2019 legislative session to provide further context and substantiation to our budgetary requests. We will provide the board with updates as we move through this process.

OREGON SAVINGS GROWTH PLAN (OSGP) EXPO

PERS and OSGP hosted our third Retirement Expo in conjunction with National Retirement Security Week. This year’s theme was “Explore Your Financial Future” and was attended by over 3,000 members. They participated in a wide variety of individual sessions related to exploring their retirement future. The Expo has become a huge success, as evidenced by earning two successive National Association of Government Defined Contribution Administrators (NAGDCA) Leadership Recognition Awards. This award recognizes Oregon Public Employees Retirement System for outstanding achievements in the National Retirement Security Week - General Campaign category. We are hopeful this year’s Expo will be similarly recognized.

COMPREHENSIVE ANNUAL FINANCIAL REPORT (CAFR)

Our 2018 Comprehensive Annual Financial Report will be published in early December. The CAFR represents a significant effort by the agency as it truly lives up to its descriptor: “comprehensive.” The agency is proud to win, for the 15th year running, the 2018 Public Pension Standards Award For Funding and Administration related to our 2017 CAFR, as recognized by the Public Pension Coordinating Council, a confederation of the National Association of State Retirement Administrators (NASRA), the National Conference on Public Employee Retirement Systems (NCPERS), and the National Council on Teacher Retirement (NCTR). Additionally, for the 27th consecutive year, we were awarded a Certificate of Achievement for Excellence in Financial Reporting from the Government Finance Officers Association for the 2017 CAFR.
SECRETARY OF STATE'S AUDIT & RELATED PROJECT UPDATES

As I noted to the board in early October, the results of the Secretary of State’s Audit on the PERS Information Technology Strategic Planning Process and our Disaster Recovery Program, and the agency response, were released on October 17. https://sos.oregon.gov/audits/Documents/2018-32.pdf

The PERS Mission is to pay the right person, the right benefit, at the right time, and the functionality of our technology systems and disaster preparedness planning are key to that mission. We are committed to improving our capabilities in these areas, and have identified opportunities for improvements in recent years, which the audit report validates. We are incorporating the practices suggested in the audit, as we hone our focus on enterprise strategic planning and communication with stakeholders about our continuing progress toward change.

We anticipate implementation of at least 13 of the 16 recommendations outlined in the audit report by June 30, 2019. The remaining areas are part of a multi-year effort to address the recommendations and to integrate enhancements into our everyday processes. The distinct projects that are addressing these recommendations continue to be within defined scope, schedule and cost. We are asking for two additional staff at the December Emergency Board meeting to enable us to maintain our resiliency efforts going into the future. We are optimistic we will receive approval to move forward on these important hirings.

There was minimal media attention with respect to the release of this audit. I believe the attention was mitigated by the fact that PERS has a solid plan in place to have these recommendations completed within a fairly short timeframe. We will provide updates on our progress as part of future Audit Committee meetings.

ADVISORY COMMITTEE MEETINGS

In October, the PERS staff that administer the PERS Health Insurance Program (PHIP) conducted an orientation session for Steve Demarest, the PERS Board representative on the PHIP Advisory Committee, as well as new senior PERS staff. This was a great opportunity for staff, and the consultants who provide advisory services, to provide a high level overview of the workings of PHIP and it was very beneficial in setting a baseline with respect to this line of business.

In November, both the PHIP Advisory Committee and the Oregon Savings Growth Plan (OSGP) Advisory Committees met. As Director, this was the first time I have had an opportunity to attend these meetings and understand the role of the Advisory Committees relative to the PERS Board. As PERS evolves in alignment with our 2018-23 Strategic Plan, it is important to understand both the level of separation as well as integration that both the PHIP and OSGP programs require in order for the full enterprise to be successful. These meetings helped to provide insights into that alignment.

With respect to OSGP, after the Advisory Committee meeting, PERS staff met with Voya, our third party service provider, as well as our other OSGP consultants to develop a short-term strategy that moves toward defining the appropriate levels of separation and integration from an enterprise perspective.
PERS Board Meeting
Forward-Looking Calendar

**Friday, February 1, 2019**
- Preliminary 2018 Earnings Crediting and Reserving
- 2019 Legislative Session Update
- Annual Report of Executive Director’s Financial Transactions

**Monday, April 1, 2019***
- Final 2018 Earnings Crediting and Reserving
- 2019 Legislative Session Update
- Oregon Investment Council Performance Review - John Skjervem

**Friday, May 31, 2019**
- 2019 Legislative Session Update
- Board Scorecard Report on Agency Performance Measures
- 2020 Retiree Health Insurance Plan Renewals and Rates
- Overview of Actuarial Methods & Economic Assumptions
- OSGP Advisory Committee Appointments

**Friday, July 26, 2019***
- 2019 Legislative Session Review
- Strategic Plan Update
- Adoption of Valuation Methods & Assumptions including Assumed Rate of Return
- Adoption of Assumed Rate Oregon Administrative Rule

**Friday, October 4, 2019**
- Member & Employer Survey Results
- System Valuation Results – Advisory Employer Rates

**Friday, December 6, 2019***
- Board Scorecard Report on Agency Performance Measures
- Valuation Update and Financial Modeling Results
- Adoption of Actuarial Equivalency Factor Tables

*Audit Committee planned for post-Board meeting

December 7, 2018

TO: Members of the PERS Board  
FROM: Linda M. Barnett, Budget Officer  
SUBJECT: December 2018 Board Report

2017-19 OPERATING BUDGET

Operating expenditures for September 2018 and preliminary expenditures for October 2018 were $4,530,160 and $3,969,868 respectively. Final expenditures for October closed in the Statewide Financial Management System (SFMS) on November 16, 2018, and will be included in the February 2019 report to the Board.

- To date, through the first 16 months (or 66.7%) of the 2017-19 biennium, the agency has expended a total of $60,283,459 or 59.4% of PERS’ adjusted legislatively approved operations budget of $101,458,179. The establishment of one investment accountant position (0.38 FTE) and an increase in expenditure limitation in the amount of $79,291 were approved by the Emergency Board at their September 2018 meeting. The Department of Administrative Services (DAS) will increase the limitation when PERS updates the position duties to only include trust fund-related activities. PERS submitted this information to DAS on November 6, 2018 and a response is pending.

