

LEGISLATIVE COUNSEL COMMITTEE	Policy and Administrative Procedure Manual
Section: Administrative, Legal and Publication Services	
Subject: Public Records Request Fee Policy	Number: 142-112
Approved by: Legislative Counsel Committee	Date: 1-10-18

Purpose: To establish uniform procedures by which the legislative branch charges fees that are “reasonably calculated to reimburse the public body for the public body’s actual cost of making public records available,” in compliance with ORS 192.324, or determines to waive fees.

Policy: Legislative Counsel shall assess fees that are reasonably calculated to reimburse the legislative branch for the costs associated with providing copies of public records to the public, unless it is in the public interest to waive or reduce those fees.

Public records request fees shall be calculated based upon the type of work being performed rather than the salary of the employee performing the work to provide public records to the public at the least cost possible. Clerical work such as scanning, copying, searching for paper records and reviewing to determine responsiveness of records to the request will be billed at \$25 per hour. More complicated work requiring knowledge of the legislative process and business or internal operations of legislative branch offices will be billed at the mid-level work rate of \$40 per hour. Professional level work requiring comprehensive knowledge of public records law, other law or information technology expertise will be billed at \$75 per hour. Any costs for products or services performed by third parties will be billed at actual cost.

Public records request fees shall be waived or reduced if the request is in the public interest. To be eligible for reduced fees the request must be unrelated to any commercial or political opposition research purpose, the requester and requester’s organization may not be paid by a third party to request the records and the request must be unrelated to any potential legal or administrative proceeding involving the requester. Finally, there must be public interest in the requested records. An interest in open and transparent government generally, or an interest in facilitating further communication by the requester does not constitute public interest in the requested records. Public records requests that meet the initial public interest test shall be subject to a 40 percent reduction in fees.

Public records request fees shall be entirely waived if in addition to meeting the initial public interest test described in the preceding paragraph, the request also meets the comprehensive public interest test. To meet the comprehensive public interest test, the request must be narrowly tailored to preserve public resources, to describe the requested records with specificity

and to only include records in which there is a public interest. Since the comprehensive public interest test balances the conservation of public resources against the public interest in disclosure, requests seeking all documents related to a broad topic, multiple smaller topics or from many different legislative offices will generally not be eligible for a fee waiver unless the requester can demonstrate that there is a strong public interest in disclosure.

If fees to complete a public records request as otherwise determined under this policy are \$25 or less, the fees are waived.
