

Oregon Wildfire and Electric Collaborative

Adapting Wildfire Risk Assessments to Dynamic Seasonal Conditions

July 30, 2020

Mark Skorupa

Dan Loomis

Rebecca Lawrence

Preparation for fire season

Inspection and maintenance in high-fire risk areas

- Vegetation management Advanced Wildfire Risk Reduction program

Facility inspections and corrections

- Remediation of conditions identified in 2019 inspection has been underway for the past several months

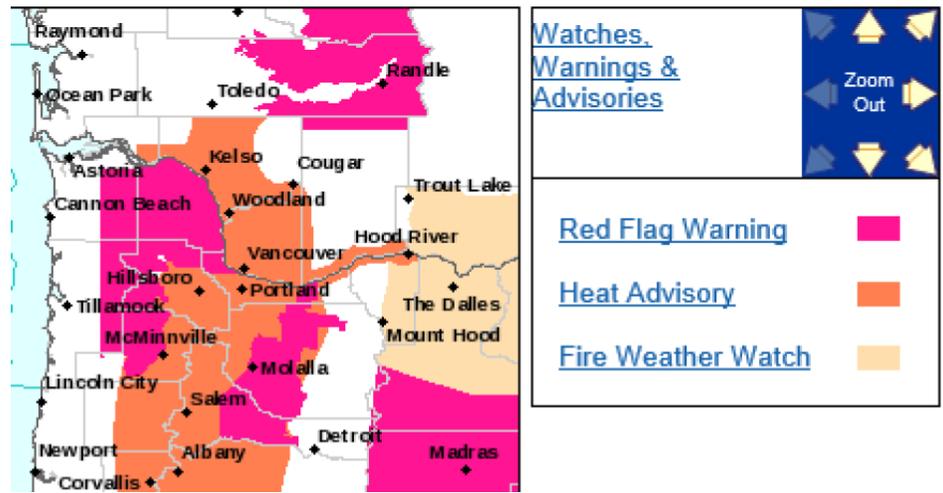

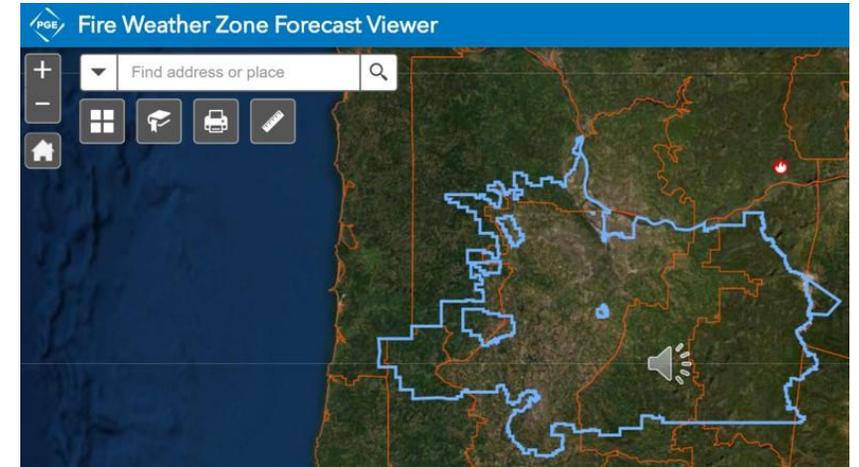

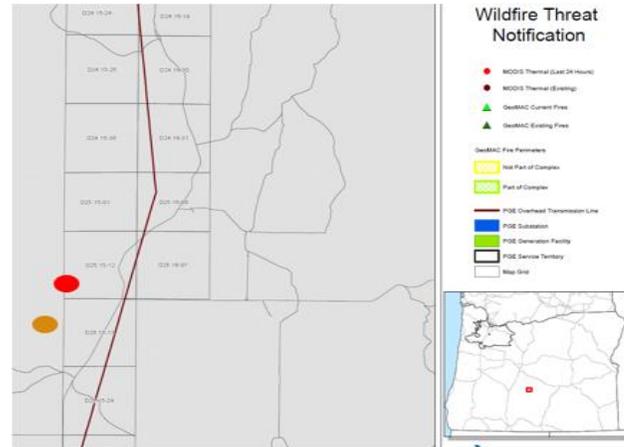

Operational Practices

- Reclosing disabled on line devices
- Training of field employees to address situational awareness
- Fire suppression equipment and field weather monitoring units

Response to Weather and Wildfire Forecasts

Situational awareness

- Wildfire Threat Alert notifications
- SMS after-hours notifications
- Red-flag warning notifications
- Daily Ops briefings
- Stand-up/tailboard briefings
- Kestrel weather meters
- High-definition cameras x 2
- Weather stations x 2

Actions Taken Post Fire Season

- Review of operations practices and communications and share ideas for improvements
- Continue working with wildfire risk model to improve system resiliency
- Discuss any incidents that didn't go as planned