- The current projected positive variance is $4,056,356 or approximately 4% of the operations budget.

DECEMBER 2018 EMERGENCY BOARD REQUESTS

Staff prepared a request to increase budget limitation in the amount of $619,542 and to establish two full-time permanent positions in the Compliance, Audit, and Risk Division (CARD). The positions and increase in budget are critical to protect the privacy of member data and to successfully build a solid information security program. In addition, PERS requested to move $500,000 from the Information Services Division (ISD) to CARD to implement a consolidated program, known as the Continuity Management Program, which will include Disaster Recovery, Business Continuity, and the new statewide Continuity of Operations Program.

Staff also prepared a request to increase budget limitation in the amount of $1,698,000 in the Financial Administrative Services Division to address a reporting and contract change with the Oregon Savings Growth Plan (OSGP). Under the new contract, all administrative operating expenditures, except third party administrative expenses, will be paid out of the PERS Other Funds limitation. This will increase transparency and allow for more detailed record keeping. The new contract does not increase the overall cost OSGP pays for administrative and investment services.
2017-19 NON-LIMITED BUDGET

The approved budget also consists of $11,059,072,492 in estimated non-limited budget expenditures which represent benefit payments, health insurance premiums, and third-party administration payments for both the PERS Health Insurance Program and the Individual Account Program (IAP).

Retirement benefit payments have exceeded estimated budget; this trend has been offset by an overestimation in health insurance premiums. PERS will request an increase in Non-Limited budget in the next quarter through DAS’ Chief Financial Office and the Legislative Fiscal Office.

TO: Members of the PERS Board
FROM: POBMS Council
SUBJECT: Board Scorecard Report on Agency Performance Measures

A key part of PERS’ Outcome-Based Management System (POBMS) is a Quarterly Target Review of scorecards that evaluate our effectiveness in a number of Outcome and Process Measures. These measures foster accountability and transparency in key operating areas. The scorecard results help direct strategic planning, resource allocation, and risk assessment.

The attached Board Scorecard Report for third quarter 2018 focuses on several measures we currently track based on essential business operations. A targeted performance range is created for each measure:

- “Green” – performance is at or above acceptable levels.
- “Yellow” – performance is marginally below acceptable levels.
- “Red” – performance is significantly below; corrective action such as assigning a problem solving team should be directed.

Highlights include the following:

- Significant improvement over the last four quarters in Percentage of Estimates Completed in 30 days.
- Half of the highlighted measures in the Green range.
- An upward or equal trend with six of the eight measures.
- Appeal reversal rate improved from Red to Green range.

The next report will be presented on May 31, 2019, showing the scorecard results for the first quarter.

TO: Members of the PERS Board

FROM: Marjorie Taylor, Senior Policy Director

SUBJECT: Legislative Update

DECEMBER LEGISLATIVE DAYS

PERS will make two requests of the Emergency Board during Legislative Days next week. First is a request to increase Other Funds limitation to address a reporting and contract change with the Oregon Savings Growth Plan (OSGP). A new contract with the third-party administrator has modified the way that administrative fees and operating costs are paid. This change will increase transparency and allow for more detailed record keeping of expenses by PERS.

Second is a request for an increase in Other Funds limitation and the establishment of two full-time positions to address data privacy work and the Continuity and Disaster Recovery Program. These staff will focus on data privacy, in accordance with statewide and agency standards as directed by the Enterprise Security Office, and manage the agency Continuity Management program to ensure appropriate and timely emergency response, resumption, restoration, and recovery of PERS operations.

AGENCY LEGISLATION – 2019 SESSION

PERS has requested that the Governor pre-session file one agency bill to resolve implementation issues with Senate Bill 1566 (2018), which established the Employer Incentive Fund (EIF), the Unfunded Actuarial Liability Resolution Program (UALRP), and the School Districts Unfunded Liability Fund. Revenue sources for the two new funds were defined in Senate Bill 1566 or Senate Bill 1529 (2018).

As currently drafted, the agency-requested Legislative Concept 565 (10/15/18) - relating to employer contributions to the Public Employees Retirement System - accomplishes the following (Attachment 1):

1) Eliminates the restriction on the Board to only open the EIF application window after making a determination of sufficient funds in EIF (currently scheduled for 2021).
2) Narrows the initial EIF application window for employers with UAL exceeding 200 percent of payroll from 180 days to 90 days.
3) Allows the Board to approve EIF applications as long as projected moneys in EIF are available and establish a “wait list” for employers who have submitted timely applications, but for whom funds are not available. If previously allocated funds become available, employers on the wait list will be given access to them.
4) Requires employers to make qualifying lump sum payments no later than September 30, 2021. This allows the deposits to be reflected in a rate-setting system valuation.
5) Limits participation in the UALRP to only those employers who apply for EIF matching funds.
6) Repeals the UALRP on January 2, 2025, to coincide with the end date for the EIF.
7) Allows earnings on the corpus of EIF to be used to match qualifying employer payments.
8) Clarifies when certain revenue streams will be deposited into the School Districts Fund to coincide with the best timing for system valuations.

9) Has an emergency clause on the bill to allow for the fastest implementation of the programs as funds allow.

If funds are available to capitalize the EIF and the School Districts Unfunded Liability Fund sooner than currently anticipated, provisions of this measure will allow for more timely and flexible deployment of that revenue to the benefit of PERS-participating employers.

We look forward to providing updates throughout the 2019 legislative session on this bill and others that may be reviewed in various policy committees.

C.1. Attachment 1 – LC 565 (10/15/18)
SUMMARY

Provides that interest earned by Employer Incentive Fund may be used to match lump sum payments by participating public employers in Public Employees Retirement System.

Shortens time period during which participating public employers in Public Employees Retirement System must make lump sum payments to receive matching funds from Employer Incentive Fund. Shortens time period during which certain employers have priority to reserve matching funds from Employer Incentive Fund.

Provides for certain transfers to School Districts Unfunded Liability Fund to occur on last business day of odd-numbered year.

Limits participation in Unfunded Actuarial Liability Resolution Program to participating public employers that have applied to reserve matching amounts from Employer Incentive Fund.

Sunsets Unfunded Actuarial Liability Resolution Program on January 2, 2025.

Declares emergency, effective on passage.

A BILL FOR AN ACT

Relating to employer contributions to the Public Employees Retirement System; amending sections 1, 2, 3, 13, 15 and 26, chapter 105, Oregon Laws 2018; repealing section 26, chapter 105, Oregon Laws 2018; and declaring an emergency.

Be It Enacted by the People of the State of Oregon:

SECTION 1. Section 1, chapter 105, Oregon Laws 2018, is amended to read:

Sec. 1. (1) The Employer Incentive Fund is established in the State Treasury, separate and distinct from the General Fund. Interest earned by
the Employer Incentive Fund shall be credited to the fund, but. Interest earned by the fund may not be used under section 2, chapter 105, Oregon Laws 2018, of this 2018 Act to match lump sum payments made under ORS 238.229.

(2) Moneys in the fund are continuously appropriated to the Public Employees Retirement Board for the purposes described in sections 2 and 26, chapter 105, Oregon Laws 2018, of this 2018 Act.

SECTION 2. Section 2, chapter 105, Oregon Laws 2018, is amended to read:

Sec. 2. (1)(a) The Public Employees Retirement Board shall establish a process for distributing the moneys in the Employer Incentive Fund established under section 1, chapter 105, Oregon Laws 2018, of this 2018 Act.

(b) The process must allow a participating public employer to apply to reserve matching amounts in the Employer Incentive Fund by committing to make a qualifying lump sum payment of at least $25,000 to an account established under ORS 238.229.

(2) The board shall adopt rules establishing:

(a) The percentage of a lump sum payment that may be matched by distributions from the fund, not to exceed 25 percent of a qualifying lump sum payment.

(b) The maximum matching amount that may be reserved by a participating public employer, not to exceed the greater of:

(A) Five percent of the unfunded actuarial liability attributable to the employer, as determined in the most recent report prepared under ORS 238.605; or

(B) $300,000.

(c) The qualifications for lump sum payments that may be matched under this section. The qualifications must include the following requirements:

(A) The participating public employer must apply to reserve matching funds no later than December 31, 2019.

(B) The participating public employer must make the qualifying lump sum payment
payment no later than [July 1, 2023] **September 30, 2021**.

(C) A qualifying lump sum payment may not be a payment from moneys borrowed by the employer.

(d) A requirement that the participating public employer participate in the Unfunded Actuarial Liability Resolution Program to develop a plan under section 26, **chapter 105, Oregon Laws 2018** [of this 2018 Act].

[(3)(a) The board may begin accepting applications under subsection (1) of this section on the date on which the board determines that there are sufficient moneys in the Employer Incentive Fund.]

[(b)] (3)(a) For [180] **90** days after the board begins accepting applications under subsection (1) of this section, a participating public employer may apply to reserve matching amounts from the Employer Incentive Fund under subsection (1) of this section only if the unfunded actuarial liability attributable to the employer, as determined in the most recent report prepared under ORS 238.605, is more than 200 percent of the employer’s payroll for members of the Public Employees Retirement System.

[(c)] (b) After the [180-day] **90-day** period described in paragraph [(b)] (a) of this subsection, any participating public employer may apply to reserve matching funds from the Employer Incentive Fund under subsection (1) of this section.

(4)(a) The board shall approve applications that meet the qualifications established under subsection (2) of this section in the order in which the applications are submitted. The board shall continue approving applications as long as adequate moneys in the Employer Incentive Fund are **projected to become** available.

(b) After all of the moneys projected to become available in the Employer Incentive Fund are reserved for matching under paragraph (a) of this subsection, the board may establish a waiting list for the remaining timely submitted applications and, if sufficient moneys in the Employer Incentive Fund become available, shall approve, in the order in which they were submitted, applications that meet the quali-
fications under subsection (2) of this section.

(5) The board shall transfer matching amounts approved under subsection (4) of this section from the Employer Incentive Fund to the approved employers’ accounts established under ORS 238.229.

(6) The board may transfer moneys from the Employer Incentive Fund to the Public Employees Retirement Fund established under ORS 238.660 for crediting to the reserves for pension accounts and annuities as provided in ORS 238.670 (2).

(7) The board may use moneys in the Employer Incentive Fund for reasonable administrative costs incurred under this section.

SECTION 3. Section 3, chapter 105, Oregon Laws 2018, is amended to read:

Sec. 3. (1) Section 2, chapter 105, Oregon Laws 2018, as amended by section 2 of this 2019 Act, [of this 2018 Act] is repealed January 2, 2025.

(2)(a) The Employer Incentive Fund established under section 1, chapter 105, Oregon Laws 2018, [of this 2018 Act] is abolished on January 2, 2025.

(b) The unexpended moneys remaining in the Employer Incentive Fund on January 2, 2025, shall be transferred to the General Fund.

(3) Section 26, chapter 105, Oregon Laws 2018, as amended by section 6 of this 2019 Act, is repealed on January 2, 2025.

SECTION 4. Section 13, chapter 105, Oregon Laws 2018, is amended to read:

Sec. 13. (1) Not earlier than July 1 and not later than October 1 of the years 2019, 2021 and 2023, the division of the Oregon Department of Administrative Services that serves as office of economic analysis shall:

(a) Calculate the rate of change in the tax liability from personal income taxes on taxable capital gains during the five preceding biennia; and

(b) Use the rate of change calculated under paragraph (a) of this subsection to forecast the tax liability from personal income taxes on taxable capital gains for the biennium beginning on July 1 of the year in which the calculation is made.
(2) Not later than November 1 of the odd-numbered year following each
calculation under subsection (1) of this section, the Oregon Department of
Administrative Services, in consultation with the Department of Revenue,
shall estimate the tax liability from personal income taxes on taxable capital
gains for the previous biennium.

(3) Not later than November 30 of the odd-numbered year in which the
estimate is made under subsection (2) of this section, the Oregon Department
of Administrative Services, in consultation with the Department of Revenue,
shall determine whether the tax liability from personal income taxes on
capital gains estimated under subsection (2) of this section, less any amount
required to be returned to taxpayers under ORS 291.349, exceeds the tax li-
ability from personal income taxes on taxable capital gains forecasted under
subsection (1) of this section.

(4) Except as provided in subsection (5) of this section, on the last
business day of the odd-numbered year in which the estimate is made
under subsection (2) of this section, the Department of Revenue shall
transfer an amount equal to 25 percent of any excess calculated under sub-
section (3) of this section to the School Districts Unfunded Liability Fund
established in section 24, chapter 105, Oregon Laws 2018 [of this 2018
Act].

(5) The Department of Revenue may not make a transfer under subsection
(4) of this section if:

(a) The Legislative Assembly has appropriated moneys from the Oregon
Rainy Day Fund under ORS 293.144 on or after [the effective date of this 2018
Act] June 2, 2018; or

(b) The Public Employees Retirement System is more than 90 percent
funded as determined in accordance with rules adopted by the Public Em-
ployees Retirement Board.

(6) The Department of Revenue shall retain unreceipted revenue from the
tax imposed under ORS chapter 316 in an amount necessary to make the
transfer required under subsection (4) of this section. The department shall
make the transfer out of the unreceipted revenue in lieu of paying the reve-

Section 5. Section 15, chapter 105, Oregon Laws 2018, is amended to

read:

Sec. 15. (1) Not earlier than July 1 and not later than October 1 of the
years 2019, 2021 and 2023, the division of the Oregon Department of Admin-
istrative Services that serves as office of economic analysis shall:

(a) Calculate the rate of change in collections from estate taxes during
the five preceding biennia; and

(b) Use the rate of change calculated under paragraph (a) of this sub-
section to forecast the collections from estate taxes for the biennium begin-
ing on July 1 of the year in which the calculation is made.

(2) Not later than November 1 of the odd-numbered year following each
calculation under subsection (1) of this section, the Oregon Department of
Administrative Services, in consultation with the Department of Revenue,
shall estimate the collections from estate taxes for the previous biennium.

(3) Not later than November 30 of the odd-numbered year in which the
estimate is made under subsection (2) of this section, the Oregon Department
of Administrative Services, in consultation with the Department of Revenue,
shall determine whether the collections from estate taxes estimated under
subsection (2) of this section exceed the collections from estate taxes fore-
casted under subsection (1) of this section.

(4) On the last business day of the odd-numbered year in which the
estimate is made under subsection (2) of this section, the Department
of Revenue shall transfer an amount equal to the amount of any excess cal-
culated under subsection (3) of this section, less any amount required to be
returned to taxpayers under ORS 291.349, to the School Districts Unfunded
Liability Fund established in section 24, chapter 105, Oregon Laws 2018
[of this 2018 Act].

(5) The Department of Revenue shall retain unreceipted revenue from es-
tate taxes imposed under ORS 118.005 to 118.540 in an amount necessary to
make the transfer required under subsection (4) of this section. The depart-
ment shall make the transfer out of the unreceipted revenue in lieu of paying
the revenue over to the State Treasurer for deposit in the General Fund.

SECTION 6. Section 26, chapter 105, Oregon Laws 2018, is amended to
read:

Sec. 26. (1) The Public Employees Retirement Board shall establish an
Unfunded Actuarial Liability Resolution Program. Under the program, the
board shall provide technical expertise to participating public employers
that have applied to reserve matching amounts under section 2,
chapter 105, Oregon Laws 2018, from the Employer Incentive Fund es-
tablished in section 1, chapter 105, Oregon Laws 2018, in developing
plans to improve the employers’ funded status and to manage projected em-
ployer contribution rate changes. Participating public employers are not re-
quired to participate in the program.

(2) The board may use moneys in the Employer Incentive Fund [estab-
lished in section 1 of this 2018 Act] for reasonable administrative costs in-
curred under this section.

SECTION 7. This 2019 Act being necessary for the immediate pres-
ervation of the public peace, health and safety, an emergency is de-
clared to exist, and this 2019 Act takes effect on its passage.
December 7, 2018

TO: Members of the PERS Board
FROM: Yvette Elledge-Rhodes, Deputy Director
SUBJECT: Unclaimed Moro Accounts

BACKGROUND

The Oregon Supreme Court issued its decision in the Moro case on April 30, 2015, invalidating the application of cost-of-living adjustment (COLA) reductions enacted by Senate Bill 822 (effective May 6, 2013) and Senate Bill 861 (effective October 8, 2013) as applied to benefits earned before the effective dates of those bills. In order to comply with the Supreme Court decision, PERS initiated and completed a project to restore COLA payments to benefit recipients and enhance its systems to implement the new COLA allocation going forward.

In addition to adjusting all current benefit payments, PERS had to notify a population which represented successors to all benefit recipients (about 7,400) who passed away before their cost-of-living adjustment (COLA) was restored. The ongoing work associated with the post-Moro Decision Project involved processing claims made by the successors of benefit recipients who passed away before their cost-of-living adjustment (COLA) was restored. This work transitioned to normal business when the project closed on June 30, 2017. At that time, there were over 4,500 such potential claims remaining; notices had been distributed on all of these accounts, but we had not yet received responding claims.

UNCLAIMED MORO ACCOUNTS

In our project closure report to the Board on July 28, 2017, PERS reported that we would coordinate with Oregon Department of State Lands (DSL) to add these accounts to their unclaimed property program so potential recipients could still claim the payment through their process if they do not respond directly to PERS.

On December 7, 2017, PERS met with DSL to work through the details of this process. In that meeting, DSL reported that they are no longer able to take in these types of accounts and advised PERS to review alternative solutions to make information about these unclaimed funds available to the public.

In an effort to ensure that these claims are accessible, PERS has decided to make the list of unclaimed Moro deceased accounts available on the PERS website. The following data will be published on the PERS website as “Unclaimed deceased member benefits”:

- Member’s full name
- Member’s last known address
- Dollar amount threshold of the payment (below $100 or above $100)
- The reported year (2018 for all accounts)

Note: The above data mirrors the data published on DSL’s unclaimed property page.
Specific instructions for potential recipients to apply for these funds will be posted on the PERS website along with the list and our service level agreement that recipients can expect a response from PERS within 30 days.

**OTHER UNCLAIMED ACCOUNTS**

PERS is considering expanding this process to include other unclaimed accounts and will explore how to implement this going forward.
December 7, 2018

TO: Members of the PERS Board
FROM: Yvette Elledge-Rhodes, Deputy Director
SUBJECT: IAP TDF Implementation Update

BACKGROUND
At the September 20, 2017 Oregon Investment Council (OIC) meeting, the OIC adopted a new Target-Date Fund (TDF) investment strategy for the Individual Account Program (IAP), effective January 1, 2018. This decision resulted in changes to the IAP investment structure by establishing TDFs in five-year vintages that reflect gradually more conservative investment mixes as a member ages.

As reported at the August 3, 2018 Board meeting, the OIC’s move to TDFs continues to be integrated into IAP operations through project methodology.

BUDGET
PERS presented a budget request to the September 2018 Emergency Board for resources to fully implement and manage the new and expanded processes associated with TDFs. After careful consideration, and in consultation with our budget analyst, PERS requested, and was granted, one permanent, full-time Accountant 4. This position will implement the accounting foundation to support the IAP and act as the primary, senior investment accountant for the TDF reporting model.

One additional full-time position was requested in the proposed 2019-2021 budget to assist the Operations Division with reconciling data received from Treasury.

After reviewing technology requirements for implementation of earnings crediting and a TDF history table, it was determined that the $200,000 PERS was allocated earlier this year is sufficient for operations.

PROJECT ACTIVITIES
• The critical tools needed for tracking TDF history and prior-year earnings will be complete by 12/31/18.
• All other tools and reports needed for TDF are in process and scheduled to be completed on time.
• Data transfers and processes between Voya and PERS continue to be reviewed for efficiency and accuracy. Adjustments will be made as needed.
COMMUNICATIONS

PERS anticipates member questions and comments around the TDF change in Spring 2019, when 2018 Member Annual Statements will be mailed. This will be the first time for age-based TDF returns to be included in the statements. To answer some anticipated questions, an insert with IAP TDF information will be included with all 2018 Member Annual Statements. PERS has taken the following steps to highlight this investment change to members:

- Included articles in the December 2018 editions of Perspectives for active members regarding what they will see on their 2018 Member Annual Statements.
  - We also added a separate reminder article about the investment strategy change.
- Included an article in the December 2018 retiree edition of Perspectives reminding retirees:
  - with installment payments, that their IAP is invested in the Retirement Allocation Fund; and
  - for those who haven’t “retired” from the IAP, we reminded them that they will receive information on their 2018 Member Annual Statement.
- Kept IAP TDF content front-and-center on the PERS home page. Total webpage views from May 1 through November 12 include:
  - 2,510 views of the original September 2017 two-page summary announcement.
  - 2,614 views of the original Q&A from September 2017.
  - 763 views of the news article announcing the House Bill 4159 implementation delay.
  - 461 views of the May 2018 annual statement flyer insert.
- Continuously updated the IAP-Financials page on the PERS website with monthly crediting rates, reminding members that non-retired members will only see annual investment returns on their 2018 Member Annual Statement.
- Shared Oregon State Treasury’s Fall 2018 “Invested for You” newsletter, which included IAP TDF information, with 7,600 GovDelivery subscribers.

PERS staff will update the Board in May 2019 as project implementation comes to a conclusion.
FINANCIAL MODELING

OREGON PUBLIC EMPLOYEES RETIREMENT SYSTEM

Presented by:
Matt Larrabee, FSA, EA
Scott Preppernau, FSA, EA

December 7, 2018
Introduction

- August: System-average valuation results
  - Calculated as of December 31, 2017 for the Tier 1/Tier 2 & OPSRP programs
- October: Employer-specific 2019-2021 contribution rates
  - Based on the December 31, 2017 actuarial valuation
- Today: Long-term financial modeling projections reflecting published investment results through October 31
  - System average contribution rates
  - System funded status
  - System unfunded actuarial liability (UAL)
Models and Inputs

- System financials are projected using two different models
  - Steady return model – consistent year-to-year future investment returns
  - Variable return model – future investment returns vary from year to year
- Modeling starts with liabilities and actuarial assumptions from the 12/31/2017 system-wide actuarial valuation report
  - This includes the current Board-adopted 7.20% return assumption for valuing liabilities
- Modeling uses 12/31/2017 assets adjusted for published regular account returns of +1.51% through October 2018
  - Returns for November and December 2018 vary in our models based on scenario
Financial Modeling

Comments on System Average Rates

- Projections depict system average funded status and contribution rates
  - Comparable to system average rates shown in August 2018 presentation
- No single employer pays the system average rate
  - Contribution rates vary both by employer and by type of payroll
- Under most scenarios, the maximum rate increase allowed by the rate collar is anticipated for the 2021-2023 biennium
  - In addition to the increase for 2019-2021 adopted at the October meeting
  - Primarily driven by projected benefit changes from Moro Supreme Court decision
  - Reflects effect of investment underperformance through October 2018
- Rates shown do not include:
  - Contribution rates for the Individual Account Plan (IAP)
  - Employer contribution rates for the RHIA & RHIPA retiree healthcare programs
  - Debt service payments on employer-specific pension obligation bonds

This work product was prepared for discussion purposes only and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Any recipient of this work product who desires professional guidance should engage qualified professionals for advice appropriate to its own specific needs.
Steady Return Model
with Current Rate-Setting Policy
Steady Return Model

Current Rate Setting Structure

- The next four slides show financial projections under the current rate setting structure
  - Employer rates adjust each biennium, with changes limited by the rate collar
- Four scenarios for steady annual actual future investment return are shown
  - +5.0%; +6.7%; +7.2%; +9.0%
- While actual future returns won’t be steady year-to-year, the steady return model clearly illustrates the financial dynamics
  - More realistic “noisy” future returns will be shown in the variable return model later in this presentation
  - The effects of near-term and/or long-term future returns worse than +5.0% are captured in the variable return model
- Model incorporates published returns through October 2018

This work product was prepared for discussion purposes only and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Any recipient of this work product who desires professional guidance should engage qualified professionals for advice appropriate to its own specific needs.
Collared Base Pension Rates

Current Rate Setting Structure

The steady return model illustrates impact of consistently achieving the assumed 7.20% return (blue line) and three alternative returns.

At assumed return:
- Rate declines after 2023-2025 as new OPSRP members replace retiring Tier 1/Tier 2 members
- Significant rate drops at 7/1/2035 after large portion of current UAL completes amortization

System Average Collared Base Pension Rates

If investment results are near assumption, collared rate increases in July 2021 to amortize unfunded liability, with a smaller increase in July 2023.

Adopted at Oct 2018 Board meeting

This work product was prepared for discussion purposes only and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Any recipient of this work product who desires professional guidance should engage qualified professionals for advice appropriate to its own specific needs.
Biennial Collared Base Rate Changes

Current Rate Setting Structure

If actual investment returns are near assumption, base contribution increases of over 5.0% of payroll occur in the next biennium starting July 2021, with the increase being necessary to position the system to return to 100% funded status over 20 years if future experience follows assumptions.

Change in System Average Collared Base Pension Rates

Adopted at Oct 2018 Board meeting

This work product was prepared for discussion purposes only and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Any recipient of this work product who desires professional guidance should engage qualified professionals for advice appropriate to its own specific needs.
System Funded Status

Current Rate Setting Structure

Funded status declines at 12/31/2018 to reflect estimated 2018 underperformance. At 7.2% actual return, funded status then remains stable in initial years while rates are collared, before improving steadily.

Funded status reaches 100% in 2035 in the model when actual investment returns equal 7.2%.

System Average Funded Status (Excluding Side Accounts)

This work product was prepared for discussion purposes only and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Any recipient of this work product who desires professional guidance should engage qualified professionals for advice appropriate to its own specific needs.
UAL (Unfunded Actuarial Liability)

Current Rate Setting Structure

UAL in dollar terms increases at 12/31/2018 to reflect estimated 2018 underperformance. At a 7.2% actual return, UAL then grows slightly, before declining and being fully amortized by 2035.
Steady Return Model
without Post-2017 Rate Increases

This work product was prepared for discussion purposes only and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Any recipient of this work product who desires professional guidance should engage qualified professionals for advice appropriate to its own specific needs.
Steady Return Model
Projections Absent Future Rate Increases

- Large contribution rate increases were adopted for 2019-2021 at the October 2018 meeting

- Our modeling in the prior section projects a large increase for the 2021-2023 biennium if actual returns are near or below assumption, or even if returns from November 1, 2018 to the end of December 31, 2019 are at an annualized rate of +9.0%

- In scenarios of future actual investment return experience near or below the current 7.20% assumption, the modeled increases are needed to allow funded status to systematically recover to 100% over time

- The following two slides project the long-term effects of not having future rate increases, including the already-adopted 2019-2021 increase
  - Illustrates the effect if the 2017-2019 collared base rates by payroll were held steady subsequent to the biennium, rather than applying the already-adopted increases in July 2019
2017-2019 Rates Held Steady

Funded Status

Shows projected funded status under steady return projections if collared base contribution rates remain at 2017-2019 levels subsequent to that biennium.

If base contribution rates for 2017-19 are held steady, with 7.2% actual return funded status declines to 63% over the projection period.
2017-2019 Rates Held Steady
UAL (Unfunded Actuarial Liability)

Shows projected UAL under steady return projections if collared base contribution rates remain at 2017-2019 levels subsequent to that biennium.

With contribution rates at 2017-19 levels, UAL exceeds $40 billion at the end of the projection period in the 7.2% actual return scenario.
Steady Return Model
without Post-2019 Rate Increases

This work product was prepared for discussion purposes only and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Any recipient of this work product who desires professional guidance should engage qualified professionals for advice appropriate to its own specific needs.
Steady Return Model
Projections Absent Future Rate Increases Beyond 2019

- The prior section projects the effect on system funded status if the collared base rates were held steady at the 2017-2019 level
  - Illustrates a scenario where the July 2019 rates (adopted in October 2018) are not put into effect, and no subsequent rate changes are made in future biennia
- The following two slides project results if the already-adopted 2019-2021 collared base rates by payroll are put into effect, but then are held steady subsequent to that biennium, rather than having subsequent increases
  - This illustration assumes no additional sources of contribution other than employer rate contributions
2019-2021 Rates Held Steady
Funded Status

Shows projected funded status under steady return projections if collared base contribution rates remain at 2019-2021 levels subsequent to that biennium.

System Average Funded Status (Excluding Side Accounts)

If base contribution rates for 2019-21 are held steady, with 7.2% actual return funded status increases to 83% over the projection period.

This work product was prepared for discussion purposes only and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Any recipient of this work product who desires professional guidance should engage qualified professionals for advice appropriate to its own specific needs.
2019-2021 Rates Held Steady
UAL (Unfunded Actuarial Liability)

Shows projected UAL under steady return projections if collared base contribution rates remain at 2019-2021 levels subsequent to that biennium.

Unfunded Actuarial Liability

With contribution rates at 2019-21 levels, UAL is approximately $20 billion at the end of the projection period in the 7.2% actual return scenario.

This work product was prepared for discussion purposes only and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Any recipient of this work product who desires professional guidance should engage qualified professionals for advice appropriate to its own specific needs.
Variable Return Model

This work product was prepared for discussion purposes only and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Any recipient of this work product who desires professional guidance should engage qualified professionals for advice appropriate to its own specific needs.
Variable Return Model

- Model results are likelihood ranges instead of a single amount
  - The range’s distribution is based on a stochastic simulation using 10,000 trials
  - Scenarios were developed by our national capital market specialists, and use the current OPERF target asset allocation policy; for these scenarios, the median annualized average geometric 20-year return is 6.65%
    - When the PERS Board last reviewed the return assumption in July 2017, the median annualized future return was 6.70% using Milliman’s capital market outlook assumptions
    - In that review, median 10-year annualized future returns using outlook assumptions of the two outside advisors to Oregon Investment Council ranged from 7.05% to 7.40%
- Model incorporates published returns through October 2018
- In our results charts, the dots represent median (50th percentile) outcomes
- We display model results from the 5th to 95th percentiles
  - Ten percent of model outcomes fall outside of the depicted range
- The chart format is demonstrated on the next slide
PERS Fund Rate of Return
Projected 2019 Investment Returns

Demonstrates the format of the charts using single year projected returns in 2019.

This work product was prepared for discussion purposes only and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Any recipient of this work product who desires professional guidance should engage qualified professionals for advice appropriate to its own specific needs.
Our capital market outlook model projects lower median returns in the first five years following 2018 due to current low yields on fixed income. Higher median returns are projected in the latter portion of the modeling period.

Average Annualized Rate of Investment Return
Post-2018 Modeled Returns (Geometric Average)

Modeled asset returns after October 2018 assume median 20 year return of 6.65% with 13.0% annual standard deviation. The 7.20% assumed return is between the 55th and 60th percentile of returns over this period.

This work product was prepared for discussion purposes only and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Any recipient of this work product who desires professional guidance should engage qualified professionals for advice appropriate to its own specific needs.
Published regular account returns of 1.51% through October 2018 are combined with projected future returns for each of the 10,000 scenarios. The resulting distribution of cumulative average returns has a median of 6.4% over the projection period.
System Average Collared Base Contribution Rates

Rates for 2021-2023 are based on the modeled returns for the period ending 12/31/2019.

“Base” rates are system average Tier 1/Tier 2/OPSRP contribution rates excluding IAP contributions, the effect of side accounts & pension bond debt service, and contributions to the retiree healthcare programs.

This work product was prepared for discussion purposes only and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Any recipient of this work product who desires professional guidance should engage qualified professionals for advice appropriate to its own specific needs.
### Biennial Collared Base Rate Changes

#### System Average Rates

About 75% of modeled scenarios show base contribution rate increases above 3% of payroll effective July 2021.

Rates decrease in July 2035 after amortization of a large portion of Tier 1/Tier 2 UAL.

System Average Collared Net Contribution Rates

“Net” rates are collared base rates adjusted to reflect the projected effect of side account rate offsets and pre-SLGRP rate offsets.

Net rate increases in 2029-2031 reflect projected exhaustion of current side accounts and their associated side account rate offsets.

Rates decrease in July 2035 after amortization of a large portion of Tier 1/Tier 2 UAL.

This work product was prepared for discussion purposes only and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Any recipient of this work product who desires professional guidance should engage qualified professionals for advice appropriate to its own specific needs.
### Biennial Collared Net Rate Changes

#### System Average Rates

The July 2029 increase is related to the projected exhaustion of side accounts and pre-SLGRP rate offsets prior to the expiration of the UAL rate amortization charges related to prior investment losses. Rates decrease in July 2035 after amortization of a large portion of Tier 1/Tier 2 UAL.

This work product was prepared for discussion purposes only and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Any recipient of this work product who desires professional guidance should engage qualified professionals for advice appropriate to its own specific needs.
At the 50th percentile, funded status is 70.3% at year-end 2018, and decreases by 0.6% over the next three years before starting to improve, reaching 97% by the end of 2036. Funded status fails to reach 100% by the end of the modeled period because the 50th percentile return in our model lags the current assumed return of 7.20%.
Funded Status (Including Side Accounts)

At the 50th percentile, funded status including side accounts is 76.2% at year-end 2018, and decreases by 2.6% over the next five years before starting to improve, reaching 97% by the end of 2036. Most side accounts will be fully amortized by the end of 2027.
At the 50th percentile, the UAL excluding side accounts is $25.5 billion at year-end 2018, grows to $27.9 billion at the end of 2022, then declines to $3.1 billion by the end of 2036. UAL fails to reach $0 by the end of the modeled period because the 50th percentile return in our model lags the current assumed return of 7.20%.
At the 50th percentile, the UAL including side accounts is $20.5 billion at year-end 2018, grows to $25.1 billion at the end of 2023, then declines to $3.1 billion by the end of 2036. Most side accounts will be fully amortized by the end of 2027.
Variable Return Model Stress Test

- As in recent years, we also used the variable return model to do a “stress test” of the likelihood of certain events in the 10,000 scenarios modeled.
- The likelihood of specified events occurring at some point during the 20-year projection period is shown below.

<table>
<thead>
<tr>
<th>Likelihood of Event Occurring at Some Point in Next 20 Years</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>

Wrap Up / Next Steps

- At the February meeting, preliminary year-end 2018 investment results will be available
  - We can then comment as warranted on estimated impact on the 12/31/2018 actuarial valuation results, which will develop advisory 2021 – 2023 contribution rates.
Appendix

This work product was prepared for discussion purposes only and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Any recipient of this work product who desires professional guidance should engage qualified professionals for advice appropriate to its own specific needs.
This presentation summarizes deterministic and stochastic modeling for the Oregon Public Employees Retirement System ("PERS" or "the System") over a 20 year period beginning December 31, 2017 under a wide range of potential economic scenarios. The results are based upon the same assumptions, methods, and plan provisions as described in the December 31, 2017 System-Wide Actuarial Valuation Report, except where noted otherwise.

In preparing this report, we relied, without audit, on information (some oral and some in writing) supplied by the System’s staff. This information includes, but is not limited to, statutory provisions, employee data, and financial information. We found this information to be reasonably consistent and comparable with information used for other purposes. The valuation results depend on the integrity of this information. If any of this information is inaccurate or incomplete our results may be different and our calculations may need to be revised.

All costs, liabilities, rates of interest, and other factors for the System have been determined on the basis of actuarial assumptions and methods which are individually reasonable (taking into account the experience of the System and reasonable expectations); and which, in combination, offer our best estimate of anticipated experience affecting the System.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. Due to the limited scope of our assignment, we did not perform an analysis of the potential range of future measurements. The PERS Board has the final decision regarding the appropriateness of the assumptions.

Actuarial computations presented in this report are for purposes of determining the recommended funding amounts for the System. The computations prepared for other purposes may differ as disclosed in our report. The calculations in the enclosed report have been made on a basis consistent with our understanding of the System’s funding requirements and goals.

This work product was prepared for discussion purposes only and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Any recipient of this work product who desires professional guidance should engage qualified professionals for advice appropriate to its own specific needs.
Certification

The calculations in this report have been made on a basis consistent with our understanding of the plan provisions described in the appendix of this report. Determinations for purposes other than meeting these requirements may be significantly different from the results contained in this report. Accordingly, additional determinations may be needed for other purposes.

Milliman’s work is prepared solely for the internal business use of the Oregon Public Employees Retirement System. Milliman does not intend to benefit or create a legal duty to any third party recipient of its work product.

No third party recipient of Milliman's work product should rely upon Milliman's work product. Such recipients should engage qualified professionals for advice appropriate to their own specific needs.

The consultants who worked on this assignment are pension actuaries. Milliman’s advice is not intended to be a substitute for qualified legal or accounting counsel.

The signing actuaries are independent of the System. We are not aware of any relationship that would impair the objectivity of our work.

On the basis of the foregoing, we hereby certify that, to the best of our knowledge and belief, this report is complete and accurate and has been prepared in accordance with generally recognized and accepted actuarial principles and practices. We are members of the American Academy of Actuaries and meet the Qualification Standards to render the actuarial opinion contained herein.
Appendix

Actuarial Basis

Data

We have based our calculation of the liabilities on the data supplied by the Oregon Public Employees Retirement System and summarized in the Valuation Report.

Assets as of December 31, 2017, were based on values provided by Oregon PERS reflecting the Board’s earnings crediting decisions for 2017, as shown in the Valuation Report. Financial model projections reflect October 31, 2018 investment results for regular and variable accounts as published by Oregon State Treasury.

Methods / Policies

UAL Amortization: The UAL for OPSRP and Retiree Health Care as of December 31, 2007 are amortized as a level percentage of combined valuation payroll over a closed 16 year period for OPSRP and a closed 10 year period for Retiree Health Care. For the Tier 1/Tier 2 UAL, the amortization period was reset at 20 years as of December 31, 2013. Gains and losses between subsequent odd-year valuations are amortized as a level percentage of combined valuation payroll over the amortization period (20 years for Tier/Tier 1, 16 years for OPSRP, 10 years for Retiree Health Care) from the odd-year valuation in which they are first recognized.

Contribution rate stabilization method: Contribution rates for a rate pool (e.g. Tier 1/Tier 2 SLGRP, Tier 1/Tier 2 School Districts, OPSRP) are confined to a collar based on the prior contribution rate (prior to application of side accounts, pre-SLGRP liabilities, and 6 percent Independent Employer minimum). The new contribution rate will generally not increase or decrease from the prior contribution rate by more than the greater of 3 percentage points or 20 percent of the prior contribution rate. If the funded percentage excluding side accounts drops below 60% or increases above 140%, the size of the collar doubles. If the funded percentage excluding side accounts is between 60% and 70% or between 130% and 140%, the size of the rate collar is increased on a graded scale.
Appendix

Actuarial Basis

Methods / Policies (cont’d)

*Expenses*: Annual administration expenses are assumed to be $37.5M for Tier 1/Tier 2 and $6.5M for OPSRP, as described in the 2016 Experience Study Report, and are added to the corresponding normal cost for the year in which they are incurred. Administration expenses for each year after 2018 are assumed to increase with inflation, which varies by scenario based on capital market assumptions.

*Actuarial Value of Assets*: Equal to Market Value of Assets excluding Contingency and Tier 1 Rate Guarantee Reserves. The Tier 1 Rate Guarantee Reserve is not excluded from assets if it is negative (i.e. in deficit status).

Assumptions

Assumptions for valuation calculations are as described in the 2016 Experience Study Report.

Provisions

Provisions valued are as detailed in the December 31, 2017 System-Wide Actuarial Valuation Report.
Appendix
Rate Projection Basis

Assumptions

In general, all assumptions are as described in the 2016 Experience Study Report.

The major actuarial valuation assumptions used in our projections are shown below. They are aggregate average assumptions that apply to the whole population and were held constant throughout the projection period. The economic experience adjustments were allowed to vary in future years given the conditions defined in each economic scenario.

- Valuation interest rate – 7.20%
- Tier 1 Regular account growth – 7.20%
- Actual fund investment return – Varies by scenario according to capital market assumptions
- Variable account growth – Equal to investment return on public equity portion of the fund
- Inflation assumption – 2.50%
- Inflation experience – Varies by scenario according to capital market assumptions
- Wage growth assumption – 3.50%
- Wage growth experience – 1.00% greater than inflation experience
- Demographic experience – as described in 2016 Experience Study Report
- New entrant experience – New members are assumed to be hired at the rate necessary to keep the total number of members in each job class (General Service, School District, Police & Fire, and Judges) constant over the duration of the projection. All new entrants other than judges are assumed to join as OPSRP members. New entrant pay is assumed to grow at the rate necessary for overall system payroll to increase with wage growth experience, as described above.
Appendix
Rate Projection Basis

Reserve Projection

Contingency Reserve as of 12/31/2017 was assumed to be $50.0M. No future increases or decreases to this reserve were assumed.

The Tier 1 Rate Guarantee Reserve (“RGR”) was assumed to be $510.5M as of 12/31/2017. The RGR was assumed to grow with excess returns above the 7.20% target growth on Tier 1 Member Accounts. When modeled aggregate returns were below 7.20%, applicable amounts from the RGR were assumed to transfer to Tier 1 Member Accounts to maintain the 7.20% target growth rate. The RGR is allowed to be negative, but the reserve is not excluded from valuation assets when it is negative. We did not include in rates any potential additional employer levy that could be required to eliminate a persistent negative RGR.
Appendix
Rate Projection Basis

Capital Market Model

For each 20-year projection, we ran 10,000 stochastic scenarios for inflation and asset class rates of return. The scenarios were calibrated to represent Milliman’s capital market assumptions in terms of expected average real returns, the expected year-to-year volatility of the returns, and the expected correlation between the returns of different asset classes. Annual rates of return for each of the asset classes and inflation are generated from a multivariate lognormal probability distribution. Rates of return are independent from year to year.

For this purpose, we considered the Oregon PERS Fund to be allocated among the model’s asset classes as shown below. This allocation is based on the OIC’s Statement of Investment Objectives and Policy Framework for the Oregon PERS Fund, as revised June 7, 2017.
